Receptor Specific Proteins Plant And Animal Lectins:

Receptor-specific Proteins Edwin Richard Gold, Peter Balding, 1975 *Phylogenesis of Immune Functions* Gregory W. Warr, Nicholas Cohen, 2024-12-20 This volume discusses recent advances in research regarding the evolution of specific and nonspecific defense responses in a taxonomically diverse array of species Topics regarding invertebrates include the protective mechanisms cellular and molecular employed by insects the protective roles of lectins and the self nonself discrimination revealed by tissue incompatibility reactions With vertebrates the evolution of the immunoglobulin related superfamily of recognition molecules including immunoglobulins and the major histocompatibility complex molecules is examined over several chapters Other topics reviewed include the evolution of nonimmunoglobulin mediators of defense e.g cytokines and eicosanoids lymphocyte subpopulations including effects of ambient temperature on function and the phylogenetic emergence of natural killer cells *Phylogenesis of Immune Functions* provides invaluable information for evolutionary biologists as well as all immunologists and other researchers interested in discovering how inhabitants in our increasingly threatened biosphere protect themselves against environmental pathogens and toxins

Lectin-Microorganism Interactions R. Doyle, 1994-02-08 Provides in depth coverage of lectins and their interactions with micro organisms and demonstrates how lectins function as probes for viral bacterial fungal and protozoal surfaces as well as for blood group antigens *Glycosciences* Hans-Joachim Gabius, Sigrun Gabius, 2008-09-26 A comprehensive survey of the topic ranging from basic molecular research to clinical applications Critical reviews by leading experts in each field summarize the state of knowledge and discuss the anticipated benefits of novel approaches and strategies These include the impact of modern analysis techniques on glycobiology the use of synthetic neoglycoproteins or the clinical consequences of new insights into the physiological role of lectins and glycoconjugates in pathology oncology immunity neuroscience and reproduction medicine Throughout the aim is to separate realistic applications from mere hopes *Immune and Receptor Assays in Theory and Practice* Patrick Englebienne, 1999-12-28 In the past ten years employment of immuno and receptor assays has grown dramatically Now used in the pharmaceutical industry for automated screening programs in the agro food industry for on line processing control and food adulteration detection and in clinical laboratories they are fully integrated analytical tools However the literature often covers only one type of assay or just one of the many systems available *Immune and Receptor Assays in Theory and Practice* gathers and organizes the available information to help you establish the best assay for your application This composite presents the fundamentals of both techniques and introduces practical examples of equation use antibody and receptor purification antigen labeling immunization and establishment of antibodies for long term storage It contrasts the many different assay designs and addresses market trends as the context for developing immuno assay goals In addition this volume summarizes the biochemical and physical properties involved in antibody and receptor ligand interactions and reagent manufacture This is the first single volume synthesis of both immuno and receptor assays

With theoretical background and practical examples Immune and Receptor Assays in Theory and Practice allows you to base your experiment on proven techniques components and applications for the most reliable results

Organization and Assembly of Plant and Animal Extracellular Matrix W. Steven Adair, 2012-12-02 Organization and Assembly of Plant and Animal Extracellular Matrix presents a state of the art view of some of the experimental systems in plant and animal matrix biology It discusses certain principles underlying establishment of complex three dimensional architecture cross broad evolutionary boundaries The opening chapter reviews studies on the cellular mechanisms responsible for storage release assembly and function of extracellular matrices during early sea urchin development The subsequent chapters describe the structure assembly disassembly and molecular biology of the Chlamydomonas reinhardtii cell wall The chapters also summarize the status of work on basement membrane assembly Important insights into approaches to identify critical molecular domains and the complexity of relating defined molecular associations to establishment of matrix architecture are provided A family of discovered cell wall genes that encode protein products containing up to 70% glycine is presented in Chapter 4 This is followed by a discussion on the role of alginate self assembly in cell wall formation in Fucus The book goes on to address the issue of protein carbohydrate recognition with a detailed discussion of plant and animal lectins Chapter 7 tackles a family of genes encoding higher plant hydroxyproline rich glycoproteins HRGPs and the relationship between the HRGP genes cloned and their products The final two chapters are devoted to one of the most important classes of protein modifying enzymes for extracellular matrix formation and function the prolyl hydroxylases This book will be of help to workers in plant and animal matrix in understanding information approaches and ideas that they may not normally encounter

Glycoconjugates Howard J. Allen, Edward C. Kisailus, 1992-04-15 Glycoconjugates Composition Structure and Function provides an excellent overview of the composition biosynthesis function and structure of the carbohydrate chains of glycoconjugates from higher organisms It is recommended as a core reference text providing excellent coverage of the glycoconjugate field
