Memory, History, and Autobiography in Early Modern Towns in East and West Vanessa Harding, Kōichi Watanabe, 2015-09-04 Between the sixteenth and the nineteenth centuries in both Western Europe and East Asia towns and cities helped to shape the individual consciousness against the background of a more traditional society in which collective values remained strong Towns were centres of stimulus challenge and opportunity for residents and visitors and the identity of the town itself its character and history became a strong theme in the formation of the individual Writing and the circulation of texts played an important part in this process Towns created artefacts rituals and memories that embodied their history and identity but individuals positioned themselves and their families in the town histories as they wrote them The seven essays in this volume range in focus from Renaissance Venice to nineteenth century Edo Tokyo and from capital cities Seoul London to provincial towns in France England and Japan They explore the interaction of self family and social group and the construction of collective memory examining autobiographies letters and exchange diaries family narratives and urban histories and collections Together they challenge the long prevailing historiography that contrasts the emergence of the individual in European societies with the persistently traditionalist and collective character of East Asian societies in the Early Modern period

Town Born Barry Levy, 2011-07-06 In the seventeenth and eighteenth centuries British colonists found the New World full of resources With land readily available but workers in short supply settlers developed coercive forms of labor indentured servitude and chattel slavery in order to produce staple export crops like rice wheat and tobacco This brutal labor regime became common throughout most of the colonies An important exception was New England where settlers and their descendants did most work themselves In *Town Born* Barry Levy shows that New England's distinctive and far more egalitarian order was due neither to the colonists' peasant traditionalism nor to the region's inhospitable environment Instead New England's labor system and relative equality were every bit a consequence of its innovative system of governance which placed nearly all land under the control of several hundred self governing town meetings As Levy shows these town meetings were not simply sites of empty democratic rituals but were used to organize force and reconcile laborers families and entrepreneurs into profitable export economies The town meetings protected the value of local labor by persistently excluding outsiders and privileging the town born The town centered political economy of New England created a large region in which labor earned respect relative equity ruled workers exercised political power despite doing the most arduous tasks and the burdens of work were absorbed by citizens themselves In a closely observed and well researched narrative *Town Born* reveals how this social order helped create the foundation for American society
