Reforming College Composition Writing The Wrongs:

Reforming College Composition Ray Wallace, Alan Jackson, Susan Lewis Wallace, 2000-07-30 As colleges and universities have responded to the demand of businesses and industries for graduates who can write effectively Composition Studies has gained significance However while new theories and approaches to the teaching of writing have been proposed and implemented many composition courses do not satisfactorily educate their students This volume includes essays by writing specialists who are concerned with their own failure to improve their students writing skills These contributors examine why entering college students still write poorly and why our various attempts to improve such poor writing skills have largely failed They compare the promise of previously touted new methods paradigm shifts and curricular innovations with the reality of little change or improvement they describe what their students can and cannot do in the writing classroom even after 12 years of primary and secondary education and they address what they see as needed reforms in the whole idea of college composition especially for the first year college student *The Writing Center Director's Resource Book* Christina Murphy, Byron Stay, 2012-11-12 The Writing Center Director's Resource Book has been developed to serve as a guide to writing center professionals in carrying out their various roles duties and responsibilities It is a resource for those whose jobs not only encompass a wide range of tasks but also require a broad knowledge of multiple issues The volume provides information on the most significant areas of writing center work that writing center professionals both new and seasoned are likely to encounter It is structured for use in diverse institutional settings providing both current knowledge as well as case studies of specific settings that represent the types of challenges and possible outcomes writing center professionals may experience This blend of theory with actual practice provides a multi dimensional view of writing center work In the end this book serves not only as a resource but also as a guide to future directions for the writing center which will continue to evolve in response to a myriad of new challenges that will lie ahead ***The Idea of a Writing Laboratory*** Neal Lerner, 2009-07-09 The Idea of a Writing Laboratory is a book about possibilities about teaching and learning to write in ways that can transform both teachers and students Author Neal Lerner explores higher education's rich history of writing instruction in classrooms writing centers and science laboratories By tracing the roots of writing and science educators recognition that the method of the lab hands on student activity is essential to learning Lerner offers the hope that the idea of a writing laboratory will be fully realized more than a century after both fields began the experiment Beginning in the late nineteenth century writing instructors and science teachers recognized that mass instruction was inadequate for a burgeoning non traditional student population and that experimental or laboratory methods could prove to be more effective Lerner traces the history of writing instruction via laboratory methods and examines its successes and failures through case studies of individual programs and larger reform initiatives Contrasting the University of Minnesota General College Writing Laboratory with the Dartmouth College Writing Clinic for example Lerner offers a cautionary tale of the fine line between experimenting with teaching

students to write and curing the students of the disease of bad writing The history of writing within science education also wends its way through Lerner s engaging work presenting the pedagogical origins of laboratory methods to offer educators in science in addition to those in writing studies possibilities for long sought after reform The Idea of a Writing Laboratory compels readers and writers to don those white coats and safety glasses and discover what works and asserts that teaching writing as an experiment in what is possible as a way of offering meaning making opportunities for students no matter the subject matter is an endeavor worth the struggle
