Divine Science and the Science of God Victor Preller, 2005-05-17 In this book Victor Preller examines the logical status of religious language in the light of recent developments in American analytic philosophy The problem inherent in religious language is presented in terms of the referential status of the word God The author argues that the significance of any referential term is dependent upon the ability of that term to play a significant role within a unified conceptual system The problem is shown to transcend the epistemological dogmas of Positivism and Conceptual Empiricism and to be inherent in any intelligible epistemology including that of Thomas Aquinas whose theological treatises serve as a model of religious language for the thesis of this book According to Professor Preller Divine Science Aquinas term for what we now call Natural Theology results from a reflection upon the limitations encountered by the intellect in its attempt to render intelligible the objects of human experience In the Science of God Aquinas term for that mode of knowing engendered by faith the unknown meta empirical referent of Divine Science becomes the object of the human intellect While this study develops out of the discussions inaugurated by Flew and McIntyre in *New Essays in Philosophical Theology* it rejects the excessively empirical approach of most other studies in that tradition It applies post positivistic analysis to specifically Catholic theological language but it obviously applies to the theological language involved in any form of theism

Setting Goals John Renesch,1983 **Political Disagreement, Violence and Nonviolence** Greg McCreery,2023-07-10 Violence and Nonviolence descriptively analyzes numerous examples of theorists definitions and characterizations of varying types of violence arguing that a commonsense view of violence and nonviolence is based on paradigm cases that most people generally agree consider as kinds of violence and nonviolence Beyond these cases however McCreery argues that collectives of individuals form into politicized groups that share visions of these types of violence and nonviolence particularly in terms of what they believe to be legitimate kinds of violence and nonviolence in contrast to illegitimate kinds An understanding of violence and nonviolence requires a perspectival relational approach that situates the vulnerable human body as primary Furthermore if nonviolence is to succeed as an effective political strategy then it must work as a kind of violence at least from the perspective of the adversary *Calvinism and the Problem of Evil* David E. Alexander,Daniel M. Johnson,2016-07-13 Contrary to what many philosophers believe Calvinism neither makes the problem of evil worse nor is it obviously refuted by the presence of evil and suffering in our world Or so most of the authors in this book claim While Calvinism has enjoyed a resurgence in recent years amongst theologians and laypersons many philosophers have yet to follow suit The reason seems fairly clear Calvinism many think cannot handle the problem of evil with the same kind of plausibility as other more popular views of the nature of God and the nature of God s relationship with His creation This book seeks to challenge that untested assumption With clarity and rigor this collection of essays seeks to fill a significant hole in the literature on the problem of evil **Important Things That Don't Matter** David
