Silicon And The State French Innovation Policy In The Internet Age:

Silicon and the State Gunnar Trumbull, 2004-04-21 In the early 1990s French officials viewed with some concern the emerging and innovative high technology sectors of the U S and British marketplace Fearful of falling too far behind the French government implemented a vast array of policies from tax incentives for investing in risky high tech start ups to new standards for electronic signatures designed to promote the commercialization of new economy technologies in France The efforts have turned French innovation policy on its head Traditional government and bank financed research and development were replaced by private venture capital Professionals in France s technical elite long accustomed to a secure career track in prestigious laboratories and industrial conglomerates began moving into risky entrepreneurial ventures New technologies once developed exclusively by France s national champions of the marketplace such as Ariane Airbus and Renault began to be commercialized by technology start ups Efforts to promote the new economy however have proved politically and socially contentious Many French policymakers and public intellectuals fear that regulatory liberalization might threaten or undermine state sovereignty Gunnar Trumbull investigates France s experience in adapting to the requirements of innovation in the new information and communications technology ICT sectors by focusing on events over a six year period from 1996 to 2002 This short stretch of time proved a crucible for French leaders and businesspeople it saw dramatic efforts at regulatory reform a boom in technology start ups venture capital and initial public offerings the spread of the Internet and then a collapse in the Internet market accompanied by a broader economic decline The new challenges of the ICT revolution were confronted and new policies and practices were tested and stressed The author describes France s new technology policy as both boldly new and familiarly French He commends the French *How to Make an Entrepreneurial State* Rainer Kattel, Wolfgang Drechsler, Erkki Karo, 2022-01-01 A ground breaking account which shows how the public sector must adapt but also persevere in order to advance technology and innovation From self driving cars to smart grids governments are experimenting with new technologies to significantly change the way we live Innovation has become vitally important to states across the world Rainer Kattel Wolfgang Drechsler and Erkki Karo explore how public bodies pursue innovation looking at how new policies are designed and implemented Spanning Europe the USA and Asia the authors show how different institutions finance new technologies and share cutting edge information They argue for the importance of agile stability demonstrating that in order to successfully innovate state organizations have to move nimbly like start ups and yet ensure stability at the same time And that particularly in the light of the Covid 19 pandemic governments need both long term policy and dynamic capabilities to handle crises This vital account explores the complex and often contradictory positions of innovating public bodies and shows how they can overcome financial and political resistance to change for the good of us all *Creating Silicon Valley in Europe* Steven Casper, 2007-07-05 Through the 1990s and early 2000s the strength of the United States economy has been linked to its ability to foster large numbers of

small innovative technology companies a few of which have grown to dominate new industries such as Microsoft Genentech or Google US technology clusters such as Silicon Valley have become tremendous engines of innovation and wealth creation and the envy of governments around the world Creating Silicon Valley in Europe examines trajectories by which new technology industries emerge and become sustainable across different types of economies Governments around the world have poured vast sums of money into policies designed to foster clusters of similar start up firms in their economies This book employs careful empirical studies of the biotechnology and software industries in the United States and several European economies to examine the relative success of policies aimed at cultivating the Silicon Valley model of organizing and financing companies in Europe Influential research associated with the varieties of capitalism literature has argued that countries with liberal market orientations such as the United States and the United Kingdom can more easily design policies to cultivate success in new technology industries compared to countries associated with organized economies such as Germany and Sweden The book's empirical findings support the view that national institutional factors strongly condition the success of new technology policies However the study also identifies important cases in which radically innovative new technology firms have thrived within organized economies Through examining case of both success and failure Creating Silicon Valley in Europe helps identify constellations of market and governmental activities that can lead to the emergence of sustainable clusters of new technology firms across both organized and liberal market economies

A Socio-History of Internet Policies Anne Bellon, 2025-01-14 This book examines the development of internet policymaking over the last forty years Drawing on evidence from France and elsewhere it adopts a sociohistorical perspective to offer insights into the ways democratic states regulate the internet and digital transformation more generally Adopting a chronological approach and utilising both policy analysis and interviews with key actors it retells the changing role of the state in internet regulation since the inception of the internet to the present day It also explores the complex relationships

between public administrations and internet organizations and considers whether states are really capable of governing the digital space It will appeal to all those interested in public policy digital studies sociology and communication studies

Collaborative Advantage Jonas Nahm, 2021 Collaborative Advantage offers a bold new take on the drivers and consequences of globalization both for innovation in renewable energy industries and domestic politics In an era of rapid international economic integration how do countries interact innovate and compete in industries like energy that are fundamental to national interests In Collaborative Advantage Jonas Nahm examines the development of the wind and solar industries two historically important sectors that have long been the target of ambitious public policy As wind and solar grew from cottage industries into lucrative global sectors of geopolitical importance China Germany and the United States each developed distinct constellations of firms with starkly different technical capabilities The book shows that globalization itself has reinforced such distinct national patterns of industrial specialization Economically globalization has allowed domestic firms to specialize in specific activities because of new opportunities to collaborate with firms from abroad Politically new possibilities for specialization have allowed firms to repurpose existing domestic institutions for application in new industries Against the backdrop of policy efforts that have generally failed to grasp the cross national nature of innovation the book offers a novel explanation for both the causes of changes in the global organization of innovation and their impact on domestic politics As interdependence in global supply chains has again come under fire in the wake of the Covid 19 pandemic Collaborative Advantage challenges the notion that globalization is primarily about competition between nations highlighting instead the central role of international collaboration in the global economy particularly in clean energy industries critical to solving the climate crisis

The Politics of Representation in the Global Age Peter A. Hall, Wade Jacoby, Jonah Levy, Sophie Meunier, 2014-04-07 This book argues that interests are actively forged through processes of politics It develops an analytic framework for understanding how representation takes place based on processes of identification mobilization and adjudication and explores how these processes have evolved over time

Corporate Governance, Finance and the Technological Advantage of Nations Andrew Tylecote, Francesca Visintin, 2007-12-19 Exploring the technological advantage of nations their performance and pattern of specialization and the affect of their financial and governance systems this book discusses changes that need to be made so that they can cope with new challenges

How Nations Innovate Jingjing Huo, 2015 How Nations Innovate compares how affluent capitalist economies differ in their patterns of technological innovation Building on the varieties of capitalism literature this book goes beyond the traditional focus on radical versus incremental innovation in existing scholarship and takes the comparison of capitalism to an entirely new set of questions around technological innovation For example which type of capitalism engages in job threatening innovation Whose innovation widens income inequality Whose innovation raises productivity Which type of capitalism has more effective financial markets for innovation Whose innovators emphasize control rather than flexibility during innovation By addressing

these questions the author demonstrates that the way nations innovate often has deep and sometimes counter intuitive implications for how they compare in many areas of socio economic performance For example although venture capital is most active in Anglo Saxon economies it seems that venture capital performance in stimulating innovation is also poorest in precisely these countries On the issue of employment the author argues that whilst technological innovation in Anglo Saxon economies creates jobs innovation in European economies destroys jobs Nations also differ in the nature of income inequality driven by innovation While innovation pushes top earners further ahead of median earners in Anglo Saxon economies it drags bottom earners further behind the median in European economies Finally varieties of capitalism also differ in their ability to cope with the volatilities of innovation While Anglo Saxon economies face a trade off between low volatility and high innovation output these two goals seem jointly achievable in European economies

China's Telecommunications Revolution Eric Harwit,2008-02-28 A comprehensive look at China s telecommunications industry this text considers the way Chinese companies and the government acted in concert to put telephones and Internet access in the hands of hundreds of millions in less than 25 years and looks at the consequences of this telecommunications revolution

Growth and Welfare in Advanced Capitalist Economies Anke Hassel,Bruno Palier,2021-01-14 Growth and Welfare in Advanced Capitalist Economies takes stock of the major economic challenges that advanced industrial democracies have faced since the early 1990s and the responses by governments to them It has three goals firstly to further our understanding of how political economies have transformed over the past decades secondly to analyse the contribution of governments to these changes by looking at their growth strategies and thirdly to highlight and analyse the role of the reforms of welfare systems in this transformative change In a nutshell this book maps and provides general understanding of the evolution of growth regimes in advanced capitalist countries It identifies five main growth regimes in contemporary advanced capitalist economies three export led and two domestic demand led ones To do so the book combines a supply side approach to economic growth as advocated by the Varieties of Capitalism Literature OUP 2001 with a demand side perspective as the recent discussion on growth models has exemplified It argues that all political economies consist of growth regimes which are based on a set of institutions that shape the supply side of the economy as well as on demand drivers such as government spending and private consumption Both supply and demand are heavily shaped by the welfare state which provides for skills through education systems and stimulates demand through high social spending and private pension funds The book focuses on the analysis of welfare reforms as growth strategies pursued by governments in an era characterised by financialization and the rise of the knowledge economy

How Universities Promote Economic Growth Shahid Yusuf,Kaoru Nabeshima,2007 With the competitiveness of firms in an open and integrated world environment increasingly reliant on technological capability universities are being asked to take on a growing role in stimulating economic growth Beyond imparting education they are now viewed as sources of industrially valuable technical skills innovations and entrepreneurship Developed and developing

countries alike have made it a priority to realize this potential of universities to spur growth a strategy that calls for coordinated policy actions
