Management of Technological Change E.G. Frankel, 2012-12-06 Technological change has been recognized as the major contributor to economic growth and has become one of the most important challenges to policy makers and managers Many excellent books and papers have been written on the subject Most of these deal with the macro or micro economic impact of technological change or the technological change process from invention and discovery to innovation development and final maturity as well as ultimate obsolescence of technology This book is

designed to present technological change as a decision process and explain the use of recently developed methods for the effective management of technological change In particular techniques for the effective choice among technological alternatives timing of the introduction of new technology both in terms of its own status and that of the technology to be replaced if any and the rate and method of introduction of new technology are presented Management of technology is a complex decision process which is affected by both internal and external factors The purpose of this book is to instruct the reader in effective technology decision making which involves the evaluation of the status of technology in use if any the problem to be solved or output to be obtained determination of environmental and internal constraints and the competitive environment or market conditions which affect the technology decisions Economics of Innovation: The Case of Food Industry Giovanni Galizzi, Luciano Venturini, 2012-12-06 Giovanni Galizzi and Luciano Venturini The food industry has been characterized by several and profound changes in its structure and competitive environment in the last decades Although it is not a research oriented industry there is no arguing that technological change and particularly product innovations are crucial determinants of firms performance and In recent years food manufacturers have accelerated the consumers welfare development of new products by using new ingredients processing and packaging techniques Thus food markets are increasingly characterized by competitive environments where relevant flows of innovative products quality improvements and new technologies provide new consumption trends food habits market opportunities and firms strategies However the issue of product innovation in the food industries has been rather neglected by economists Few works have explicitly addressed this issue After the pioneering book of Buzzell and Nourse 1967 one can count few contributors Connor 1981 examined the empirical determinants of new food products introductions Padberg and Westgren 1979 provided crucial insights about the nature of food innovation through their notions of consumer inertia technological redundancy and incremental product innovation Some case studies provide useful empirical materials but they are generally sparse
