Unified Modeling Language. "UML" '98: Beyond the Notation Jean Bezivin,Pierre-Alain Muller,2004-06-30 This volume contains mainly the revised versions of papers presented at the workshop 98 Beyond the Notation that took place in Mulhouse France on June 3 4 1998 We thank all those that have made this possible and particularly all the people in Mulhouse that worked hard to make this meeting a success with such a short delay between the announcement and the realization We are specially grateful to Nathalie Gaertner who put in a tremendous amount of effort in the initial preparation of the workshop We were pleasantly surprised of the quality of the submitted material and of the level of the technical exchanges at the Mulhouse meeting More than one hundred attendees from about twenty different countries representing the main actors in the UML research and development scene gathered in Mulhouse for two full study days We would like to express our deepest appreciation to the authors of submitted papers the editorial committee for this volume the program committee for the initial workshop the external referees and many others who contributed towards the final contents of this volume April 1999 Jean Bezivin Pierre Alain Muller Web Services in the Enterprise Akhil Sahai,Sven Graupner,2007-01-31 Enterprise IT

infrastructure is getting increasingly complex With the increase in complexity has arisen the need to manage it Management in general can be seen as the process of assuring that a managed entity meets its expectations in a controlled and predictable manner Examples of managed entities are not only components entire systems processes but also people such as employees developers or operators and entire organizations Traditional management has addressed some of these issues in varied manner The emergence of Web services has added a new complexity to the management problem and poses a new set of

problems But it also adds to the mix a set of technologies that will make the task of management simpler Management of Web services will be critical as businesses come to rely on them as a substantial source of their revenue The book tries to cover the broad area of web services the concepts implications for the enterprise issues involved in their management and how they are being used for management themselves The book is intended as a reference for current practice and future directions for web services and their management The book is directed at Computing professionals academicians and students to learn about the important concepts behind the web services paradigm and how it impacts the enterprise in general and how it affects traditional application network and system management

Basic Concepts for Managing Telecommunications Networks Lawrence Bernstein,C.M. Yuhas,2005-11-25 It is important to understand what came before and how to meld new products with legacy systems Network managers need to understand the context and origins of the systems they are using Programmers need an understanding of the reasons behind the interfaces they must satisfy and the relationship of the software they build to the whole network And finally sales representatives need to see the context into which their products must fit *Bringing Telecommunication Services to the People - IS&N '95* Anne Clarke,Mario Campolargo,1995-10-05 This volume constitutes the proceedings of the Third International Conference in Broadband Services and Networks IS this book summarizes at the same time the main results of a group of RACE projects sponsored by the European Commission for several years To meet the new challenges in broadband communication service engineering has now emerged as a new discipline strongly related to software engineering particularly the concepts of object orientation and open distributed processing are being adopted The book presents 44 full papers and 8 posters selected from 88 submissions Among the issues addressed are service architecture usability communications management advanced communication services security and service creation
