Extremal Methods and Systems Analysis A. V. Fiacco,K. O. Kortanek,2012-12-06 The papers appearing in this Volume were selected from a collection of papers presented at the International Symposium on Extrema Methods and Systems Analysis on the Occasion of Professor A Charnes 60th Birthday at the University of Texas in Austin 13 15 September 1977 As coeditors we have followed the normal editorial procedures of scholarly journals We have obtained invaluable assistance from a number of colleagues who essentially performed the duties of associate editors coordinating most of the reviews All papers except those appearing in the Historical Perspectives section were refereed by at least two individuals with competency in the respective area Because of the wide range and diversity of the topics it would have been impossible for us to make a consistently rational selection of papers without the help of the associate editors and referees We are indeed grateful to them The breadth of extremal methods and systems analysis suggested by the range of topics covered in these papers is characteristic of the field and also of the scholarly work of Professor Charnes Extremal methods and systems analysis has been a pioneering and systematic approach to the development and application of new scientific theories and methods for problems of management and operations in both the private and public sectors spanning all major disciplines
