Managers Managing Jane Hannaway, 1989 Managers face a complex and seemingly overwhelming set of decisions in their work lives Investigating exactly what managers do on the job this study presents a wealth of new evidence to analyze why managers act in the ways they do what influences their focus of attention and which issues and other actors in an organization they tend to find attractive and which they tend to avoid In short it describes how managers in the real world make decisions

The Work of Managers Stefan Tengblad, 2012-02-16 Managers are significant actors in contemporary organizations and yet there is very little deep level analysis of what managers do and how they understand their managerial selves and social situations Instead of evaluating management techniques according to their internal logic and systematic qualities this book advances the practice perspective using behaviour and activities of successful experienced and skilled managers as the primary data for theorizing good management In this book academics review classic literature on managerial work discuss methodological and theoretical approaches and present empirical studies on various kinds of managers at different levels of organizations in different roles and different sectors from construction site managers and CEOs of large companies to university vice chancellors and front line health care managers It makes the case for studies of managerial work that look beyond the rational and ordered world to the challenges presented by inter alia work and information overload complexity performance pressures unintended consequences and irreconcilable expectations

Managerial Work Rosemary Stewart, 2019-06-04 First published in 1998 readers of this volume will get a good overview of research into managerial work They will learn about what the researchers have studied what methods have been used and the criticisms of the limitations of individual methods the different concepts that have been developed what has been learnt about managerial work and behaviour from these studies over the years how this field of study has developed the main criticisms made of the research suggestions for future research and future developments Studies of managerial work have a long history the first major work was by Sune Carlson in Sweden in 1951 and studies have continued to the present day mainly in the USA and the UK The early studies sought to find out what managers actually did as distinct from the generalized theories of the nature of managerial work They were part of the new interest of social scientists in finding out what actually happened in organizations in opposition to the general theories that prevailed then Articles cannot give a complete picture of the field studies that have been such a notable feature of this branch of research because Carlson's study like many of the later ones was published only as a book However they provide all the information that students and

work its papers demonstrate the mutual relevance of social science and information system design and encourage better integration of these disciplines This comprehensive collection closely examines the variety of electronic tools being deployed to solve traditional problems in communication and coordination Unfortunately research shows that these tools have not been as successful as their designers had envisioned partially because they were not always produced with the needs and goals of their human users in mind The editors goal is to entice more social scientists to orient their research around questions of practical interest to information system designers and to convince designers to search for the knowledge about social and organizational behavior that would make their tools more useful
