

Managing Infections

- Infections, especially pneumonia, are common in clinical trials of ibrutinib (relapsed or refractory patients in the phase 1b study)
 - ≥grade 3 pneumonia in 25%
 - ≥grade 3 infection in 51%
- The infection rate has been reported to decline by more than half after 6 months of therapy
- Management:
 - Thorough workup – include opportunistic infections
 - Hold ibrutinib until clinically improving – fungal infections may require prolonged discontinuation
 - Use of prophylaxis for both VZV and PJP in any relapsed patient with CLL on therapy is recommended

Managing Difficult Infections

Sherif Beniamen Mossad

Managing Difficult Infections:

Managing Difficult Problems in Hand Surgery: Challenges, Complications and Revisions, An Issue of Hand Clinics, E-Book Sonu Jain, 2023-07-17 In this issue of Hand Clinics guest editor Dr Sonu Jain brings his considerable expertise to the topic of Managing Difficult Problems in Hand Surgery Challenges Complications and Revisions Top experts in the field provide solutions to overcome surgical challenges and restore hand function in patients with an up to date focus on particularly difficult issues in today's hand surgery Contains 18 practice oriented topics including management of complex hand and wrist ligament injuries challenges in nerve repair and reconstruction tendon transfers improving results decreasing complications infection management for the hand surgeon and more Provides in depth clinical reviews of managing difficult problems in hand surgery offering actionable insights for clinical practice Presents the latest information on this timely focused topic under the leadership of experienced editors in the field Authors synthesize and distill the latest research and practice guidelines to create clinically significant topic based reviews
