Inspiration from the Art of Paul J. Stankard Paul Joseph Stankard, 2021-09-28 This striking gift book features luminous photos of world renowned glass artist Paul Stankard's astonishing art paired with insightful writing for all who seek out and appreciate creative energy. Stunning full page photos of Stankard's paperweights show fascinating worlds bees captured in flight, botanically exact bouquets and miniature humanlike creatures are captured in bursting color. His unmatched technical skill is one half of what has made Stankard a master in glass art; the other half is his artistry which he explores his insights on sharing his thoughts about the energy behind the pieces. Stankard discusses key topics for all artists such as building a routine, learning from failure and fusing spirituality and artmaking. Stories of his own challenges and successes through the decades offer examples of how to navigate both with an open mind and readiness to learn. Collectors and aficionados of fine craft will enjoy this immersive experience in fine art and especially in what leads up to it. *No Green Berries Or Leaves* Paul Stankard, 2007 *No Green Berries or Leaves* is a collection of autobiographical essays by Paul J Stankard, recognized widely as one of the world's master glass artists. Stankard is particularly renowned and respected for his flameworked floral motifs expressed in crystal paperweights, rectangular columns and orbs. Stankard was trained in scientific glassblowing and worked in industrial scientific glass during most of the 1960s. Challenged by an inner sense of creativity and the need to establish his creative independence, he started making paperweights in the early 1970s. Attracted to the emerging studio glass movement, recognized as a maker of fine paperweights and driven by an intense and incessant pursuit of excellence, Stankard was by the 1980s recognized as a highly accomplished glass artist, a member of the pioneering generation of glass artists in America. As the emotional, intellectual and spiritual dimensions of his art matured and as he continued to develop new techniques for expressing his art, he also assumed more prominent influence in the development of educational programs and institutions that celebrated and expanded art in glass. Throughout his life, Stankard also wrestled with and learned how to succeed in spite of a learning disability, dyslexia. *No Green Berries or Leaves* presents the author's record of his life as a struggling then highly successful artist, reveals insights into the challenges he faced as a dyslexic and how he came to understand then circumvent his disability and records his perspectives on the history of the studio glass movement in America as he witnessed and experienced it during the past fifty years. This book will be of value to readers interested in the life of a major American artist and the history of the glass art movement in America as well as to those looking for an inspirational story of how one man faced, addressed and outwitted a learning disability and climbed the steep road to success to become a master artist in glass. **Paul J. Stankard** Ulysses Grant Dietz, 1996-09 Since childhood, nature has always been important to Paul Stankard, and now as the world's leading glass paperweight artist, this interest has become the defining signature of his work. Flowers such as roses, lilacs and orchids are depicted as are a host of fantasy flowers that the artist creates in his studio located in southern New Jersey. To look at a Stankard paperweight is to be momentarily fooled into

believing that the artist has preserved a living flower in glass when in fact he has created one entirely from spun filaments Words too play a role again reinforcing natural processes Here the artist creates mosaic word canes spelling out words like seed wet and scent to name a few which he then embeds in his floral creations A more complex application of Stankard's paperweight skill is the formation of what the artist calls botanicals which are upright cloistered glass objects sometimes in diptych and triptych formations In Paul Stankard Homage to Nature decorative arts curator Ulysses Grant Dietz writes with ease and affection about this gregarious immensely talented artist More than 180 photographs by fine arts photographer John Bigelow Taylor display close to 200 paperweights and botanicals made by Paul Stankard Also included are photographs showing the actual preparation and assembly of the flowers root people and insects encased in glass No other glass art book has ever shown a glass artist's process of creation as it is depicted here
