Regime Unchanged:

Evaluating Policy Regimes Ralph Bryant, Peter Hooper, Catherine L. Mann, 2010-12-01 Economists have long debated the theoretical merits for an individual nation and for a multi nation world economy of alternative approaches to the conduct of economic policy Yet theory alone cannot resolve the important issues at stake Only after the robustness of policy regimes has been carefully examined with empirical evidence will policymakers and economists be able to reach more of a consensus This pathbreaking volume takes major steps forward in meeting the need for a combination of theoretical and empirical evaluations of alternative policy regimes Bringing together individuals and groups doing pioneering research on macroeconomic interaction it explores what approach to monetary policy would lead to superior performance by individual national economies and the world economy as a whole Many parts of the book use the analytical techniques of stochastic simulation an evaluation procedure increasingly employed at the frontier of empirical economic analysis The book provides a summary of the key issues involved in evaluating policy regimes and clarifies the relationships among those issues The authors examine the stabilization properties of alternative monetary policy regimes and analyze how well various regime types perform in the face of unexpected shocks to national economies Among their conclusions they find that some simplified regimes for monetary policy are markedly less promising than others for achieving the stabilization objectives commonly sought by policymakers Evaluating Policy Regimes is another major installment in a continuing world wide research project sponsored by the Brookings Institution to improve empirical knowledge about the interdependence of national economies

Comparative Company Law Andreas Cahn, David C. Donald, 2018-10-04 When comparing the laws of different jurisdictions one often sees only the forest or the trees This is particularly problematic in comparative company law where students hope both to understand the overall framework of the law and grasp its practical application This text s structure now in its second edition solves that dilemma Chapters open with discursive analyses of the law in each of Germany the UK and the US Delaware the ABA Model Business Corporation Act and federal securities laws and set out the high level governing framework particularly for the EU and its member states This analysis is succinct and pointed with numerous references to both the law and leading scholarship The whole text is arranged to highlight comparative aspects Diagrams are used where helpful Chapters close with edited judicial decisions from at least two of the jurisdictions discussed which allows fresh exploration of comparison in more detail and pointed questions to guide class discussion

Varieties of Liberalism in Central America Forrest D. Colburn, Arturo Cruz S., 2009-06-03 Why do some countries progress while others stagnate Why does adversity strengthen some countries and weaken others Indeed in this era of unprecedented movement of people goods and ideas just what constitutes a nation state Forrest Colburn and Arturo Cruz suggest how fundamental these

questions are through an exploration of the evolution of Guatemala El Salvador Honduras Nicaragua and Costa Rica over the last quarter of a century a period of intriguing often confounding paradoxes in Central America's development Offering an elegant defense of empiricism Colburn and Cruz explore the roles of geography and political choice in constructing nations and states Countries are shown to be unique there are a daunting number of variables There is causality but not the kind that can be revealed in the laboratory or on the blackboard Liberalism today defined as democracy and unfettered markets may be in vogue but it has no inherent determinants Democracy and market economies when welded to the messy realities of individual countries are compatible with many different outcomes The world is more pluralistic in both causes and effects than either academic theories or political rhetoric suggest

Asia and Pacific Dept, 2018-10-12 Growth in the first half of 2018 was softer than in 2017 especially in advanced economies In contrast growth remained robust in emerging market economies and broadly in line with expectations After rising to 6.9 percent in 2017 growth in China continued to be strong into the first half of 2018 but has likely slowed since given the latest high frequency indicators including weakening investment growth In Japan after exceeding potential for two years growth dropped into negative territory in the first quarter of 2018 before rebounding sharply in the second quarter In India growth continues to recover steadily after the disruptions related to demonetization and the rollout of the goods and

services tax in the last fiscal year 1 And in ASEAN 4 economies Indonesia Malaysia the Philippines Thailand growth generally lost momentum in the first half of 2018 except in Thailand

Supreme Courts Under Pressure Pablo Bravo-Hurtado, Cornelis Hendrik van Rhee, 2021-03-13 This book discusses civil litigation at the supreme courts of nine jurisdictions Argentina Austria Croatia England and Wales France Germany Italy Spain and the United States and focuses on the available instruments used to keep the caseload of these courts within acceptable limits Such instruments are necessary in order to allow supreme courts to fulfil their main duties that is the administration of justice in individual cases private function and providing for the uniformity and development of the law within their respective jurisdictions public function If the number of cases at the supreme court level is too high the result is undue delays which are mainly problematic with regard to the private function It may also put the quality of the court s judgments under pressure which can affect its public and private function alike Thus measures aimed at avoiding excessive caseloads need to take both functions into account Increasing the capacity of the court to handle larger numbers of cases may result in the court being unable to adequately fulfil its public function since large numbers of court decisions make it difficult to guarantee the uniformity of the law and its development Therefore a balanced approach is needed to safeguard capacity and quality As shown by the contributions gathered here the nature of reform in this area is not the same everywhere There are a variety of reasons for this heterogeneity ranging from different understandings of the caseload problem itself local conceptions regarding the purpose of the Supreme Court and strong entitlements concerning the right to appeal to budgetary restrictions and extremely rigid legislation The book also shows that the implementation of similar solutions to case overload such as access filters may have different effects in different jurisdictions The conclusion might well be that the problem of overburdened courts is multifactorial and context dependent and that easy one size fits all solutions are hard to find and perhaps even harder to implement
