## **Regional Identity And Economic Change The Upper Rhine 1450 16:**

Regional Identity and Economic Change Tom Scott,1997 The current debate about the best methods of European organization central or regional is influenced by an awareness of regional identity which offers an alternative to the rigidities of organization by nation state Yet where does the sense of regionalism come from What are the distinctive factors that transform a geographical area into a particular region Tom Scott addresses these questions in this study of one apparently natural region the Upper Rhine between 1450 and 1600 This region has been divided between three countries and so historically marginalized yet Dr Scott is able to trace the existence of a sense of historical regional identity cutting across national frontiers founded on common economic interests But that identity was always contingent and precarious neither natural nor immutable

**The City-State in Europe, 1000-1600** Tom Scott,2012-02-09 No detailed comparison of the city state in medieval Europe has been undertaken over the last century Research has concentrated on the role of city states and their republican polities as harbingers of the modern state or else on their artistic and cultural achievements above all in Italy Much less attention has been devoted to the cities territorial expansion why how and with what consequences cities in the urban belt stretching from central and northern Italy over the Alps to Switzerland Germany and the Low Countries succeeded or failed in constructing sovereign polities with or without dependent territories Tom Scott goes beyond the customary focus on the leading Italian city states to include for the first time detailed coverage of the Swiss city states and the imperial cities of Germany He criticizes current typologies of the city state in Europe advanced by political and social scientists to suggest that the city state was not a spent force in early modern Europe but rather survived by transformation and adaption He puts forward instead a typology which embraces both time and space by arguing for a regional framework for analysis which does not treat city states in isolation but within a wider geopolitical setting

Regional Identity and Economic Change Tom Scott,1997 The debate about the best methods of European organization is influenced by an awareness of regional identity which offers an alternative to the rigidities of organization by nation state But where does this sense of regionalism come from This book explores this question and more

*European Cities and Towns* Peter Clark,2009-01-30 Since the Middle Ages Europe has been one of the most urbanized continents on the planet and Europe's cities have firmly stamped their imprint on the continent's economic social political and cultural life This study of European cities and towns from the fall of the Roman Empire to the present day looks both at regional trends from across Europe and also at the widely differing fortunes of individual communities on the roller coaster of European urbanization Taking a wide angled view of the continent that embraces northern and eastern Europe as well as the city systems of the Mediterranean and western Europe it addresses important debates ranging from the nature of urban survival in the post Roman era to the position of the European city in a globalizing world The book is divided into three parts dealing with the middle ages the early modern period and the nineteenth and twentieth centuries with each part containing chapters on urban trends the

urban economy social developments cultural life and landscape and governance Throughout the book addresses key questions such as the role of migration including that of women and ethnic minorities the functioning of competition and emulation between cities as well as issues of inter urban cooperation the different ways civic leaders have sought to promote urban identity and visibility the significance of urban autonomy in enabling cities to protect their interests against the state and not least why European cities and towns over the period have been such pressure cookers for new ideas and creativity whether economic political or cultural

**High Germans In The Low Countries** Donald J. Harreld, 2004-01-01 This volume looks at the South German merchant community during Antwerp's Golden Age by examining German involvement in the social life of the city as well as by tracing merchants commercial activities The first section of the book considers the institutions of trade and the role Germans played in their development and how Germans interacted with other foreign merchant communities The second section takes a wider view by tracing the commercial networks that South German merchants operated in and by quantifying South German participation in Antwerp's foreign trade

Town, Country, and Regions in Reformation Germany Tom Scott, 2005-04-01 This collection of essays covers relations between town and country regional economic systems and historical regional studies in late medieval and early modern Germany in particular how these bear upon social and religious change in the age of the Reformation Starting from case studies of South West Germany Switzerland and Alsace the essays broaden out to consider the formation of economic landscapes the development of urban territories and the survival of forms of serfdom throughout Germany as a whole While issues of economic and social structure take pride of place they are accompanied by analysis of regional mentalities and cultural identities as well With an Introduction by Tom Brady

*The Early Reformation in Germany* Tom Scott, 2016-03-23 Over the last twenty years research on the Reformation in Germany has shifted both chronologically and thematically toward an interest in the long or delayed Reformations and the structure and operation of the Holy Roman Empire Whilst this focus has resulted in many fascinating new insights it has also led to the relative neglect of the early Reformation movement Put together with the explicit purpose of encouraging scholars to reengage with the early storm years of the German Reformation this collection of eleven essays by Tom Scott explores several issues in the historiography of the early Reformation which have not been adequately addressed The debate over the nature and function of anticlericalism remains unresolved the mainsprings of iconoclasm are still imperfectly understood the ideological role of evangelical doctrines in stimulating and legitimising popular rebellion above all in the German Peasants War remains contentious while the once uniform view of Anabaptism has given way to a recognition of the plurality and diversity of religious radicalism Equally there are questions which initially broached have then been sidelined with undue haste the failure of Reforming movements in certain German cities or the perception of what constituted heresy in the eyes of the Reformers themselves and not least the part played by women in the spread of evangelical doctrines Consisting of seven essays previously published in scholarly journals and edited volumes together with

three new chapters and an historical afterword Scott's volume serves as a timely reminder of the importance of the early decades of the sixteenth century By reopening seemingly closed issues and by revisiting neglected topics the volume contributes to a more nuanced understanding of what the Reformation in Germany entailed **The Routledge Companion to Early Modern Europe, 1453-1763** Chris Cook, Philip Broadhead, 2012-10-02 This compact and highly accessible work of reference covers the broad sweep of events as Europe transformed during the period from the Renaissance to the Enlightenment This Companion examines the centuries that saw the Reformation and Counter Reformation the expansion of Europe and the beginnings of imperialism and enormous changes in the way government and kingship were conducted With a wealth of chronologies tables family trees and maps this handy book is an indispensable resource for all students and teachers of early modern history There and Back Stewart Gordon, 2018-01-25 Though travelling is lauded as a means of enriching our lives the emphasis is generally on the destination rather than the journey Yet throughout human history routes have ferried not just people but books scrolls and art in addition to armies ambassadorial entourages slaves brides and pilgrims The interaction of people on routes generated surprising innovations Through myths memoirs and songs associated with twelve such great routes across five continents historian Stewart Gordon shows how they captured the collective imagination and shaped the expectations of generations of would be travellers Associative Political Culture in the Holy Roman Empire Duncan Hardy, 2018-08-21 What was the Holy Roman Empire in the fourteenth to sixteenth centuries At the turning point between the medieval and early modern periods this vast Central European polity was the continent's most politically fragmented The imperial monarchs were often weak and distant while a diverse array of regional actors played an autonomous role in political life The Empire's obvious differences compared with more centralized European kingdoms have stimulated negative historical judgements and fraught debates which have found expression in recent decades in the concepts of fractured territorial states and a disjointed imperial constitution Associative Political Culture in the Holy Roman Empire challenges these interpretations through a wide ranging case study of Upper Germany the southern regions of modern day Germany plus Alsace Switzerland and western Austria between 1346 and 1521 By examining the interactions of princes prelates nobles and towns comparatively Associative Political Culture in the Holy Roman Empire demonstrates that a range of actors and authorities shared the same toolkit of technologies rituals judicial systems and concepts and configurations of government Crucially Upper German elites all participated in leagues alliances and other treaty based associations As frameworks for collective activity associations were a vital means of enabling and regulating warfare justice and arbitration and even lordship and administration On the basis of this evidence Associative Political Culture in the Holy Roman Empire offers a new and more coherent depiction of the Holy Roman Empire as a sprawling community of interdependent elites who interacted within the framework of a shared political culture *The Economic Consequences of the Dutch* Christiaan van Bochove, 2008 Between 1550 and 1800 the Northern Netherlands went through a period of intense

economic development This did not leave the surrounding regions untouched International trade blossomed tens of thousands of foreign workers found employment in the Netherlands and many millions of guilders were channelled abroad to finance foreign commercial undertakings and government policies This book offers the first systematic analysis of the international impact of Dutch economic development and investigates the economic consequences of Dutch dominance in the areas bordering the North Sea By using a wide variety of sources and literature Christiaan van Bochove describes the international flows of goods people and money focussing attention on the effects on the prices of everyday goods the wages of labourers and interest rates This book shows how by the end of the eighteenth century the development of the Dutch economy had turned the North Sea region into an integrated spatial economy that operated at the frontier of what was technologically and institutionally possible

**Absolute monarchy on the frontiers** Phil McCluskey, 2016-05-16 French territorial ambitions and consequent military activity during the reign of Louis XIV ensured that a number of territories bordering on France were subject to military occupation for strategic reasons from the 1660s onwards Drawing on extensive archival research this study presents the occupation of two of these territories Lorraine and Savoy from a comparative perspective It investigates the aims and intentions of the French monarchy in occupying these regions the problems of administering them and French relations with key local elite groups Absolute monarchy on the frontiers makes a significant contribution to understanding this crucial era in the development of civil military relations It also places the occupations of Lorraine and Savoy within the framework of recent scholarship on early modern border societies and frontiers and on the practice of absolutism at the frontiers of the French kingdom The book will appeal particularly to scholars and students of early modern France and Europe

*The Habsburg Empire: A Very Short Introduction* Martyn Rady, 2017-03-16 The Habsburgs are the most famous dynasty in continental Europe From the thirteenth to the twentieth centuries they ruled much of Central Europe and for two centuries were also rulers of Spain Through the Spanish connection they acquired lands around the Mediterranean and a chunk of the New World spreading eastwards to include the Philippines Reaching from South East Asia to what is now Ukraine the Habsburg Empire was truly global In this Very Short Introduction Martin Rady looks at the history of the Habsburgs from their tenth century origins in Switzerland to the dissolution of the Habsburg Empire in 1918 He introduces the pantheon of Habsburg rulers which included adventurers lunatics and at least one monarch who was so malformed that his true portrait could never be exhibited He also discusses the lands and kingdoms that made up the Habsburg Empire and the decisive moments that shaped their history Dynasty Europe global power and the idea of the multi national state all converge on the history of the Habsburg Empire ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

[The Peasants of Ottoheuren, 1487-1726](#)

Govind P. Sreenivasan, 2004-06-24 *The Peasants of Ottobeuren* offers an interesting perspective on one of the enduring problems of early modern European history the possibilities for economic growth and social change in rural society Based on the voluminous records of the Swabian Benedictine monastery of Ottobeuren this study underscores the limitations of the traditional narrative of a sixteenth century boom which foundered on the productive rigidities of the peasant economy and then degenerated into social crisis in the seventeenth century Population growth did strain resources at Ottobeuren but the peasantry continued to produce substantial agricultural surplus More importantly peasants reacted to demographic pressure by deepening their involvement in land and credit markets and more widely and aggressively marketing the fruits of their labour Marriage and inheritance underwent a similar process of commercialization which made heavy demands on the peasantry but which maintained a degree of social stability through the devastations of war plague and famine **Cinemas,**

**Identities and Beyond** D. H. Fleming, Cheung Ruby, 2020-07-13 *Cinemas Identities and Beyond* examines different modes of representing and constructing identities in and through the medium of film transcending the narrow confines of the local national regional and challenging spatial and temporal boundaries It gathers fifteen essays that explore different dimensions of identities in contexts ranging from domestic spheres urban milieus socio political environments diasporic film making issues anthropology film festivals and psychoanalysis to the examination of stardom in society Engaging with cinematic representations narrative conventions film form industry concerns and other socio cultural economic political factors relating to the production distribution exhibition and consumption of film *Cinemas Identities and Beyond* contributes to one of the most thought provoking contemporary debates on cinemas and identities in film studies Revisiting films such as *Farewell My Concubine* *The Matrix* trilogy *The Straight Story* *El Topo* and *Days of Being Wild* this anthology establishes a framework that actively queries stabilised ideological paradigms The book discovers new frontiers and discourses to help us better understand ourselves and our surroundings when another decade of the new millennium is about to begin *Cinemas Identities and Beyond* will prove to be of value to a broad range of scholars critics and students who are interested in issues pertaining to identities and their construction in and beyond film **Rethinking the Mediterranean** William Vernon Harris, 2005 This

text examines the ancient and medieval history of the Mediterranean Sea and the lands around it Provided by publisher

*Kings, Nobles and Commoners* Jeremy Black, 2004-09-24 Jeremy Black's revisionist history shows that both thrusting bourgeois Protestant states like the Netherlands and Britain prospered and in Britain's case became a global power The reactionary Catholic states like Austria and France at various times remained stable until the deluge of the French Revolution Absolutism was no myth but absolutist states still had to rule with consent Black weaves these themes into a rich and coherent tapestry to give a clear and authoritative picture of the complexities of the early modern period *Transregional and Transnational Families in Europe and Beyond* Christopher H. Johnson, David Warren Sabean, Simon Teuscher, Francesca Trivellato, 2011-08-01 While the current discussion of ethnic trade and commercial diasporas global networks and

transnational communities constantly makes reference to the importance of families and kinship groups for understanding the dynamics of dispersion few studies examine the nature of these families in any detail This book centered largely on the European experience of families scattered geographically challenges the dominant narratives of modernization by offering a long term perspective from the Middle Ages to the twenty first century Paradoxically transnational families are to be found long before the nation state was in place      *Fairs, Cities and Merchants* Jean-Louis Gaulin, Susanne Rau, 2025-03-31 Today it has largely been forgotten that fairs played a decisive role in trade and finance in pre modern Europe In the Middle Ages and Early Modern period many cities endeavoured to obtain a fair privilege and attract as many merchants as possible Through the economic activities and infrastructures provided a supra regional spatial configuration gradually emerged which was not only made up of places within a region but across the whole of Europe and in some cases the wider world The contributions in this volume are based on a project jointly funded by the French Agence Nationale de la Recherche and the German Research Foundation which focussed mainly on fairs and cities in France the Holy Roman Empire and Italy In chronological terms they cover the period from the end of the Champagne fairs ca 1320 to the success of the Besançon fairs ca 1580 to 1630 which epitomised a new type of fair The geographical focus has been extended to include fairs and trade routes in Eastern Europe and China temple fairs This overall view makes it possible for the first time to analyse the functions of the various market forms in their regional context and in their development from the exchange of goods to the credit market and financing government debt but also the deep integration of the merchant culture into urban and religious culture Based on archival studies and the integration of artefacts new graphs and maps this volume provides a new look at the history of annual markets and fairs In addition to functional aspects spatiotemporal aspects such as disputes over fair dates visiting rhythms the transport of goods and routes by land and water are dealt with Credit activities transport of goods and mobility of merchants trading families and companies point to the highly developed transnational dimension of pre modern trade The volume concludes with a presentation of the project database its functionalities and opportunities to participate      *A Companion to the Reformation World* R. Po-chia Hsia, 2008-04-15 This volume brings together 29 new essays by leading international scholars to provide an inclusive overview of recent work in Reformation history Presents Catholic Renewal as a continuum of the Protestant Reformation Examines Reformation in Eastern and Western Europe Asia and the Americas Takes a broad inclusive approach covering both traditional topics and cutting edge areas of debate
