**Regionalism in the Age of Globalism, Volume 2** Lothar Hönnighausen, James Peacock, Anke Ortlepp, Niklaus Steiner, 2005 This two volume set *Regionalism in an Age of Globalism* examines the concept of region and regionalism in today's rapidly shrinking world Building on the insights of a diverse group of scholars the first volume *Concepts of Regionalism* showcases the wide range of theories and methods that are being applied to regionalism today in the humanities and social sciences Despite these differences many common themes emerge most importantly that regions are social and cultural constructs The second volume *Forms of Regionalism* expands on these themes by presenting concrete examples of regionalism Case studies explore regionalism in literature governmental policy architecture and other fields in areas as diverse as the American South Pacific Northwest Eastern Europe and the Canadian North

*Grounded Globalism* James L. Peacock, 2010-04-01 The world is flat Maybe not says this paradigm shifting study of globalism's impact on a region legendarily resistant to change The U S South long defined in terms of its differences with the U S North is moving out of this national and oppositional frame of reference into one that is more international and integrative Likewise as the South home to UPS CNN KFC and other international brands goes global people are emigrating there from countries like India Mexico and Vietnam and becoming southerners Much has been made of the demographic and economic aspects of this shift Until now though no one has systematically shown what globalism means to the southern sense of self Anthropologist James L. Peacock looks at the South of both the present and the past to develop the idea of grounded globalism in which global forces and local cultures rooted in history tradition and place reverberate against each other in mutually sustaining and energizing ways Peacock's focus is on a particular part of the world however his model is widely relevant Some kind of grounding in locale is necessary to human beings *Grounded Globalism* draws on perspectives from fields as diverse as ecology anthropology religion and history to move us beyond the model advanced by such scholars as C Vann Woodward that depicts the South as a region paralyzed by the burden of its past Peacock notes that while globalism may lift old burdens it may at the same time impose new ones He also maintains that earlier regional identities have not been replaced by the rootless cosmopolitanism of cyberspace or other abstracted systems Attachments to place remain even as worldwide markets erase boundaries and flatten out differences and distinctions among nations Those attachments exert their own pressures back on globalism says Peacock with subtle strengths we should not discount
