Regions That Work How Cities And Suburbs Can Grow Together:

Regions That Work Manuel Pastor, 2000 Governing Urban Regions Through Collaboration Joël Thibert, 2016-04-22

With the demise of the Old Regionalist project of achieving good regional governance through amalgamation voluntary collaboration has become the modus operandi of a large number of North American metropolitan regions. Although many researchers have become interested in regional collaboration and its determinants few have specifically studied its outcomes. This book contributes to filling this gap by critically re-evaluating the fundamental premise of the New Regionalism which is that regional problems can be solved without regional higher government. In particular this research asks to what extent does regional collaboration have a significant independent influence on the determinants of regional resilience. Using a comparative Canada U S mixed method approach with detailed case studies of the San Francisco Bay Area the Greater Montreal and trans national Niagara Buffalo regions the book examines the direct and indirect impacts of inter local collaboration on policy and policy outcomes at the regional and State Provincial levels. The book research concentrates on the effects of bottom up state mandated and functional collaboration and the moderating role of regional awareness higher governmental initiative and civic capital on three outcomes environmental preservation socio economic integration and economic competitiveness. In short the book seeks to highlight those conditions that favor collaboration and might help avoid the collaborative trap of collaboration for its own sake. More specifically this research concentrates on the effect of bottom up state mandated and functional collaboration the moderating role of regional awareness governmental initiative and civic capital on environmental preservation socio economic integration and economic competitiveness. In short the book seeks to understand whether and how urban regional collaboration contributes to regional resilience.

Neighborhood Decline Ronald van Kempen, Gideon Bolt, Maarten van Ham, 2018-10-18 The global financial and economic crisis that hit the world since 2008 has affected the lives of many people all over the world and resulted in declining incomes rising unemployment foreclosures forced residential moves and cut backs in government expenditure The extent to which the crisis has affected urban neighborhoods and has led to rising intra urban inequalities has not yet received much attention The implemented budget cuts and austerity programs of national and local governments are likely to have hit some neighborhoods more than others The authors of this this book which come from a variety of countries and disciplines show that the economic crisis has affected poor neighborhoods more severely than more affluent ones The tendency of the state to retreat from these neighborhoods has negative consequences for their residents and may even nullify the investments that have been made in many poor neighborhoods in the recent past This book was originally published as a special issue of Urban Geography

The Routledge International Handbook of the Sociology of Education Michael W. Apple, Stephen J. Ball, Luis Armando Gandin, 2009-12-16 This collection brings together many of the world's leading sociologists of education to explore and address key issues and concerns within the discipline The thirty seven newly commissioned chapters draw upon theory and research to provide new accounts of contemporary educational processes global trends and changing and enduring forms of social conflict and social inequality The research conducted by leading international scholars in the field indicates that two complexly interrelated agendas are discernible in the heat and noise of educational change over the past twenty five years The first rests on a clear articulation by the state of its requirements of education The second promotes at least the appearance of greater autonomy on the part of educational institutions in the delivery of those requirements The Routledge International Handbook of the Sociology of Education examines the ways in which the sociology of education has responded to these two political agendas addressing a range of issues which cover three key areas perspectives and theories social processes and practices inequalities and resistances The book strongly communicates the vibrancy and diversity of the sociology of education and the nature of sociological work in this field It will be a primary resource for teachers as well as a title of major interest to practising sociologists of education

Life in Poverty Neighbourhoods Jürgen Friedrichs, George Galster, Sako Musterd, 2013-09-13 In contemporary European and American urban policy and politics and in academic research it is typically assumed that spatial concentrations of poor households and or ethnic minority households will have negative effects upon the opportunities to improve the social conditions of those who are living in these concentrations Since the level of concentration tends to be correlated with the

level of spatial segregation the debate on segregation is also linked to the social opportunity discussion This book explores the central questions in urban and housing studies Do poor neighbourhoods make their residents poorer Does the neighbourhood structure exert an effect on the residents behavioural attitudinal or psychological even when controlling for individual characteristics of the residents This issue has offered a locus for multi disciplinary investigations on both sides of the Atlantic and this volume demonstrates the rich geographical sociological economic and psychological dimensions of this issue This book was previously published as a special issue of the journal Housing Studies
