**Roger of Salisbury, Viceroy of England** Edward J. Kealey, 2023-11-15 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1972 The Foundations of Medieval English Ecclesiastical History Philippa M. Hoskin, Christopher Nugent Lawrence Brooke, Richard Barrie Dobson, 2005 Contributions on fundamental aspects of medieval ecclesiastical history demonstrating the importance of primary documents The work of historians in providing new editions of primary documents and other aids to research has tended to go largely unsung yet is crucial to scholarship as providing the very foundations on which further enquiry can be based The essays in this volume conversely celebrate the achievements in this field by a whole generation of medievalists of whom the honoree David Smith is one of the most distinguished They demonstrate the importance of such editions to a proper understanding and elucidation of a number of problems in medieval ecclesiastical history ranging from thirteenth century forgery to diocesan administration from the church courts to the cloisters and from the English parish clergy to the papacy Contributors CHRISTOPHER BROOKE C C WEBB JULIA BARROW NICHOLAS BENNETT JANET BURTON CHARLES FONGE CHRISTOPHER HARPER BILL R H HELMHOLZ PHILIPPA HOSKIN BRIAN KEMP F DONALD LOGAN ALISON MCHARDY **Bishops, Clerks, and Diocesan Governance in Thirteenth-Century England** Michael Burger, 2012-10-22 This book investigates how bishops deployed reward and punishment to control their administrative subordinates in thirteenth century England Bishops had few effective avenues available to them for disciplining their clerks and rarely pursued them preferring to secure their service and loyalty through rewards The chief reward was the benefice often granted for life Episcopal administrators security of tenure in these benefices however made them free agents allowing them to transfer from diocese to diocese or even leave administration altogether they did not constitute a standing episcopal civil service This tenuous bureaucratic relationship made the personal relationship between bishop and clerk more important Ultimately many bishops communicated in terms of friendship with their administrators who responded with expressions of devotion Michael Burger's study brings together ecclesiastical social legal and cultural history producing the first synoptic study of thirteenth century English diocesan administration in decades His research provides an ecclesiastical counterpoint to numerous studies of bastard feudalism in secular contexts **Gender and Authority in the Late Medieval Church** Ian Forrest, 2025-06-15 Gender and Authority in the Late Medieval Church asks a deceptively simple question How did the governance of the medieval institutional church remain exclusively male despite plentiful evidence of women being as capable and devout as men The remarkable endurance of an all male clergy is an important element of medieval church government one that is frequently taken for granted in the historiography and is connected to another overlooked feature of

episcopal authority the strategies that bishops used to secure the compliance of a relatively autonomous clergy As Ian Forrest shows bishops kept their clergy in check through normative standards of masculinity that necessarily disqualified women from leadership roles Everywhere in the medieval church were women who had the capacity the resources and often the ambition to take part in governance from abbesses to priests servants mothers sisters and unofficial wives Bringing together evidence of female activity at the margins of the institutional church Forrest argues that the male monopoly on formal power was haunted by female capability and aspiration at every turn Drawing on case studies from the English diocesan clergy between the mid thirteenth and early sixteenth centuries he explores how women s involvement in governance was rendered unthinkable through the very discursive strategies that bishops used to control their male clergy In doing so *Gender and Authority in the Late Medieval Church* tells an integrated history that explains how both the exclusion of women and the inclusion of men underpin a rigidly gendered system of religious governance

The History of Courts and Procedure in Medieval Canon Law Wilfried Hartmann, Kenneth Pennington, 2016-09-09 By the end of the thirteenth century court procedure in continental Europe in secular and ecclesiastical courts shared many characteristics As the academic jurists of the *Ius commune* began to excavate the norms of procedure from Justinian's great codification of law and then to expound them in the classroom and in their writings they shaped the structure of ecclesiastical courts and secular courts as well These essays also illuminate striking differences in the sources that we find in different parts of Europe In northern Europe the archives are rich but do not always provide the details we need to understand a particular case In Italy and Southern France the documentation is more detailed than in other parts of Europe but here too the historical records do not answer every question we might pose to them In Spain detailed documentation is strangely lacking if not altogether absent Iberian conciliar canons and tracts on procedure tell us much about practice in Spanish courts As these essays demonstrate scholars who want to peer into the medieval courtroom must also read letters papal decretals chronicles conciliar canons and consilia to provide a nuanced and complete picture of what happened in medieval trials This volume will give sophisticated guidance to all readers with an interest in European law and courts

**Plantagenet Ancestry: A Study In Colonial And Medieval Families, 2nd Edition, 2011 ,      **The Making of the Neville Family in England, 1166-1400**** Charles R. Young,1996 A study of power in the middle ages the Nevilles of Raby who included among their members Warwick the Kingmaker was one of the major baronial families in England The story of the Neville family is a fascinating one From their inconspicuous beginnings in Lincolnshire after the Norman Conquest by the fourteenth century the Nevilles of Raby were among the most influential groups in the north of England virtually ruling the area by means of the royal offices they held and their political power reached its zenith in the fifteenth century with Richard de Neville earl of Warwick the so called Kingmaker This new study aims to answer the question of how a family of knightly status but with no special prominence was able to rise to such heights tracing its growth and development through a careful examination of surviving documents it also illustrates how the governance of medieval England worked with the cooperation of baronial families in a pragmatic manner quite apart from any abstract legal or constitutional principles CHARLES R YOUNG is Professor Emeritus of History at Duke University
