## **Regulated Enterprise:**

**Regulated Enterprise** Christopher James Castaneda, 1993 Christopher Castaneda's study of the construction of the pipelines that transported southwestern gas to the Northeast traces the ways in which the federal regulatory process fostered competitive growth in the natural gas industry. In 1938 the Natural Gas Act granted the Federal Power Commission jurisdiction over the interstate transmission and sale of natural gas. The FPC used its new powers to guide shape and manage an intensely competitive period in the industry. As Castaneda shows, aggressive and politically astute entrepreneurs based in the Southwest took advantage of economic opportunity and a regulatory environment conducive to industry growth. They financed and built the nation's longest gas pipelines to connect the massive southwestern reserves with the major northern energy markets. The coal industry, which supplied the raw product for manufactured gas and the railroad industry, which transported the coal adamantly but unsuccessfully opposed the action and attempted to halt the introduction of natural gas into their northeastern markets. First during the war years, emergency regulatory agencies directed the expansion of the industry into Appalachia. Then in the ensuing peacetime, market forces prompted entrepreneurs to compete vigorously for regulatory approval to build pipelines to sell natural gas in the Northeast. While previous studies have examined the development of the natural gas industry after 1954 when the Supreme Court's Phillips decision established the FPC as a regulator of price control rather than as a manager of industrial growth, Castaneda's is the first to examine this earlier entrepreneurial era. Based on exhaustive research in corporate records and government documents, *Regulated Enterprise* offers a case study of government business relations during a period of rapid industrial expansion and suggests a new way of looking at federal regulation and competitive growth.

BOOK JACKET Title Summary field provided by Blackwell North America Inc. All Rights Reserved. *One-bank Holding Company Legislation of 1970* United States. Congress. Senate. Committee on Banking and Currency, 1970. *Commercialization of Postal and Delivery Services: National and International Perspectives* Michael A. Crew, Paul R. Kleindorfer, 2012-12-06 xiii We have almost the cheapest letter price in the OECD. We've quadrupled the retail outlets where you can buy stamps but closed three quarters of our Post Offices. On-time delivery is better than 97%. The workforce has been reduced by 40% with a 25% increase in volumes over the period. Real unit costs measured by total real expenditure divided by total volumes have been reduced by over 20%. What do these results and achievements mean for policy setters around the world? In particular, do these results for New Zealand Post prove that it is a commercial business and what are the lessons for other postal businesses? Market Forces New Zealand Post presently has a limited letter monopoly, a 45-cent letter price against an 80-cent competitive floor price. The existence of this level of protection somehow negates the company's commercial achievements. The combination of high efficiency and low prices cannot persuade everyone that the results are not my view are the only ones that can solely monopoly-driven. Market forces in answer my question is New Zealand Post a commercial organization. We need the test of free and open competition to see

whether we've got the business formula right Before advancing this argument which in essence is the case for deregulation it may be useful to distinguish between market behavior and Post behavior      **Pricing and Price Regulation D.**

Bös,2015-12-04 This clear precisely written text presents an important branch of the modern micro economically based theory of industrial organization and of public finance utilizing calculus only Answers are provided to some pertinent economic questions such as the pricing policies of vote seeking politicians of empire building bureaucrats and of out put maximizing and energy saving public utilities These policies are compared with the welfare economic benchmark rules e g on marginal cost pricing and Ramsey pricing Great significance is attached to price regulation The book elucidates the recent replacement of rate of return regulation by price cap regulation It also explains why many simple rules like yardstick regulation fail to achieve optimal prices which shows how complicated it is to induce managers to truthfully reveal their private information How this can be achieved properly is shown in various principal agent models on regulation with uncertain costs uncertain demand and with soft budget constraints      **Poland Privatization Programs and Regulations**
