## **Reinventing Public Education:**

**Reinventing Public Education** Paul Hill, Lawrence C. Pierce, James W. Guthrie, 1997-06 A heated debate is raging over our nation's public schools and how they should be reformed with proposals ranging from imposing national standards to replacing public education altogether with a voucher system for private schools Combining decades of experience in education the authors propose an innovative approach to solving the problems of our school system and find a middle ground between these extremes Reinventing Public Education shows how contracting would radically change the way we operate our schools while keeping them public and accessible to all and making them better able to meet standards of achievement and equity Using public funds local school boards would select private providers to operate individual schools under formal contracts specifying the type and quality of instruction In a hands on concrete fashion the authors provide a thorough explanation of the pros and cons of school contracting and how it would work in practice They show how contracting would free local school boards from operating schools so they can focus on improving educational policy how it would allow parents to choose the best school for their children and finally how it would ensure that schools are held accountable and academic standards are met While retaining a strong public role in education contracting enables schools to be more imaginative adaptable and suited to the needs of children and families In presenting an alternative vision for America's schools Reinventing Public Education is too important to be ignored

Hill, Ashley E. Jochim, 2015 This study focuses on governance of K 12 public schools Governance the work of institutions that set the rules under which schools must operate can protect children and prevent misuse of public funds but it can also prevent teachers and principals from doing their best for children There are proposals to simplify governance changing by giving control to mayors eliminating elected school boards or eliminating local oversight entirely This book approaches governance from a new angle who governs is less important than what powers government has     Pluralism and American Public Education Ashley Rogers Berner, 2016-11-11 This book argues that the structure of public education is a key

factor in the failure of America's public education system to fulfill the intellectual civic and moral aims for which it was created The book challenges the philosophical basis for the traditional common school model and defends the educational pluralism that most liberal democracies enjoy Berner provides a unique theoretical pathway that is neither libertarian nor state focused and a pragmatic pathway that avoids the winner takes all approach of many contemporary debates about education For the first time in nearly one hundred fifty years changing the underlying structure of America's public education system is both plausible and possible and this book attempts to set out why and how **Cut to the Chase**, 2007

Reinventing Public Education in America Benno C. Schmidt, New Zealand Business Roundtable, 2004-01-01 **Charter Schools and Accountability in Public Education** Paul T. Hill, Robin J. Lake, 2004-05-13 Charter schools are among the most debated and least understood phenomena in American education today At the heart of these matters is a contested question of accountability To survive charter schools must make and keep promises about what students will experience and learn under their purview However unlike public schools charter schools do not rely exclusively on their relationship with school districts They must also look to parents teachers and donors to cooperatively establish expectations of a particular school and its mission Aimed toward elected officials school reform activists and educators this book is the result of the first national scale study of charter school accountability The authors researched one hundred fifty schools and sixty authorizing agencies in Arizona California Colorado Georgia Massachusetts and Michigan These states contain the majority of charter schools that have been operating for three years or more and represent the major differences in state charter school legislation The authors include interviews from a range of participants in the field from state legislators and administrators to principals teachers and parents In assessing the structure of accountability as it works internally to bolster external confidence Hill and Lake suggest the struggle of charter schools actually complements those of standards based reform Both seek to transform public education to make schools responsible for performance not compliance *Failure of Corporate School Reform* Kenneth J. Saltman, 2015-11-17 Corporate school reforms especially privatization union busting and high stakes testing have been hailed as the last best hope for public education Yet as Kenneth Saltman powerfully argues in this new book corporate school reforms have decisively failed to deliver on what their proponents have promised for two decades higher test scores and lower costs As Saltman illustrates the failures of corporate school reform are far greater and more destructive than they seem Left unchecked corporate school reform fails to challenge and in fact worsens the most pressing problems facing public schooling including radical funding inequalities racial segregation and anti intellectualism But it is not too late for change Against both corporate school reformers and its liberal critics this book argues for the expansion of democratic pedagogies and a new common school movement that will lead to broader social renewal **From Reopen to Reinvent** Michael B. Horn, 2022-06-10 A practical blueprint to rebuilding an education system that is no longer working for its students In *From Reopen to Reinvent* distinguished education strategist Michael B Horn delivers a provocative and eye

opening call to action for the overthrow of an education system that is not working well for any of its students Grounded in what educators should build in its place to address the challenges that stem from widespread unmet learning needs the book walks readers through the design of a better path forward Using time tested leadership and innovation frameworks like Jobs to Be Done Begin with the End tools of cooperation threat rigidity and discovery driven planning From Reopen to Reinvent offers a prescriptive and holistic approach to the purpose of schooling the importance of focusing on mastery for each student and the ideal use of technology It also provides readers with A set of processes and ideals that schools should implement to deal with the challenges they presently face A way to transform threats into opportunities using threat rigidity research A discussion of how the COVID 19 pandemic revealed that schools are not as flexible and equitable as we need them to be Perfect for K 12 educators and parents and school board members involved in the school community From Reopen to Reinvent is also an essential resource for professionals working in education related non profits and state education agencies

*Understanding the Power and Politics of Public Education* Janet Mulvey, Bruce S. Cooper, 2016-10-03 Understanding the Power and Politics of Public Education researches the history and trends of educating the populace in the United States Demographic changes and socio economic diversity have altered the needs for traditional approaches Policy makers are implored to become familiar with proven educational research to implement policies that service the needs of all youth Public schools now enroll more minority students than ever before Diverse languages cultures and experiences call for pedagogy to meet the needs and educational success for new citizens Teacher training programs in colleges and universities along with new curricula are in need of revision to promote educational success of new generations Understanding the role of experiential background and its influence on educational success and social mobility is necessary for a healthy society and democracy This book examines statistical studies showing the impact of environmental issues on cognitive development and illustrates the educational outcome and effects of poverty through documented research in areas of health care nutrition pollution community and family experiences It also explores the role of family socio economic status and compares the educational readiness of the more and less affluent

*Choices and Challenges* Priscilla Wohlstetter, Joanna Smith, Caitlin C. Farrell, 2013-03-01 As charter schools enter their third decade research in this key sector remains overwhelmingly contradictory and confused Many studies are narrowly focused some do not meet the standards for high quality academic research In this definitive work Wohlstetter and her colleagues isolate and distill the high quality research on charter schools to identify the contextual and operational factors that influence these schools performances The authors examine the track record of the charter sector in light of the wide range of goals set for these schools in state authorizing legislation at the classroom level the level of the school community and system wide In particular they show how the evolution of the charter movement has shaped research questions and findings By highlighting what we know about the conditions for success in charter schools the authors make a significant contribution to current debates in policy and practice both within the charter

sector and in the larger landscape of public education
