Gregory Bateson on Relational Communication: From Octopuses to Nations Phillip Guddemi, 2020-10-03 This book develops Gregory Bateson's ideas regarding communication about relationship in animals and human beings and even nations It bases itself on Bateson's theory of relational communication as he described it in the zoosemiotics of octopus mammals birds and human beings This theory includes for example the roles of metaphor play analog and digital communication metacommunication and Laws of Form It is organized around a letter from Gregory Bateson to his fellow cybernetic thinker Warren McCulloch at the time of the Cuban Missile Crisis In this letter Bateson argued that what we would today call zoosemiotics including Bateson's own previously unpublished octopus research should be made a basis for understanding the relationship between the two blocs of the Cold War Accordingly the book shows how Bateson understood interactive processes in the biosemiotics of conflict and peacemaking which are analyzed using examples from recent animal studies from primate studies and from cultural anthropology The Missile Crisis itself is described in terms

of Bateson's critique of game theory which he felt should be modified by an understanding of the zoosemiotics of relational communication. The book also includes a previously unpublished piece by Gregory Bateson on wolf behavior and metaphor abduction.

A complete subject index has been added. The book also features a new accompanying Instructor's Manual. Relational Communication L. Edna Rogers, Valentin Escudero, 2014-03-05. Relational Communication: An Interactional Perspective to the Study of Process and Form brings together in one volume a full treatment of the relational communication perspective on the study of relationships. This perspective takes to heart the formative nature of communication by focusing on the codefined patterns of interaction by which members jointly create their relationship. This book provides a strong theoretical foundation to the research approach and also offers a step-by-step guide for carrying out the research procedures. It is a complete guide for the beginner or experienced researcher. The contributed chapters are written by researchers from psychology, clinical psychology, marital and family therapy, as well as marital health and organizational communication. Several of the studies on marital interaction are based on both American and Spanish research samples, offering a cross-disciplinary and cross-cultural application of the perspective. Part I opens with a discussion of the theoretical foundation and epistemological grounding of the perspective and then moves on to the observational research methods involved in applying the perspective's interactional approach. Part II presents a set of programmatic research exemplars that describe the application of the relational communication approach in different relational contexts, from marital to organizational settings. Part III offers a reflective overview of the research perspective. This book is appropriate for advanced undergraduate and graduate students, scholars, and researchers in communication. It will also be of interest to professionals, students, teachers, and researchers in the fields of marital relations and family study, social and clinical psychology, family therapy, social work, and marital and family counseling programs.
