Deep Learning with R for Beginners Mark Hodnett, Joshua F. Wiley, Yuxi (Hayden) Liu, Pablo Maldonado, 2019-05-20

Explore the world of neural networks by building powerful deep learning models using the R ecosystem

Key Features

- Get to grips with the fundamentals of deep learning and neural networks
- Use R 3.5 and its libraries and APIs to build deep learning models for computer vision and text processing
- Implement effective deep learning systems in R with the help of end-to-end projects

Description

Deep learning finds practical applications in several domains while R is the preferred language for designing and deploying deep learning models. This Learning Path introduces you to the basics of deep learning and even teaches you to build a neural network model from scratch. As you make your way through the chapters you will explore deep learning libraries and understand how to create deep learning models for a variety of challenges right from anomaly detection to recommendation systems. The book will then help you cover advanced topics such as generative adversarial networks (GANs), transfer learning and large scale deep learning in the cloud in addition to model optimization, overfitting and data augmentation. Through real world projects you will also get up to speed with training convolutional neural networks (CNNs), recurrent neural networks (RNNs) and long short term memory networks (LSTMs) in R. By the end of this Learning Path you will be well versed with deep learning and have the skills you need to implement a number of deep learning concepts in your research work or projects. This Learning Path includes content from the following Packt products:

- R Deep Learning Essentials** Second Edition by Joshua F. Wiley and Mark Hodnett
- R Deep Learning Projects** by Yuxi Hayden Liu and Pablo Maldonado

What you will learn

- Implement credit card fraud detection with autoencoders
- Train neural networks to perform handwritten digit recognition using MXNet
- Reconstruct images using variational autoencoders
- Explore the applications of autoencoder neural networks in clustering and dimensionality reduction
- Create natural language processing (NLP) models using Keras and TensorFlow in R
- Prevent models from overfitting the data to improve generalizability
- Build shallow neural network prediction models

Who this book is for

This Learning Path is for aspiring data scientists, data analysts, machine learning developers and deep learning enthusiasts who are well versed in machine learning concepts and are looking to explore the deep learning paradigm using R. A fundamental understanding of R programming and familiarity with the basic concepts of deep learning are necessary to get the most out of this Learning Path.

Social Media Risk and the Law Susan Grantham, Mark Pearson, 2021-09-14

Social media has many advantages for professional communication but it also carries considerable risks including legal pitfalls. This book equips students and communication professionals with the knowledge and skills to help minimise the risks that can arise when they post or host on social media. It offers them strategies for taking advantage of the opportunities of social media while also navigating the ethical, legal and organisational risks that can lead to audience outrage, brand damage, expensive litigation and communication crises. The book uses stakeholder theory and risk analysis.
