Syntactic Parsing Strategies in Italian M. de Vincenzi, 2012-12-06 From NP to DP: The syntax and semantics of noun phrases Martine Coene, Yves d' H. Hulst, 2003-01-01 This is the first of a two volume selection of refereed and revised papers originally presented at the international conference From NP to DP at the University of Antwerp The papers address issues in the syntax and semantics of the noun phrase in particular the so called DP hypothesis which takes noun phrases to be headed by a functional head D terminator The major concerns can be grouped around 3 subthemes the internal syntax of noun phrases the syntax and semantics of bare nouns and indefinites and the expression of measurement in noun phrases The wealth of data coming from over 40 different languages combined with a thorough introduction to the current issues in the field of NPs DPs and some alternative syntactic and semantic analyses provide a comprehensive reference work from both a descriptive and a theoretical point of view The second volume is concerned exclusively with the expression of possession in noun phrases *Clitics in the Languages of Europe* Henk van Riemsdijk, 2011-03-01 No detailed description available for Clitics in the Languages of Europe Syntactic Nuts Peter W. Culicover, 1999 This book investigates the architecture of the language faculty by considering what the properties of language reveal about the mental abilities and processes involved in language acquisition The language faculty the author argues must be able not only to accommodate what is general exceptionless and universal in language but must also be capable of dealing with what is irregular exceptional and idiosyncratic In Syntactic Nuts Peter Culicover shows that this is true not only of the lexicon but for syntax Marginal and exceptional cases where there is no straightforward form meaning correspondence are dealt with by the language faculty easily and precisely as the general cases In considering how and why this should be the author argues against the prevailing trend in generative grammar which takes the learner as either incorporating maximally global generalisations as part of its innate capacity for language or projecting global generalisations from a very limited input on the basis of innate mechanisms He suggests that the learning mechanism does not generalize significantly beyond the evidence presented to it and further that it seeks to form generalizations based on all and only the evidence presented to it Syntactic Nuts makes a fundamental contribution to generative grammar and syntactic theory It situates syntactic theory within cognitive science in a novel way It contributes to an alternative and yet in many ways traditional perspective on the manner in which knowledge is represented and processed in the mind **German and Dutch in Contrast** Gunther Vogelaer, Dietha Koster, Torsten Leuschner, 2020-03-09 Designed as a contribution to contrastive linguistics the present volume brings up to date the comparison of German with its closest neighbour Dutch and other Germanic relatives like English Afrikaans and the Scandinavian languages It takes its inspiration from the idea of a Germanic Sandwich i.e. the hypothesis that sets of genetically related languages diverge in systematic ways in diverse domains of the linguistic system Its contributions set out to test this approach against new phenomena or data from synchronic diachronic and for the first

time in a Sandwich related volume psycholinguistic perspectives With topics ranging from nickname formation to the IPP aka Ersatzinfinitiv from the grammaticalisation of the definite article to s retraction and from the role of verb second order in the acquisition of L2 English to the psycholinguistics of gender the volume appeals to students and specialists in modern and historical linguistics psycholinguistics translation studies language pedagogy and cognitive science providing a wealth of fresh insights into the relationships of German with its closest relatives while highlighting the potential inherent in the integration of different methodological traditions *What Darwin Got Wrong* Jerry Fodor, Massimo

Piattelli-Palmarini, 2011-02-24 Jerry Fodor and Massimo Piattelli Palmarini a distinguished philosopher and scientist working in tandem reveal major flaws at the heart of Darwinian evolutionary theory They do not deny Darwin s status as an outstanding scientist but question the inferences he drew from his observations Combining the results of cutting edge work in experimental biology with crystal clear philosophical argument they mount a devastating critique of the central tenets of Darwin s account of the origin of species The logic underlying natural selection is the survival of the fittest under changing environmental pressure This logic they argue is mistaken They back up the claim with evidence of what actually happens in nature This is a rare achievement the short book that is likely to make a great deal of difference to a very large subject *What Darwin Got Wrong* will be controversial The authors arguments will reverberate through the scientific world At the very least they will transform the debate about evolution **Licensing Theory and French Parasitic Gaps** C.R. Tellier, 2012-12-06

The study of parasitic gap constructions e.g. these are the reports which you corrected _ before filing _ i has been a very lively area of research over the last decade The impetus behind this lies mostly in the marginality of the construction Clearly the intuitions that native speakers have about parasitic gaps do not stem from direct instruction hence it is reasoned such knowledge follows from the restrictions imposed by Universal Grammar Furthermore it is unlikely that any principle of Universal Grammar refers specifically to parasitic gap constructions their syntactic and interpretive properties must instead follow entirely from independent principles My own interest in the phenomenon was sparked a few years ago when in a novel I came across a sentence like the following Chait un armateur dont le prestige _ reposait largement sur la fortune _ he was a shipbuilder of whom the prestige was largely based on the wealth As the indices indicate the interpretation of the French sentence is unambiguous both the prestige and the wealth necessarily pertain to the same individual In this aspect the sentence much resembles the English parasitic gap construction above in the former case too the complements of correct and file must corefer with the noun phrase heading the relative the reports Yet there is an important difference between the two constructions Verbs like correct and file subcategorize their complements **LRC**, 1997 **Descriptive and**

The Equilibrium of Human Syntax Andrea Moro, 2013-09-13 This book assembles a collection of papers in two different domains formal syntax and neurolinguistics Here Moro provides evidence that the two fields are becoming more and more interconnected and that the new fascinating empirical questions and results in the latter field cannot be obtained without the theoretical base provided by the former The book is organized in two parts Part 1 focuses on theoretical and empirical issues in a comparative perspective including the nature of syntactic movement the theory of locality and a far reaching and influential theory of copular sentences Part 2 provides the original sources of some innovative and pioneering experiments based on neuroimaging techniques focusing on the biological nature of recursion and the interpretation of negative sentences Moro concludes with an assessment of the impact of these perspectives on the theory of the evolution of language The leading and pervasive idea unifying all the arguments developed here is the role of symmetry breaking in syntax and in the relationship between language and the human brain

Covert Modality in Non-finite Contexts Rajesh Bhatt, 2008-08-22 This book investigates the distribution and interpretation of Covert Modality Covert Modality is modality which we interpret but which is not associated with any lexical item in the structure that we are interpreting This dissertation investigates a class of environments that involves covert modality Examples of covert modality include wh infinitival complements infinitival relative clauses purpose clauses the have to construction and the is to construction cf 1 1a Tim knows how to solve the problem Tim knows how one he could should solve the problem 1b Jane found a book to draw cartoons in for Sara Jane found a book for Sara one could should draw cartoons in 1c The man to fix the sink is here The man whose purpose is to fix the sink is here 1d Sue went to Torino to buy a violin Sue went to Torino so that she could buy a violin 1e Bill has to reach Philadelphia before noon Bill must reach Philadelphia before noon 1f Will is to leave tomorrow Will is scheduled supposed to leave tomorrow The interpretation of 1a f involves modality however there is no lexical item that seems to be the source of the modality What 1a f have in common is that they involve infinitivals This book addresses the following questions about covert modality what is the source of this modality what are its semantic properties why are some but not all infinitival relatives modal and why are all infinitival questions modal The infinitival wh Complementizer is identified as the source of the covert modality The apparent variability of the force of this modality is related to the particular semantics of this Complementizer Infinitival relatives that receive a non modal interpretation are analyzed as being reduced relatives and thus not involving the infinitival wh Complementizer

Kiss, 2011-12-22 Philologists aiming to reconstruct the grammar of ancient languages face the problem that the available data always underdetermine grammar and in the case of gaps possible mistakes and idiosyncracies there are no native speakers to consult The authors of this volume overcome this difficulty by adopting the methodology that a child uses in the course of language acquisition they interpret the data they have access to in terms of Universal Grammar more precisely in terms of a hypothetical model of UG Their studies discussing syntactic and morphosyntactic questions of Older Egyptian Coptic Sumerian Akkadian Biblical Hebrew Classical Greek Latin and Classical Sanskrit demonstrate that descriptive problems which have proved unsolvable for the traditional inductive approach can be reduced to the interaction of regular operations and constraints of UG The proposed analyses also bear on linguistic theory They provide crucial new data and new generalizations concerning such basic questions of generative syntax as discourse motivated movement operations the correlation of movement and agreement a shift from lexical case marking to structural case marking the licensing of structural case in infinitival constructions the structure of coordinate phrases possessive constructions with an external possessor and the role of event structure in syntax In addition to confirming or refuting certain specific hypotheses they also provide empirical evidence of the perhaps most basic tenet of generative theory according to which UG is part of the genetic endowment of the human species i e human languages do not develop parallel with the development of human civilization Some of the languages examined in this volume were spoken as much as 5000 years old still their grammars do not differ in any relevant respect from the grammars of languages spoken today Infinitive Constructions with Specified Subjects Guido Mensching, 2000 This book is intended for linguists Yearbook of Morphology 1998 Geert Booij, Jaap van Marle, 1999-10-31 A revival of interest in morphology has occurred during recent years The Yearbook of Morphology series published since 1988 has proven to be an eminent support for this upswing of morphological research since it contains articles on topics which are central in the current theoretical debates which are frequently referred to The Yearbook of Morphology 1998 focuses on two issues the position of inflection in the grammar and the interaction of morphology with phonology in particular the problem of allomorphy In addition this volume presents a study of the relation between transposition and argument structure a declarative model of word formation applied to conversion in German an analysis of Dutch verbal compounds and a study of the semantic aspects of nominalization The relevant evidence comes from a wide variety of languages Theoretical descriptive and historical linguists morphologists phonologists and psycholinguists will find
