I. William Zartman

Relevance Of International Adjudication:

The Relevance of International Adjudication Milton Katz, 1968 It has been an ancient and tenacious human hope that mankind could apply to the no man's land between states the experience of domestic law in curbing violence and settling disputes Within a society the use of law to resolve disputes and contain violence centers in the courts and the police Men anxious to restrain international aggression and settle international disputes peaceably have long sought to invoke international policing and adjudication under law Twice within the past half century they have undertaken to build worldwide organizations to keep the peace The United Nations system assigns a critical role to adjudication under the Charter and international law In this book one of America's foremost legal scholars who has extensive experience in foreign policy administration and international law explores whether and to what extent decisions by international tribunals have been significant or may yet be significant for the settlement of international disputes Mr Katz believes that adjudication as an institution ranks among the great creative achievements of mankind but it has its limitations limits both in current practice and in its potential scope In presenting his argument Mr Katz concentrates upon the period since the end of World War II and deals primarily with international conflict within the experience of the United Nations and the International Court of Justice He focuses on disputes resulting from the Cold War and on those between established industrial states and newly emerging states or peoples that have not yet attained a full measure of self government In examining what happened and appraising what might have happened Mr Katz keeps the reader constantly aware of the many meanings of law and of the need to sort out the different meanings in order to apply law effectively Without an understanding of the effective reach and the limits of adjudication he insists we will waste opportunities for settling international controversies We can waste opportunities by failing to use international tribunals where they can be effective we can dissipate the precious resource of adjudication in wishful misapplications and in misapplying adjudication we can divert our attention from other ways and means more pertinent to the settlement of particular international disputes

The Relevance of International Adjudication M. Katz, 1988 **The Advisory Function of the International Court of Justice 1946 - 2005** Mahasen Mohammad Aljaghoub, 2007-06-21 I am pleased to write these words by way of a foreword to Dr Mahasen Aljaghoub's book *The Advisory Function of the International Court of Justice* I do so with a sense of pride in the achievement of a fellow countrywoman and metaphorically speaking a sister in law My pride is coupled with hope and a nascent optimism that she and a group of young Jordanian academics mostly recent graduates of universities in the United Kingdom will contribute further and significantly to the teaching and dissemination of international law in Jordan and if I do not strain hope by hoping too much in a region in which notwithstanding its past glory the culture of law has for too long been superseded by the logic of power politics and unbridled *raison d'état* My only hesitation in writing this foreword is that a particularly heavy Court schedule has permitted me only a chance at a perusal of the contents of the book A perusal which whilst more than casual

falls short of the serious study that it deserves Yet I can unhesitatingly concur with the verdict of the internal and ternal examiners who praised Dr Aljaghoub s thesis as it then was for its th oughness detail and authoritativeness on this important area of international law

Secondary Rules of Primary Importance in International Law Gábor Kajtár,Basak Çali,Marko Milanovic,2022 This volume emphasizes the consequential nature of secondary rules of international law such as attribution causality and the standard and burden of proof and argues that the outcome of litigation is fundamentally shaped by the exact standard of proof standard of review or attribution basis that is chosen by adjudicators

The Future of International Courts Avidan Kent,Nikos Skoutaris,Jamie Trinidad,2019-03-01 The end of World War II marked the beginning of a new golden era in international law Treaties and international organisations proliferated at an unprecedented rate and many courts and tribunals were established with a view to ensuring the smooth operation of this new universe of international relations The network of courts and tribunals that exists today is an important feature of our global society It serves as an alternative to other sometimes more violent forms of dispute settlement The process of international adjudication is constantly evolving sometimes in unexpected ways Through contributions from world renowned experts and emerging voices this book considers the future of international courts from a diverse range of perspectives It examines some of the regional institutional and procedural challenges that international courts face the rising influence of powerful states the turn to populism the interplay between courts the involvement of non state actors and third parties in international proceedings and more The book offers a timely discussion of these challenges with the future of several international courts hanging in the balance and the legitimacy of international adjudication being called constantly into question It should also serve as a reminder of the importance of international courts for the functioning of a rules based international order The Future of International Courts is essential reading for academics practitioners and students who are interested in international law including those who are interested in the role international courts play in international relations

The International Court of Justice at a Crossroads Lori Fisler Damrosch,1988-12 Published under the auspices of the American Society of International Law Winner of the 1988 American Society of International Law Certificate of Merit This major study of the International Court of Justice was the first comprehensive analysis of the issues confronting governments in reexamining the scope of their consent to the Court s jurisdiction Topics include the suitability of various kinds of disputes for resolution by the Court problems of non appearance non participation and non performance provisional measures and more Published under the Transnational Publishers imprint

The Philosophy of International Law Samantha Besson,John Tasioulas,2010-04 This text contains 29 cutting edge essays by philosophers and lawyers which address the central philosophical questions about international law Its overarching theme is the moral and political values that should guide and shape the assessment and development of international law and institutions

The Role of International Law in the Elimination of War Quincy Wright, *The Role of Advisory Opinions in International Law in the Context of the Climate*

Crisis Maria Antonia Tigre, Armando Rocha, 2025-06-23 This work was supported by Catlica Research Centre for the Future of Law and Vieira de Almeida Associados 2024 2025 marks a pivotal shift in international climate law as advisory opinions before international and regional courts and tribunals begin to shape the global response to the climate crisis With one advisory opinion already issued and two more anticipated in 2025 this collective effort to define and enforce States climate obligations is gaining momentum This book captures this critical juncture featuring chapters by leading scholars and litigators involved in these landmark advisory opinions Against the backdrop of decades of domestic climate litigation the transition to international courts reflects the urgent need for global solutions to a challenge that transcends borders offering vital insights for the path forward

Constructive Interventions Lars Kirchhoff, 2008-01-01 In the contemporary discipline of conflict resolution adjudication and alternative dispute resolution ADR are often seen as antagonistic trends This important book contends that on the contrary it is the bringing together of these trends that holds the most promise for an effective system of international justice With great insight and passion built firmly on a vast knowledge of the field Lars Kirchhoff exposes the contemporary structural barriers to effective conflict resolution defining where adjudication ends and ADR and particularly the recent development of mediated third party intervention from an art to a veritable science must come into play The work starts by defining the challenges potentials and shortcomings of different approaches to conflict resolution in an interdependent world where the multiplicity of actors topics and interests involved even in seemingly bilateral conflict situations is clearly manifest and goes on to define useful models and connect the various elements relevant for the resolution of conflicts in a transparent way In the course of its investigation the book accomplishes the following illustrates the various departure points and perspectives scholars of conflict resolution have taken as the basis for their work discusses who should become involved in conflicts as a third party and by which techniques this should occur systematically conveys the nature and consequences of intervention through mediation focusing on the methods critical challenges and clarifies the particular model of international mediation under development through UN initiatives In approaching these intertwined topics the author draws concrete conclusions for the realms of international law and related disciplines as well as for the organizational context of the United Nations He explores such diverse scenarios as conflicts between States conflicts involving international organizations and in accordance with the changing parameters of international law even conflicts involving individuals clarifying which constellations can be tackled by international mediation and which conflicts should be dealt with by other forms of diplomacy or adjudication It is the conviction of many intermediaries and scholars that the considerable potential inherent in resolving conflicts peacefully is rarely put into practice Although some of the reasons for this phenomenon are beyond the influence of scholarly debate in many instances the reasons for failure of peaceful resolution processes are more structural or systemic in nature It is the great virtue of this book that it establishes enough clarity in an unclear and complex field to make concrete and workable recommendations in these instances and for that reason it will be

of immeasurable value and benefit to all scholars policymakers and activists dedicated to the pursuit of peace

International Courts and the Development of International Law Nerina Boschiero, Tullio Scovazzi, Cesare Pitea, Chiara Ragni, 2013-03-15 This book contains a collection of essays by leading experts linked to the outstanding characteristics of the scholar in honour of whom it is published Tullio Treves who combines his academic background with his practical experiences of a negotiator of international treaties and a judge of an international tribunal It covers international public and private law related to international courts and the development of international law Under Article 38 of its Statute the International Court of Justice can apply judicial decisions only as a subsidiary means for the determination of rules of law However there are many reasons to believe that international courts and tribunals do play quite an important role in the progressive development of international law There are a number of decisions which are inevitably recalled as the first step or a decisive step in the process of the formation of a new rule of customary international law In these cases can the judge be considered as a subsidiary of others Are these cases compatible with the common belief that a

judge cannot create law Is this a peculiarity of international law which is characterized by the existence of several courts but the lack of a legislator Do decisions by different courts lead to the consequence of a fragmented international law This volume provides the reader with an elaboration of various questions linked to the legislative role of courts In their choices of subjects some contributors have taken into account the general aspects of the development of international rules through court decisions or specific sectors of international law such as human rights international crimes international economic law environmental law and the law of the sea Others have chosen the subject of the rules on jurisdiction and procedure of international courts The question of the courts role in the development of areas of law different from public international law namely private international law and European Union law has also been considered The information and views contained in this book will be of great value to academics students judges practitioners and all others interested in the public and private international law aspects of the link between international courts and the development of international law **Research**

Chester Brown, 2007 Brown offers an examination of the jurisprudence of a range of international courts and tribunals relating to issues of procedure and remedies and assessment whether there are emerging commonalities regarding these issues which could make up a unified law of international adjudication National Courts and the International Rule of Law André Nollkaemper, 2012-10-11 This book explores the way domestic courts contribute to the maintenance of the international of law by providing judicial control over the exercises of public powers that may conflict with international law The main focus of the book will be on judicial control of exercise of public powers by states Key cases that will be reviewed in this book and that will provide empirical material for the main propositions include Hamdan in which the US Supreme Court reviewed detention by the United States of suspected terrorists against the 1949 Geneva Conventions Adalah in which the Supreme Court of Israel held that the use of local residents by Israeli soldiers in arresting a wanted terrorist is unlawful under international law and the Narmada case in which the Indian Supreme Court reviewed the legality of displacement of people in connection with the building of a dam in the river Narmada under the ILO Indigenous and Tribal Populations Convention 1957 nr 107 This book explores what it is that international law requires expects or aspires that domestic courts do Against this backdrop it maps patterns of domestic practice in the actual or possible application of international law and determines
