**The Borghese Collections and the Display of Art in the Age of the Grand Tour** Carole Paul, 2017-07-05

The redecoration of the exhibition spaces at the Borghese palace and villa undertaken together with the reinstallation of the family's vast art collections was one of the most important events in the cultural life of eighteenth century Rome. In this comprehensive study Carole Paul reconstructs the planning and execution of the project and explains its multifaceted significance: its place in the history of Italian art, architecture and interior design at a complex moment of transition from baroque to neoclassical style as well as its unrecognized but profound influence on the development of the modern art museum. The study shows how the installations and decorations worked together to evoke traditional themes in innovative ways. Addressed primarily to a new audience of tourists from abroad, the thematic content of the spaces celebrated the greatness of the Borghese family and of Roman tradition while their stylistic diversity and sophistication made a case for the continued vitality even modernity of Roman art and culture. Designed for the exercise of a highly refined social performance, these sites helped to model the experience of art as a form of enlightened modern civility.

*The Oxford Handbook of Roman Sculpture* Elise A. Friedland, Melanie Grunow Sobocinski, Elaine K. Gazda, 2015. The study of Roman sculpture has been an essential part of the disciplines of Art History and Classics since the eighteenth century. Famous works like the Laocoön in the Arch of Titus and the colossal portrait of Constantine are familiar to millions. Again and again scholars have returned to sculpture to answer questions about Roman art, society and history. Indeed, the field of Roman sculptural studies encompasses not only the full chronological range of the Roman world but also its expansive geography and a variety of artistic media, formats, sizes and functions. Exciting new theories, methods and approaches have transformed the specialized literature on the subject in recent decades. Rather than creating another chronological catalogue of representative examples from various periods, genres and settings, *The Oxford Handbook of Roman Sculpture* synthesizes current best practices for studying this central medium of Roman art, situating it within the larger fields of Art History, Classical Archaeology and Roman Studies. This comprehensive volume fills the gap between introductory textbooks and highly focused professional literature. *The Oxford Handbook of Roman Sculpture*

conveniently presents new technical scientific literary and theoretical approaches to the study of Roman sculpture in one reference volume while simultaneously complementing textbooks and other publications that present well known works in the corpus. The contributors to this volume address metropolitan and provincial material from the early republican period through late antiquity in an engaging and fresh style. Authoritative, innovative and up to date. The Oxford Handbook of Roman Sculpture will remain an invaluable resource for years to come.

**Sculpture Collections in Europe and the United States 1500-1930**, 2021-04-26. Exploring the variety of forms taken by collections of sculpture, this volume presents new research by twelve internationally recognized scholars. The essays delve into the motivations of different collectors, the modes of display and the aesthetics of viewing sculpture, bringing to light much new archival material. The book underscores the ambiguous nature of sculpture collections, variously understood as decorative components of interiors or gardens, as objects of desire in cabinets of curiosity or as autonomous works of art in private and public collections. Emphasizing the collections and the ways in which these were viewed and described, this book addresses a significant but neglected aspect of art collecting and contributes to the literature on this branch of art and cultural history. This book evolved from a symposium, Sculpture Collecting and Display 1600-2000, organized by the Center for the History of Collecting that was held at The Frick Collection on May 19 and 20, 2017. Both the book and the symposium were made possible through the generous support of the Robert H. Smith Family Foundation. The book is published in association with The Frick Collection.

Personal Styles in Greek Sculpture Όλγα Παλαγιά, J. J. Pollitt, Department of Classics, Yale University Staff, 1998. The aim of this 1996 book is to identify and evaluate the distinctive styles of five important ancient Greek sculptors whose work is discussed by ancient writers. Its underlying assumption is that the history of Greek sculpture was not simply governed by impersonal evolutionary forces but that like the sculpture of later periods it was shaped by the intuitions, predilections and innovations of particular individuals. The international group of authors whose essays appear here recognize that the problematical and fragmentary nature of the surviving evidence makes their task a difficult one. Nevertheless, by drawing upon the evidence of recent archaeological finds and by re-evaluating both the ancient literary sources and earlier scholarly literature, they expand our understanding of the role of personal styles in ancient Greek art.
