Greco-Scythian Art and the Birth of Eurasia Caspar Meyer, 2013-11 Drawing on evidence from archaeology art history and textual sources to contextualize Greco Scythian metalwork in ancient society Meyer offers unique introductions to the archaeology of Scythia and its ties to Asia and classical Greece modern museum and visual culture studies and the intellectual history of classics in Russia and the West Artifacts from the Ancient Silk Road William E. Mierse, 2022-12-01 Artifacts from the Ancient Silk Road explores the interconnectivity of the Eurasian continent from 4000 BCE to 1000 CE It focuses on the role played by Central Asia through which passed the major trade routes the Silk Roads Artifacts from the Ancient Silk Road covers life along the Silk Road over 5000 years as it can be understood by considering objects In this first object based study to consider all of the peoples involved on the Silk Roads objects provide the vehicles for explorations of different aspects of life for the various peoples of the Silk Roads including the sedentary peoples who established urban life on the Silk Roads the steppe nomads who regularly interacted with the settled peoples and the peoples at either end of the Silk Roads who drove certain kinds of economic exchanges The book looks at Central Asia as an international zone during ancient times when multiple religious political and technological ideas found acceptance in the region and allows for a better understanding of how some ideas and forms developed in Central Asia while others passed through or were modified **The Cambridge Ancient History** John Boardman, I. E. S. Edwards, E. Sollberger, N. G. L. Hammond, 1992-01-16 Volume III Part II carries on the history of the Near East from the close of Volume III Part I and covers roughly the same chronological period as Volume III Part III During this period the dominant powers in the East were Assyria and then Babylonia Each established an extensive empire which was based on Mesopotamia and each in turn fell largely through internal strife Assyrian might was reflected in the imposing palaces libraries and sculptures of the Assyrian kings Babylonian culture was outstanding in literature mathematics and astronomy and the great buildings of Nebuchadnezzar II surpassed even those of the Assyrian kings Israel and Judah suffered at the hands of both imperial powers Jerusalem being destroyed and part of the population deported to Babylon and Egypt was weakened by an Assyrian invasion The Phoenicians found a new outlet in colonising and founded Carthage A number of small vigorous kingdoms developed in Asia Minor while from the north and north east the Scythian nomadic tribes pressed down upon Turkey and the Danube valley but found their match in the Thracian tribes which held south eastern Europe and parts of western Turkey The burials of the chieftains of both peoples were remarkable for the great wealth of offerings The Maikop Treasure Aleksandr Mikhailovich Leskov, 2008-08-27 Catalogue University of Pennsylvania Museum of Archaeology and Anthropology Philadelphia Antikenabteilung Staatliche Museen Berlin Museum für Vor- und Frühgeschichte Berlin Metropolitan Museum of Art New York The Maikop collection a historical overview *Attic Fine Pottery of the Archaic to Hellenistic Periods in Phanagoria* Catherine A. Morgan, 2004-01-01 This publication of Attic

fine pottery imported to the Greek colony of Phanagoria in the Taman Peninsula southern Russia explores the social function of imports in a colonial society and the changing nature of Black Sea trade *Achaemenid Impact in the Black Sea* Jens Nieling, Ellen Rehm, 2010-07-16 For 200 years from the second half of the sixth century to the decades before 330 BC the Persian dynasty of the Achaemenids ruled an enormous empire stretching from the Mediterranean Sea to Afghanistan and India The Great Kings Dareios I and Xerxes I even tried to conquer Greece and the northern Black Sea territories Although they failed parts of Thrace did become part of their dominion for a short period The question always rises as to why the Great Kings were interested in the western and northern Pontic zones In contrast to some of the other satrapies such as Egypt Phoenicia and Syria the Black Sea had no prosperous cities or provinces to offer One possible answer might be the desire to conquer every part of the known world After 479 BC it seems that the Great Kings acknowledged the fact that the coast and the Caucasus formed the natural borders of their Empire The satraps on the other hand could not avoid becoming involved in the affairs of the Black Sea region in order to safeguard the frontiers they had established They had to incorporate the Greeks as accepted inhabitants of their province into the Persian administrative system Possibly they achieved this by granting them the monopoly in sea trade and using the Anatolian Greeks as the main active bearers and transmitters of Persian customs and culture More research into this chapter of Persian history is still required *Scythian Gold* Ellen Reeder, Esther Jacobson, San Antonio Museum of Art, 1999-11 Scythian Gold and the exhibition it accompanies Gold of the Nomads Scythian Treasures from Ancient Ukraine present the most important Scythian gold objects in Ukraine many of which were discovered only in the last two decades This exhibition and catalogue combine an analysis of these pieces with an overview of recent advances in our understanding of Scythian culture **BOOK JACKET** **Foes From the Northern Frontier** Edwin M. Yamauchi, 2003-04-15 Are there any biblical references to territories in what is today the country of Russia The author's answer is yes but Ezekiel's reference to Rosh and Meshech is not one of them In a thoroughly documented discussion the author describes the Urartians Mannaeans Cimmerians and Scythians Three of these northern foes of Israel are referred to by Jeremiah in 51:27 the Cimmerians by Ezekiel 38:6 with the exception of Egypt writes the author almost all of Israel's enemies came from the north though from the viewpoint of a modern map many of these came ultimately from the east The Urartians occupied what is now Soviet Armenia southeastern Turkey and northwestern Iran The Mannaeans lived south of Lake Urmia between Urartu and Assyria The Cimmerians first appeared in the steppes north of the Caucasus then crossed the Caucasus and eventually invaded Asia Minor The Scythians were nomadic tribes from the Russian steppes some of whom settled in the Ukraine north of the Black Sea others east of the Caspian But what of Rosh Meshech and other names in Ezekiel 38:2 Is Rosh Russia and Meshech Moscow Rosh cannot possibly be related to Russia insists the author Nor can the terms Gog and Magog no proposed identification for which has yet to win universal consent Meshech and Tubal on the other hand have been located for certain in central and eastern Anatolia Greek and Roman Jewellery

Reynold Higgins, Reynold Alleyne Higgins, 1980-01-01 The Scythian Connection and the Shamanistic Crowns of Ancient Korea Shirley Fish, 2021-08-22 The Three Kingdoms Period in Korean history consisted of the kingdoms of Silla Koguryo and Paekche It was only the Silla kingdom which seemed to have had a connection to the ancient nomadic Scythians These people seemed so different from the indigenous inhabitants who were already living in Korea during the 3th to 6th centuries CE It is the author's opinion is that they were the descendants of the Scythians who although they would not have called themselves Scythians they were none the less the remnant members of nomadic tribes that pushed eastward from Central Asia and Siberia to the Korean peninsula Once in Southern Korea they established the Silla kingdom where their time honored beliefs are depicted in their mound burials wooden burial chambers gold crowns horse riding and also in their Siberian shamanism This time period of the gold crowns and the people who produced the royal headgear was the Maripgan Period and as mentioned they were the descendants of Scythians who although in Central Asia and Siberia were known to have existed as far back as 10 000 years BC they were always on the move searching for new pasturelands for their herds or to avoid conflicts and war with their enemies The Silla crowns were created around the 5th to the 7th centuries in Kyongju the former capital of the Silla people When they were discovered in various archaeological mound sites they were found to be in a highly fragile state The crowns were each designated as national treasures by the Korean government and most weigh about one kilogram Some of the crowns came in two parts an inner gold cap which may have been covered in silk fabric and sat inside of the crown and the crown itself The crowns were totally shamanistic in their symbolism and represented the belief systems of the Scythians of Central Asia and Siberia which eventually made its way to Korea and the ancient Kingdom of Silla **Ancient Greeks West and East** G.R. Tsetschladze, 2018-07-17 This volume deals with the concept of West and East as held by the ancient Greeks Cultural exchange in Archaic and Classical Greece through the establishment of Hellenic colonies around the ancient world was an important development and always a two way process To achieve a proper understanding of it requires study from every angle All 24 papers in this volume combine different types of evidence discussing them from every perspective they are examined not only from the point of view of the Greeks but from that of the locals The book gives new data as well as re examining existing evidence and reinterpreting old theories The book is richly illustrated Feeding the Democracy Alfonso Moreno, 2007-10-25 The reliance of democracies on vital supplies of energy from distant and non democratic sources is probably the most pressing and dangerous problem of modern times but it is not a new phenomenon Classical Athens the birthplace of democracy and the largest and historically most important of the ancient Greek city states depended for its survival on the constant importation of grain from overseas lands as remote as Ukraine and southern Russia and this trade was ultimately controlled by powerful politicians wealthy landowners and kings Alfonso Moreno examines how this resource need determined Athenian foreign policy prompting recourse to military conquest and ruthless resettlements and how uncomfortable realities especially elite control were made acceptable to

popular audiences This study of ancient trade and politics reveals a Greek world as globalized as our own and convulsed by the same problems that such interdependence and sophistication entail

Cultural Interactions and Social Strategies on the Pontic Shores Jane Hjarl Petersen, 2010-07-16 In Antiquity the Black Sea region was a meeting point for several different population groups with diverse cultural backgrounds The present monograph takes its point of departure in burial data from four coastal localities in the northern region of the Black Sea The mortuary practices are decoded and interpreted within a framework mainly based on concepts of cultural interaction rather than cultural polarisation Thus the dogma of The Greeks and the Others is challenged and alternative perceptions of interactions between the people in the Black Sea region form the basis of the study The burials are primarily analysed with emphasis on social strategies and cultural diversity Furthermore the Black Sea region is set into a comparative perspective through an outlook on burial customs and mortuary practices in the colonial milieu of contemporary Southern Italy

Metalwork from the Hellenized East Michael Pfrommer, 1993-05-20 This heavily illustrated catalogue is devoted to the Museum's collection of silver and gold from the Hellenized East one of the largest yet assembled Among the objects included are rhyta bowls cups jewelry and decorative gold and silver ornaments for horse bridles and clothing In an extensive introduction the author dates the various groups of objects and places them within a wider cultural and archaeological context providing a detailed stylistic analysis of the ornamental motifs of many pieces Of particular importance is the inclusion of illustrations of some 50 little known comparative objects as well as extensive bibliographic references

The Scythians Barry W. Cunliffe, 2019 The Scythians were warlike nomadic horsemen who roamed the steppe of Asia in the first millennium BC Using archaeological finds from burials and texts written mainly by Greeks this book reconstructs the lives of the Scythians exploring their beliefs their burial practices their love of fighting and their flexible attitude to gender

The Rogozen Treasure B. F. Cook, 1989 **Masters of the Steppe: The Impact of the Scythians and Later Nomad Societies of Eurasia** Svetlana Pankova, St John

Simpson, 2021-01-21 This book presents 45 papers presented at a major international conference held at the British Museum during the 2017 BP exhibition Scythians warriors of ancient Siberia Papers include new archaeological discoveries results of scientific research and studies of museum collections most presented in English for the first time

Environment and Habitation around the Ancient Black Sea David Braund, Vladimir F. Stolba, Ulrike Peter, 2021-05-10 Environment and human habitation have become principal topics of research with the growing interest in the Black Sea region in antiquity This book highlights their interaction around all the coasts of the region from different perspectives and disciplines Here archaeological excavation and survey combine with studies of classical texts cults medicine and more to explore ancient experiences of the region Accordingly the region is examined from external viewpoints centred in the Mediterranean Herodotus the Hippocratics ancient geographers and poets and through local lenses particularly supplied by archaeology While familiar disconnects emerge there is also a striking coherence in the results of these different pathways into the study

of local environments which embrace not only Graeco Roman settlement but also a broader range of agricultural and pastoralist activities across a huge landscape which stretches as far afield as ancient Hungary Throughout there are methodological implications for research elsewhere in the ancient world This book shows people in landscapes across a huge expanse in local reality and in external conceptions complete with their own agency ideas and lifestyles
