The rise of the post truth society has specific importance and inherent risk for nearly all academic disciplines and researchers When personal beliefs regarding climate change trump scientific consensus research projects are defunded results are hidden or undermined and all of us are at a greater vulnerability to extreme weather patterns When expertise itself becomes suspect we become a nation lead by fools When data is overcome by alternative facts and truth in any form is suspect where is the space for religious and or scientific scholarship The central curiosity of this volume is what is the role of religion and science scholarship in a post truth society This text explores truth lies fear populism politics faith the environment post modernity and our shared public life **Jasper F.
