Seabird Numbers and Breeding Success in Britain and Ireland, 2002 Roddy A. Mavor, M. Parsons, G. Pickerell, 2003

Presents the results of monitoring of seabird populations and breeding performance throughout Britain and Ireland in 2002 and makes comparisons with previous years This report is produced annually as part of the JNCC's Seabird Monitoring Programme **The Status of Birds in Britain and Ireland** David Parkin, Alan Knox, 2010-01-01 A detailed and up to date assessment of the status and distribution of every species of bird in Britain and Ireland Pelicans, Cormorants, and their Relatives J. Bryan Nelson, 2006-01-26 The pelecaniformes are a large and important group of seabirds containing many spectacular species This book addresses the breeding biology of the six pelecaniform families which comprise the closely related core groups pelicans cormorants shags darters gannets boobies and their more distant relatives the frigate birds and tropic birds Many fundamental questions can be addressed through the pelecaniformes Why do they breed in colonies What are the links between their feeding methods and their reproduction What part does territorial and pairing behaviour play in their life cycles These and scores of comparable issues including those related to man are woven here into a richly interpretative text The author's approach to the subject is threefold First the pelecaniformes are placed within the framework of four discrete disciplines with chapters on evolutionary relationships comparative behaviour ecology and the birds relationship with humans Secondly each of the six families is discussed elucidating the range of taxonomy behaviour and ecology within each Finally we progress to specific level using the same structure as for the family accounts In this way each of the 60 odd species can be understood not just as discrete units but as part of their family and order The book is unique in its coverage of the entire order and in its combination of facts and interpretation Pelicans Cormorants and their Allies will enable readers not only to identify the many spectacular species which make up this large and important group of seabirds but also to understand their breeding biology *Conserving Bird Biodiversity* Ken Norris, Deborah J. Pain, 2002-06-06 The earth's biodiversity currently faces an extinction crisis that is unprecedented Conservationists attempt to intervene in the extinction process either locally by protecting or restoring important species and habitats or at national and international levels by influencing key policies and promoting debate Reliable information is the foundation upon which these efforts are based which places research at the heart of biodiversity conservation The role of research in such conservation is diverse It includes understanding why biodiversity is important defining units of biodiversity priority setting for species and sites managing endangered and declining populations understanding large scale processes making predictions about the future and interfacing with training education public awareness and policy initiatives Using examples

from a wide range of bird conservation work worldwide researchers consider the principles underlying these issues and illustrate how these principles have been applied to address actual conservation problems for students practitioners and researchers in conservation biology The Changing Wildlife of Great Britain and Ireland David L. Hawksworth,2003-06-26 Periodic comprehensive overviews of the status of the diverse organisms that make up wildlife are essential to determining trends threats and future prospects Just over 25 years ago leading authorities on different kinds of wildlife came together to prepare an assessment of their status of a wide range of organisms in Great Britain and Ireland i **ICES Cooperative Research Report** ,1999 **Report of the ICES Advisory Committee on the Marine Environment, 1999, Copenhagen, Denmark, 31 May-5 June 1999** ICES Advisory Committee on the Marine Environment,2000 **Action plan for seabirds in Western-Nordic areas** Nordiska Ministerrådet,2010 Report of the ICES Advisory Committee on Ecosystems ICES Advisory Committee on Ecosystems,2002 Report of the ICES Advisory Committee on Ecosystems, 2002 ICES Advisory Committee on Ecosystems,2002 Report of the ICES Advisory Committee on Ecosystems, 2001, Copenhagen, 27-30 August 2001 ICES Advisory Committee on Ecosystems,2001 Irish Birds ,1998 **The Glasgow Naturalist** ,2002 Includes the Transactions and proceedings of the Society 1909 55 called third series 1909 30 Methods of Environmental Impact Assessment Peter Morris,Riki Therivel,2001-08-23 Offers a comprehensive coverage of the methods used in environmental impact assessment which is now firmly established as an obligatory procedure in proposing or launching any development project with possible impacts on the environment Atlantic Seabirds ,2003 Top Predators in Marine Ecosystems C. J. Camphuysen,2006-05-11 The sustainable exploitation of the marine environment depends upon our capacity to develop systems of management with predictable outcomes Unfortunately marine ecosystems are highly dynamic and this property could conflict with the objective of sustainable exploitation This book investigates the theory that the population and behavioural dynamics of predators at the upper end of marine food chains can be used to assist with management Since these species integrate the dynamics of marine ecosystems across a wide range of spatial and temporal scales they offer new sources of information that can be formally used in setting management objectives This book examines the current advances in the understanding of the ecology of marine predators and will investigate how information from these species could be used in management Bird Observatories of Britain and Ireland Bird Observatories Council,2010-08-18 A comprehensive survey of the valuable work undertaken by Britain s network of bird observatories with summaries and tables of noteworthy events and much historical background Bird observatories are research stations established mainly for the study of migration particularly by means of ringing There are now 18 scattered around the Britain and Ireland at key points on migration routes on coastal promontories or small islands Part of their attraction is the regular occurrence of rarities that are found each year at these observatories Written by wardens and ringers from each location Bird Observatories of Britain and Ireland is a timely new edition of one of the earliest Poyser titles It includes detailed

coverage of the history location habitats and ornithological interest of each observatory including summaries and tables of noteworthy events
