Seaports People Of Europe:

European Seaports Law E. van Hooydonk, 2003 In 2001 the European Commission published its so called Ports Package a first attempt at developing a European policy for seaports The Ports Package includes a Directive on Market Access to Port Services which will influence the port industry thoroughly and lead to fundamental changes in daily port operations In this volume academics as well as practising lawyers from France Ireland Italy and Belgium describe the legal framework for the several branches of the port sector recalling the far reaching practical implications of existing general EU law and discussing the latest versions of the Port Services Directive proposal Completed by authoritative views from the head of the Commission s ports unit a specialist MEP and representatives from both the public and the private port sector this book offers a fairly complete overview of existing port law as well as the main points of concern in the policy debate Its purpose is to serve both as a policy background document and as a working tool for public and private port players as well as for academics and lawyers

Chinese Overseas Ports in Europe and the Americas Jean-Marc Blanchard, 2023-07-21 This book analyzes the progress gains and effects of Chinese overseas ports through in depth and systematic studies of numerous cases in Europe and Latin America China s participation in overseas ports especially under the rubric of the Belt and Road Initiative is a matter of great concern to businesspeople policymakers and researchers pondering the implications of Chinese infrastructure activities and overseas investment Yet there is insufficient knowledge concerning the actual nature of China s role in specific ports the economic and other

consequences associated with that involvement and the wider economic political and environmental effects of those economic effects The chapters of this book fill these gaps by examining ports in diverse European countries like Denmark Germany Greece the Netherlands and the United Kingdom and various Latin American countries including Brazil and Jamaica The book illustrates why Chinese seaports succeed or fail why they have the military economic and other consequences that they do and why these consequences produce or fail to generate other effects such as political influence This book will appeal to audiences with interests in China s overseas seaports foreign direct investment FDI and infrastructure specifically and foreign direct investment geopolitics and the political economy of national security more generally

European Port Cities in Transition Angela Carpenter, Rodrigo Lozano, 2020-01-22 Seaports as part of urban centers play a major role in the cultural social and economic life of the cities in which they are located and through the links they provide to the outside world Port cities in Europe have faced significant change first with the loss of heavy industry emergence of Eastern European democracies and the widening of the European Community now European Union during the second half of the twentieth century and more recently through drivers to change including the global Sustainable Development Agenda and the European Union Circular Economy Agenda This book examines the role of modern seaports in Europe and consider how port cities are responding to these major drivers for change It discusses the broad issues facing European Sea Ports including port life cycles spatial planning and societal integration May 2019 saw the 200th anniversary of the first steam ship to cross the Atlantic between the US and England and it is just over 60 years since the invention of the modern intermodal shipping container both drivers of change in the maritime and ports industry Increasing movements of people e g through low cost cruises to port cities can play a major role in changing the nature of such a city and impact on the lives of the people living there This book brings together original research by both long standing and younger scholars from multiple disciplines and builds upon the wider discourse about sea ports port cities and sustainability

European Port Cities and Urban Regeneration Enrico Tommarchi, 2022-07-29 Culture and event led regeneration have been catalysts for the transformation of redundant urban port areas and for the reframing of the image of many port cities which notably feature among mega event bidding and host cities However there is little understanding of the impacts of these processes on port city relationships as well as of how port city cultures shape mega events and the related regeneration strategies The book examines the underexplored mutual links between on the one hand urban and socio economic regeneration driven by cultural and sporting mega events and on the other hand the spatial political and symbolic ties between cities and their ports By adopting a cross national comparative perspective with in depth case studies Hull Rotterdam Genoa and Valencia and examples from other port cities across the world where mega events were held the book engages with issues such as the tension between port and cultural uses reactions and opposition to mega events in port cities clashing urban imaginaries drawing on port activity and culture the role of port authorities and companies in the city s cultural life the spectacularisation and commodification of

local maritime culture and heritage processes of cultural demaritimisation and remaritimisation of port cities The book is therefore a contribution towards the bridging of port city and mega event studies and it provides insights for port city policy makers and mega event promoters drawing from a range of international experiences The book also shows how societal and political change in the current ontologically insecure times may undermine the very paradigm of culture and event led regeneration in the years to come
