Search Jim Jansen, 2011-07-25 This book addresses the underlying foundational elements both theoretical and methodological of sponsored search As such the contents are less affected by the ever changing implementation aspects of technology Rather than focusing on the how this book examines what causes the how Why do certain keywords work while others do not Why does that ad work well when others that are similar do not Why does a key phrase cost a given amount Why do we measure what we do in keyword advertising This book speaks to that curiosity to understand why we do what we do in sponsored search The content flows through the major components of any sponsored search effort regardless of the underlying technology or client or product The book addresses keywords ads consumers pricing competitors analytics

branding marketing and advertising integrating these separate components into an incorporated whole The focus is on the critical elements with ample illustrations and with enough detail to lead the interested reader to further inquiry The Newspapers Handbook Richard Keeble, 2006-06-28 The Newspapers Handbook is the first comprehensive guide to the job of the newspaper reporter It offers advice on a range of different types of newspaper writing looks at how newspapers cover events and shows how reporting styles can differ in mainstream and non mainstream newspapers In this new edition Richard Keeble explores the theoretical moral and political dimensions of a journalist's job and examines changing newspaper ownership structures and recent ethical controversies **Effective Risk Communication** Joseph Arvai, Louie Rivers III, 2013-10-30 There are two questions often asked of risk communication what has been learned from past work and what is needed to push the field forward Drawing on the experience of leading risk researchers and practitioners Effective Risk Communication focuses on answering these questions The book draws together new examples of research and practice from contexts as diverse as energy generation human health nuclear waste climate change food choice and social media This book treats risk communication as much more than the interchange of risk information between experts and non experts rather it aims to emphasise the diversity in viewpoints and practices In each specially commissioned chapter the authors reflect on the theoretical and applied underpinnings of their best projects and comment on how their approach could be used effectively by others Building upon each other the chapters will provoke new discussion and action around a discipline which many feel is neither meeting important needs in practice nor living up to its potential in research Through a more careful examination of the work already done in risk communication the book will help develop better more reflective practice for the future
