comprehensive and systematic evaluation of reincarnation and Karma in any language Renowned philosopher Paul Edwards
exposes the many flaws in the arguments supporting the belief in reincarnation and the so called Law of Karma He also
covers the alleged evidence in support of reincarnation including child prodigies déjà vu experiences hypnotic regressions

into consciousness the universe and the nature of reality Draws on transdimensional physics and biology reincarnation and
past life memories animal consciousness multiple identities thoughtforms soul pictures and paranormal phenomena like crop
circles and poltergeists Explores the riddle of personal identity and how it differs from consciousness Reveals that
consciousness is more than encompassing all that exists it also speaks to what has yet to manifest Scientific orthodoxy views
the universe as conceived of matter protons neutrons electrons down to the smallest particle quarks But when you keep
digging what is beneath quarks The scientific worldview does not take into account consciousness or life itself How did
consciousness become part of the material universe Is it a by product of brain chemistry or a constituent of reality Or to dig
deeper which is more fundamental the existence of an objective physical universe or our subjective experience of it In this

investigation into consciousness the universe and the nature of reality Richard Grossinger offers a wide ranging foundation for reimagining the universe as based in consciousness rather than matter He presents in depth analysis of the standard scientific description of the universe revealing the holes in its theories Exploring the interpenetration of matter and all reality by consciousness the author looks at reincarnation and past life memories examining famous and lesser known but verifiable accounts He then explores the nature and origin of consciousness with accompanying explorations of animal consciousness the brain as a computer multiple identities thoughtforms soul pictures and paranormal phenomena like UFOs faeries and poltergeists He also examines concepts from physics that combine elements of both consciousness and matter such as collapsing waveforms and the uncertainty principle of quantum mechanics Examining nonlocal and transpersonal modes of consciousness Grossinger looks at the difference between consciousness and personal identity He expands this discussion with reflections on Sethian cosmology using Seth s own words and Jane Roberts s and John Friedlander s interpretations He reveals that consciousness also encompasses what has yet to manifest and explains why the universe exists at all why there is something rather than nothing Skewering the materialist paradigm and placing consciousness alongside mass gravity and heat as an essential component of the universe Grossinger proposes that reality is a thoughtform where sentient beings collaborate to bring about a concrete realm vibrating at their own frequency Kingdom of Heaven Hilton Hotema,1997-11 The Grand Cosmic Kingdom and its Seven Parts the Mental Kingdom Consciousness Why People Fail Freedom the Spiritual Organs the State of Brahma Telepathy the Fourth Dimension **The Parapsychology Revolution** Robert M.
