Searching For Answers:

Searching for Shangri-La Laurence Brahm, 2017-04-01 In 2002 author filmmaker and economist Laurence Brahm inspired by James Hilton's novel *Lost Horizon* and his own quest for meaning began his search for Shangri la. Some say that Shangri la can be found in sacred Tibet or maybe in wild Qinghai others believe it can be found in artistic Yunnan in the southwest of China. The author discovered the spiritual truth that Shangri la is not a place rather it is a state of mind. As Brahm hitchhiked through western China well off the beaten track he recorded the interior changes and illuminations he experienced as his consciousness expanded far beyond the everyday cares of his years of urban life in Beijing. The insights of his journey and his meetings with others who searched for their own versions of Shangri la helped him to understand that the archetypal goal he sought was actually a state of consciousness. Shangri la may be found in a cup of caf latte or yak butter tea. 8212 If we search carefully enough and with mindfulness and compassion. *Searching for Shangri la* is the first book of the Himalayan Trilogy. The reader will discover the need for fresh economic paradigms that call for compassionate capital, the empowerment of people and prioritization of the environment. Spirituality can be more powerful than materialism. The need for sustainability has rarely been so beautifully and eloquently defended. *Memory Online* Qi Wang, 2022-12-30 This book presents cutting edge research on memory in the age of the Internet and social media. The empirical studies reported in the ten chapters address the influence of the digital age on remembering in three broad areas: offloading memory and the associated costs, benefits and boundary conditions; autobiographical memory online; and false memory at a time of fake news and misinformation. These studies employ innovative and rigorous methodological approaches that are ecologically valid in the online context. Their findings reveal complex and dynamic characteristics of human memory in a digitally mediated world that shapes our learning, our sense of self and our beliefs and decision making. Collectively the chapters in this volume provide rich theoretical insights into the workings and functions of memory. This book ushers in a new era of research on memory in the age of digitization. *Memory Online* will be a beneficial read for students and scholars of Psychology, Cognitive Science, Communication and Media Studies. The chapters in this book were originally published as a special issue of *Memory*.
