Searching Teaching Healing:

Marriage A Search For Healing Jerry M. Lewis, 2013-06-17 This work reveals those key elements that make for greater bonding with couples in therapy The author believes that improvement in the couples he treats almost always involves greater closeness and the development of greater capacity for intimacy Change can come about in different ways for different couples For some insight appears to play to play an important role Learning about one s central problematic relationship of childhood and its re enactment with one s partner in adult life frequently involves also learning about the ways one subtly recreates this dysfunctional relationship structure For others improvement appears to be closely related to experiencing new ways of dealing with conflict This avenue of improvement relies in part on the understanding but even more on learning the approaches to conflict resolution It is as if these couples need to hear over and over again the recordings that document their insensitivities and consequent failure They must offer Each Other The Experiences That Are Emotionally Supportive And Crucial for emotional and physical health and also give life its meaning Finally the treatment approach outline also has significant effects on the therapists Indeed it may be difficult to know who learns most Involvement as a couples therapist may have all sorts of impact on the therapists and it will come as surprise that it is in the area of the therapist s capacity for intimacy that the greatest effect can be experienced

Teaching Religion and Healing Linda L. Barnes, Inés M. Talamantez, 2006-10-19 The study of medicine and healing traditions is well developed in the discipline of anthropology Most religious studies scholars however continue to assume that medicine and biomedicine are one and the same and that when religion and medicine are mentioned together the reference is necessarily either to faith healing or bioethics Scholars of religion also have tended to assume that religious healing refers to the practices of only a few groups such as Christian Scientists and pentecostals Most are now aware of the work of physicians who attempt to demonstrate positive health outcomes in relation to religious practice but few seem to realize the myriad ways in which healing pervades virtually all religious systems This volume is designed to help instructors incorporate discussion of healing into their courses and to encourage the development of courses focused on religion and healing It brings together essays by leading experts in a range of disciplines and addresses the role of healing in many different religious traditions and cultural communities An invaluable resource for faculty in anthropology religious studies American studies sociology and ethnic studies it also addresses the needs of educators training physicians health care professionals and chaplains particularly in relation to what is referred to as cultural competence the ability to work with multicultural and religiously diverse patient populations
