Catch documentation schemes for deep-sea fisheries in the ABNJ - Their value, and options for implementation Food and Agriculture Organization of the United Nations,2019-04-15 This paper discusses the potential value of catch documentation schemes CDS in deep sea fisheries and the implementation aspects that have to be taken into account to ensure the effectiveness of this trade based tool to combat illegal unreported and unregulated IUU fishing The paper argues that the schemes are indeed useful for addressing IUU fishing practices known to occur in deep sea fisheries and that their adoption would improve compliance with fisheries management requirements Key infringements that could be directly detected and addressed include but are not limited to violations of closed areas harbouring protected vulnerable marine ecosystems in the deep ocean and quota overfishing The paper also establishes the notion that partial coverage of given species through a CDS at the level of regional fisheries management organizations is incongruous Given that most deep sea fisheries species have broad distributions that straddle many regional organizations the most suitable implementation model appears to be a centrally operated electronic CDS platform called a super CDS shared by a plurality of institutional and state players
