the patron saint of farmers markets by the Guardian and called one of the great food activists by Vanity Fair's David Kamp. Nina Planck was on the vanguard of the real food movement and her first book remains a vital and original contribution to the hot debate about what to eat and why. In lively personal chapters on produce, dairy, meat, fish, chocolate and other real foods, Nina explains how ancient foods like beef and butter have been falsely accused while industrial foods like corn syrup and soybean oil have created a triple epidemic of obesity, diabetes and heart disease. The New York Times said that *Real Food* poses a convincing alternative to the prevailing dietary guidelines even those treated as gospel. A rebuttal to dietary fads and a clarion call for the return to old-fashioned foods, *Real Food* no longer seems radical if only because the conversation has caught up to Nina Planck. Indeed, it has become gospel in its own right. This special tenth anniversary edition includes a foreword by Nina Teicholz, *The Big Fat Surprise*, and a new introduction from the author.

Magnesium is the lamp of life and one of the most important keys to overall health. When applied in the correct way, magnesium offers us a return to strength and vigor. When used in the emergency room, magnesium can save the day for both heart and stroke patients. What you will be introduced to is magnesium oil, a natural concentrated form of magnesium chloride that can be applied directly to the skin for intense effect. When we are deficient in magnesium, over three hundred enzymes in our body are unable to function properly. Magnesium deficiency has been scientifically identified as a critical factor in the onset of a wide variety of diseases. For various reasons and to varying degrees, two thirds or more of the population is magnesium deficient. Learn how to use this powerful secret to good health in *Transdermal Magnesium Therapy*.

Earth Energies Serge Kahili King, 1992-11-01 Examinations and accounts of experimentation with subtle energies. In addition to the scientifically accepted forces of electricity, magnetism and gravity, there are, according to the author, psychoenergetic forces: those that interact with the mind as well as the body. His research deals with the energies behind extraordinary phenomena like non-physical healing, levitation, telekinesis, superstrength and many others in which the mind is always an important factor. He touches on pyramid power, dowsing, feng shui and the use of magnets for healing. These and many more sources may have a single energy in common: the same way different physical elements all have electrons in common. Leave skepticism behind and be fascinated by his examples and observations that may someday prove to be of practical value and no more strange than bread mold being used to cure disease.
