comprehensive process for visualization of interface metaphor for software It is helpful in designing interactive user
interfaces with magical super affordances and definitive user experiences As per the ancient Indian Vedic literature
metaphors are always conceived out of Vastu entities having existence in our world The visualization process given in the
book shows how metaphorization could help in innovating highly experiential user interfaces as one can create Avastu non
entities by combining different objects and imaginative properties together The main highlights of this process are selection
and dissection of interface metaphor pre facto analysis qualitative and quantitative evaluation mapping between user and
application domain lexicons specialized set of usability heuristics and remote usability testing The steps of this process are
integrated with the Software Development Life Cycle SDLC It shows the interdependence of form and function and its
seamless fusion during software engineering User experience designers can apply this process for designing websites online
