From the Steel City to the White City Zachary L. Brodt, 2023-11-21 In *From the Steel City to the White City* Zachary Brodt explores Western Pennsylvania's representation at Chicago's Columbian Exposition the first major step in demonstrating that Pittsburgh was more than simply America's crucible it was also a region of developing culture and innovation The 1893 Columbian Exposition presented a chance for the United States to prove to the world that it was an industrial giant ready to become a global superpower At the same time Pittsburgh a commercial center that formerly served as a starting point for western expansion found itself serving as a major transportation and increasingly industrial hub during this period of extensive growth Natural resources like petroleum and coal allowed Western Pennsylvania to become one of the largest iron and steel producing regions in the world The Chicago fairgrounds provided a lucrative opportunity for area companies not only to provide construction materials but to display the region's many products While Pittsburgh's most famous contributions to the 1893 World's Fair alternating current electricity and the Ferris wheel had a lasting impact on the United States and the world other exhibits provided a snapshot of the area's industries natural resources and inventions The success of these exhibits Brodt reveals launched local companies into the twentieth century ensuring a steady flow of work money and prestige

The Body in the Anglosphere, 1880-1920 Robert W. Thurston, 2021-12-30 Focusing on the body in every chapter this book examines the changing meanings and profound significance of the physical form among the Anglo Saxons from 1880 to 1920 They formed an imaginary but in many ways quite real community that ruled much of the world Among them racism became more virulent To probe the importance of the body this book brings together for the first time the many areas in which the physical form was newly or more extensively featured from photography through literature frontier wars violent sports and the global circus Sex sexuality concepts of gender including women's possibilities in all areas of life and the meanings of race and of civilization figured regularly in Anglo discussions Black people challenged racism by presenting their own photos of respectable folk As all this unfolded

Anglo men and women faced the problem of maintaining civilized control vs the need to express uninhibited feeling. With these issues in mind, it is evident that the origins of today's debates about race and gender lie in the late nineteenth century.

American Endurance Richard A. Serrano, 2016-10-04 Pulitzer Prize winning journalist and author Richard A. Serrano's new book *American Endurance* Buffalo Bill the Great Cowboy Race of 1893 and the Vanishing Wild West is history, mystery and Western all rolled into one. In June 1893 nine cowboys raced across a thousand miles of American prairie to the Chicago World's Fair. For two weeks they thundered past angry sheriffs, governors and Humane Society inspectors intent on halting their race. Waiting for them at the finish line was Buffalo Bill Cody who had set up his Wild West Show right next to the World's Fair that had refused to allow his exhibition at the fair. The Great Cowboy Race occurred at a pivotal moment in our nation's history: many believed the frontier was settled and the West was no more. The Chicago World's Fair represented the triumph of modernity and the end of the cowboy age. Except no one told the cowboys. Racing toward Buffalo Bill Cody and the gold plated Colt revolver he promised to the first to reach his arena, nine men went on a Wild West stampede from tiny Chadron, Nebraska to bustling Chicago. But at the first thud of hooves pounding on Chicago's brick pavement, the race devolved into chaos. Some of the cowboys shipped their horses part of the way by rail or hired private buggies. One had the unfair advantage of having helped plan the route map in the first place. It took three days, numerous allegations and a good old Western showdown to sort out who was first to Chicago and who won the Great Cowboy Race. Mariana Griswold Van Rensselaer Judith K. Major, 2013-04-23 Mariana Griswold Van Rensselaer 1851-1934 was one of the premier figures in landscape writing and design at the turn of the twentieth century, a moment when the amateur pursuit of gardening and the increasingly professionalized landscape design field were beginning to diverge. This intellectual biography, the first in-depth study of the versatile critic and author, reveals Van Rensselaer's vital role in this moment in the history of landscape architecture. Van Rensselaer was one of the new breed of American art and architecture critics, closely examining the nature of her profession and bringing a disciplined scholarship to the craft. She considered herself a professional, leading the effort among women in the Gilded Age to claim the titles of artist, architect, critic, historian, and journalist. Thanks to the resources of her wealthy mercantile family, she had been given a sophisticated European education almost unheard of for a woman of her time. Her close relationship with Frederick Law Olmsted influenced her ideas on landscape gardening, and her interest in botany and geology shaped the ideas upon which her philosophy and art criticism were based. She also studied the works of Charles Darwin, Alexander von Humboldt, Henry David Thoreau, and many other nineteenth-century scientists and nature writers, which influenced her general belief in the relationship between science and the imagination. Her cosmopolitan education and elevated social status gave her much like her contemporary Edith Wharton access to the homes and gardens of the upper classes. This allowed her to mingle with authors, artists, and affluent patrons of the arts and enabled her to write with familiarity about architecture and landscape design. Identifying over 330 previously unattributed editorials and unsigned

articles authored by Van Rensselaer in the influential journal *Garden and Forest* for which she was the sole female editorial voice Judith Major offers insight into her ideas about the importance of botanical nomenclature the similarities between landscape gardening and idealist painting design in nature and many other significant topics Major s critical examination of Van Rensselaer s life and writings which also includes selections from her correspondence details not only her influential role in the creation of landscape architecture as a discipline but also her contribution to a broader public understanding of the arts in America
