Since 1900 the connections between art and technology with nature have become increasingly inextricable Through a selection of innovative readings by international scholars this book presents the first investigation of the intersections between art technology and nature in post medieval times Transdisciplinary in approach this volume's 14 essays explore art technology and nature's shifting constellations that are discernible at the micro level and as part of a larger chronological pattern Included are subjects ranging from Renaissance wooden dolls science in the Italian art academies and artisanal epistemologies in the followers of Leonardo to Surrealism and its precursors in Mannerist grotesques and the

Wunderkammer eighteenth century plant printing the climate and its artistic presentations from Constable to Olafur Eliasson and the hermeneutics of bioart In their comprehensive introduction editors Camilla Skovbjerg Paldam and Jacob Wamberg trace the Kantian heritage of radically separating art and technology and inserting both at a distance to nature suggesting this was a transient chapter in history Thus they argue the present renegotiation between art technology and nature is reminiscent of the ancient and medieval periods in which art and technology were categorized as aspects of a common area of cultivated products and their methods the Latin *ars* the Greek *techné* an area moreover supposed to imitate the creative forces of nature

Atmospheres of Projection Giuliana Bruno, 2022-10-13 Following on the success of *Surface* Bruno's previous book with us in this new one she explores the act and art of projection in its manifold guises and what those can tell us about how we think and feel and create the world we inhabit This is not just an exploration of the psychological operation of projection the idea that we cast onto others the qualities we refuse to acknowledge in ourselves It is a major work of cultural history and media archaeology As a way to transform space and atmosphere projection has a long history in the arts dating back to shadow plays camera obscuras magic lantern shows and phantasmagoria But the atmosphere of projection is not a thing of the past alone It is alive and well today It continues to fascinate us as screens filled with moving figures pervade the spaces of the art gallery and the museum as well as the environments of our daily lives What is the root of our fascination How does it manifest in contemporary art How do we define atmosphere How is projection an atmosphere Are these two modalities conceptually and historically related and how so Why are artists today so interested in environments and in elements of projection To explain this continual fascination with projection and atmosphere Bruno traverses psychoanalysis architecture the history of science visual art and moving
