Privacy And Publicity Modern Architecture As Mass Media:

Privacy and Publicity Beatriz Colomina, 1996-02-28 Through a series of close readings of two major figures of the modern movement Adolf Loos and Le Corbusier Beatriz Colomina argues that architecture only becomes modern in its engagement with the mass media and that in so doing it radically displaces the traditional sense of space and subjectivity Privacy and Publicity boldly questions certain ideological assumptions underlying the received view of modern architecture and reconsiders the methodology of architectural criticism itself Where conventional criticism portrays modern architecture as a high artistic practice in opposition to mass culture Colomina sees the emerging systems of communication that have come to define twentieth century culture the mass media as the true site within which modern architecture was produced She considers architectural discourse as the intersection of a number of systems of representation such as drawings models photographs books films and advertisements This does not mean abandoning the architectural object the building but rather looking at it in a different way The building is understood here in the same way as all the media that frame it as a mechanism of representation in its own right With modernity the site of architectural production literally moved from the street into photographs films publications and exhibitions a displacement that presupposes a new sense of space one defined by images rather than walls This age of publicity corresponds to a transformation in the status of the private Colomina argues modernity is actually the publicity of the private Modern architecture renegotiates the traditional relationship between public and private in a way that profoundly alters the experience of space In a fascinating intellectual journey Colomina tracks this shift through the modern incarnations of the archive the city fashion war sexuality advertising the window and the museum finally concentrating on the domestic interior that constructs the modern subject it appears merely to house *Eileen Gray and the Design of Sapphic Modernity* Jasmine Rault, 2017-07-05 The first book length feminist analysis of Eileen Gray's work *Eileen Gray and the Design of Sapphic Modernity* Staying In argues that Gray's unusual architecture and design as well as its history of abuse and neglect emerged from her involvement with cultures of sapphic modernism Bringing together a range of theoretical and historical sources from architecture and design communication and media to gender and sexuality studies Jasmine Rault shows that Gray shared with many of her female contemporaries a commitment to designing spaces for sexually dissident modernity This volume examines Gray's early lacquer work and Romaine Brooks' earliest nude paintings Gray's first built house E 1027 in relation to Radclyffe Hall and her novel *The Well of Loneliness* and Gray's private house Tempe nbsp Pailla with Djuna Barnes *Nightwood* While both female sexual dissidence and modernist architecture were reduced to rigid identities through mass media women such as Gray Brooks Hall and Barnes resisted the clarity of such identities with opaque non communicative aesthetics Rault demonstrates that by defying the modern imperative to publicity clarity and identity Gray helped design a sapphic modernity that cultivated the dynamism of uncertain bodies and unfixed pleasures which depended on staying in rather than coming out **Some of These Days** James Donald, 2015-04-27 With

portraits of actors dancers architects poets directors and musicians Some of These Days highlights how the so called New Negro Movement of the 1920s reverberated far beyond Harlem to cities such as London Paris Berlin and Vienna to ignite the global renaissance of modernist culture **Architecture since 1400** Kathleen James-Chakraborty,2014-01-01 The first

global history of architecture to give equal attention to Western and non Western structures and built landscapes Architecture since 1400 is unprecedented in its range approach and insight From Tenochtitlan s Great Pyramid in Mexico City and the Duomo in Florence to Levittown s suburban tract housing and the Bird s Nest Stadium in Beijing its coverage includes the world s most celebrated structures and spaces along with many examples of more humble vernacular buildings Lavishly illustrated with more than 300 photographs plans and interiors this book presents key moments and innovations in architectural modernity around the globe Deftly integrating architectural and social history Kathleen James Chakraborty pays particular attention to the motivations of client and architect in the design and construction of environments both sacred and secular palaces and places of worship as well as such characteristically modern structures as the skyscraper the department store and the cinema She also focuses on the role of patrons and addresses to an unparalleled degree the impact of women in commissioning creating and inhabiting the built environment with Gertrude Jekyll Lina Bo Bardi and Zaha Hadid taking their place beside Brunelleschi Sinan and Le Corbusier Making clear that visionary architecture has never been the exclusive domain of the West and recognizing the diversity of those responsible for commissioning designing and constructing buildings Architecture since 1400 provides a sweeping cross cultural history of the built environment over six centuries Architecture's Theory Catherine Ingraham,2023-04-18 A collection of illuminating essays exploring what theory

makes of architecture and what architecture makes of theory in philosophical and materialized contexts From poststructuralism and deconstruction to current theories of technology and nature critical theory has long been closely aligned with architecture In turn architecture as a thinking profession materializes theory in the form of built work that always carries symbolic loads In this collection of essays Catherine Ingraham studies the complex connectivity between architecture s discipline and practice and theories of philosophy art literature history and politics She argues that there can be no architecture without theory Whether considering architecture s relationship to biomodernity or exploring the ways in which contemporary artists and designers engage in figural play Ingraham offers provocative interpretations that enhance our understanding of both critical theory and architectural practice today Along the way she engages with a wide range of contemporary theorists including Giorgio Agamben Judith Butler Jacques Derrida Graham Harman and Timothy Morton considering buildings around the world including the Palace of Culture in Warsaw the Viceroy s House complex in New Delhi Mack Scogin and Merrill Elam s Wolfsburg Science Center project in Germany and the Superdome in New Orleans Approaching its subject matter from multiple angles Architecture s Theory shows how architecture s theoretical and artifactual practices have a unique power to alter culture Beginning Design Technology Mike Christenson,2015-12-22

Beginning Design Technology introduces how design technologies work together including tools materials and software such as Adobe Photoshop Adobe Illustrator Autodesk AutoCAD and others It teaches you how to think about each design tool whether a software program or physical modelmaking so that you will select one for its strengths for a specific task and know when and how to combine it with other tools Topics include working with building information texturing digital and physical artifacts translating information from one form or file format to another constructing at full scale and making digital and physical models Chapter Summaries exercises discussion questions a glossary an appendix of common software commands and an annotated bibliography will help you find what you need quickly and put the information into practice

Architecture as Communication Ross A. Eaman, 2025-04-08 Media theory has long overlooked the built environment and its communicative capacity how built structures and spaces convey meaning through material embodiment and symbolization Architecture as Communication advances the idea that built environments function as media of communication Using practice theory in conjunction with the concept of style this book is anchored in three historical determinants the quest for perfect proportion in buildings the belief in architectural determinism and the ongoing efforts within other media to influence how those who experience built environments understand them Ross Eaman explores how houses schools places of worship factories office buildings stores malls opera houses plazas and parks have meaning for people as subjective life worlds Architecture as Communication proposes media theory that articulates the social construction of meaning as a unique way of understanding the built environment one in which the users and observers of structures and spaces participate along with architects and designers Architecture according to Eaman encompasses the multiplicity of communication as human interaction preparing people for what they are about to encounter signalling how they should act and selectively enabling them to perform their expected role Using examples across many historical periods and cultures Architecture as Communication argues that we judge our built environments by the values they communicate *Weimar Surfaces* Janet Ward, 2001-04-04 This outstanding book has retrieved all the luminous qualities of its subject matter to produce an astonishing revelation of gleaming appearances on splendid display It is unrivalled by any previous study Marcus Bullock coeditor of Walter Benjamin Selected Writings 1913 26 *Weimar Surfaces* creates provocative new connections between the historical constellations that found a privileged expression in Weimar Berlin and the more contemporary debates on the legacies of modernism and modernity A compelling study Sabine Hake author of *The Cinema's Third Machine* Janet Ward's study of Weimar architecture and design is the most comprehensive and integrated study of the surface of Weimar experience yet written A first rate and stimulating book Sander L Gilman coauthor of *Hysteria Beyond Freud* [Sanctioning Modernism](#) Timothy Parker, Monica Penick, Vladimir Kulic, 2014-06-01 In the decades following World War II modern architecture spread around the globe alongside increased modernization urbanization and postwar reconstruction and it eventually won widespread acceptance But as the limitations of conventional conceptions of modernism became apparent

modern architecture has come under increasing criticism In this collection of essays experienced and emerging scholars take a fresh look at postwar modern architecture by asking what it meant to be modern what role modern architecture played in constructing modern identities and who sanctioned or was sanctioned by modernism in architecture This volume presents focused case studies of modern architecture in three realms political religious and domestic that address our very essence as human beings Several essays explore developments in Czechoslovakia Romania and Yugoslavia and document a modernist design culture that crossed political barriers such as the Iron Curtain more readily than previously imagined Other essays investigate various efforts to reconcile the concerns of modernist architects with the traditions of the Roman Catholic Church and other Christian institutions And a final group of essays looks at postwar homebuilding in the United States and demonstrates how malleable and contested the image of the American home was in the mid twentieth century These inquiries show the limits of canonical views of modern architecture and reveal instead how civic institutions ecclesiastical traditions individual consumers and others sought to sanction the forms and ideas of modern architecture in the service of their respective claims or desires to be modern
