**Regional Science Perspectives on Tourism and Hospitality** Mauro Ferrante, Oliver Fritz, Özge Öner, 2020-12-16 This book approaches the tourism and hospitality industry from a regional science perspective By analyzing the spatial context of tourist travels the hospitality sector and the regional impacts of tourist activities it demonstrates the value of the regional science paradigm for understanding the dynamics and effects of tourism and hospitality related phenomena Written by leading regional science scholars from various countries as well as professionals from organizations such as OECD and AirBnB the contributions address topics such as migration new types of accommodation segmentation of tourism demand and the potential use of tracking technologies in tourism research The content is divided into five parts the first of which analyzes spatial effects on the development of firms in the tourism industry while the second approaches temporal and spatial variability in tourism through analytical regional science tools The broader economic and social impacts of tourism are addressed in part three Part four assesses specific tourism segments and tourist behaviors while part five discusses environmental aspects and tourism destination policies The book will appeal to scholars of regional and spatial science and tourism as well as tourism specialists and policymakers interested in developing science and evidence based tourism policies

**Tourism in South and Southeast Asia** C. Michael Hall, Stephen Page, 2012-10-12 Tourism in South and South East Asia is a comprehensive and solid introduction to tourism in South and South East Asia with a specific appeal both to institutions

in the region and other institutions who wish to expose students to one of the most dynamic tourism regions in the world Despite downturns in outbound tourism due to the current economic crisis inbound tourism from outside the region has continued to increase with governments placing more emphasis on the economic significance of tourism than ever Tourism in South and South East Asia is the first tourism book to deal comprehensively with the implications of the Asian economic crisis for tourism With South and South East Asia set to be the fastest growing area of tourism activity in the world well into the next century Tourism in South and South East Asia is an essential text for students both within and outside of this region Dealing with concepts themes and issues which are pertinent to tourism development planning marketing and management these two internationally known authors have produced an authoritative text that covers all aspects of this topic through the use of illustrative and relevant case studies

**Spatial Economic Science** Aura Reggiani, 2012-12-06 With the dawn of the twenty first century comes the awareness that current rapid political economic social and technological transformations will affect our of living by producing new forms of information communications common way market work style and leisure In this context human behaviour will certainly change its fixed parameters It is likely that the relationships between internal structures and external influences between individual components and collective behaviour as well as between multi scale networks and interrelated dynamics will show spatio temporal patterns which will be difficult to predict by means of our usual tools As a consequence academic research is increasingly being required to play an active role in addressing new ways of understanding and forecasting the sets of interacting structures ranging from the technical to the organizational and from the social to the economic and political levels while at the same time incorporating concerns about the new economy environment society information and technology It is now evident that social science especially spatial and economic science needs innovative paths together with continuous cross fertilization among the many disciplines involved In order to investigate these intriguing perspectives we seem to have embarked on an era of methodological reflections rather than developing strong theoretical foundations This volume aims to provide an overview of these new insights and frontiers for theoretical methodological studies and research applications in the space economy

The Future of Urban Form John Brothie, Peter Newton, Peter Hall, Peter Nijkamp, 2017-10-12 This book first published in 1985 explores the ways in which the editors and contributors predicted the urban system shaped by emerging technologies would look like both nationally and internationally The technological changes covered include automation in the secondary sector the effects of energy price rises and threats of shortage and substitution effects in the energy and vehicle technology areas Social and economic factors discussed include unemployment patterns urban activities and lifestyles and their interactions This title will be of interest to students of urban studies

Population Change and the Future of Rural America , 1993 The Routledge Handbook to Regional Development in Central and Eastern Europe Gábor Lux, Gyula Horváth, 2017-07-06 Twenty five years into transformation Central and Eastern European regions have undergone substantial socio economic restructuring integrating

into European and global networks and producing new patterns of regional differentiation and development Yet post socialist modernisation has not been without its contradictions manifesting in increasing social and territorial inequalities Recent studies also suggest there are apparent limits to post socialist growth models accompanying a new set of challenges within an increasingly uncertain world Aiming to deliver a new synthesis of regional development issues at the crossroads between post socialism and post transition this book identifies the main driving forces of spatial restructuring in Central and Eastern Europe and charts the different regional development paths which take shape against the backdrop of post crisis Europe A comparative approach is used to highlight common development challenges and the underlying patterns of socio economic differentiation alike The issues investigated within the Handbook extend to a discussion of the varied economic consequences of transition the social structures and institutional systems which underpin development processes and the broadly understood sustainability of Central and Eastern Europe s current development model This book will be of interest to academics and policymakers working in the fields of regional studies economic geography development studies and policy
