Toxicology, Committee on Air Quality Management in the United States, 2004-09-30 Managing the nation's air quality is a complex undertaking involving tens of thousands of people in regulating thousands of pollution sources. The authors identify what has worked and what has not and they offer wide ranging recommendations for setting future priorities making difficult choices and increasing innovation. This new book explores how to better integrate scientific advances and new technologies into the air quality management system. The volume reviews the three decade history of governmental efforts toward cleaner air discussing how air quality standards are set and results measured the design and implementation of control strategies regulatory processes and procedures special issues with mobile pollution sources and more. The book looks at efforts to spur social and behavioral changes that affect air quality the effectiveness of market based instruments for air quality regulation and many other aspects of the issue. Rich in technical detail this book will be of interest to all those engaged in air quality management scientists engineers industrial managers law makers regulators health officials clean air advocates and concerned citizens.

Energy Futures and Urban Air Pollution Chinese Academy of Sciences, Chinese Academy of Engineering, National Research Council, National Academy of Engineering, Policy and Global Affairs, Development, Security, and Cooperation, Committee on Energy Futures and Air Pollution in Urban China and the United States, 2008-01-22 The United States and China are the top two energy consumers in the world. As a consequence they are also the top two emitters of numerous air pollutants which have local regional and global impacts. Urbanization has led to serious air pollution problems in U.S. and Chinese cities although U.S. cities continue to face challenges the lessons they have learned in managing energy use and air quality are relevant to the Chinese experience. This report summarizes current trends profiles two U.S. and two Chinese cities and recommends key actions to enable each country to continue to improve urban air quality.
