Regional Integrations Africas Dev:

Regionalism, Security and Development in Africa Ernest Tooche Aniche, Ikenna Mike Alumona, Innocent Moyo, 2021-04-29
This book charts the history and contemporary landscape of African regionalism investigating how regional cooperation can be used to help to tackle security and development challenges in Africa. Africa has a long tradition of regional cooperation with the oldest trade and monetary integration schemes in the developing world but its colonial period and partition have caused lasting damage that still be seen in today's African economies. Contemporary post colonial African regionalism deeply rooted in notions of pan Africanism has served as a means of collective self reliance and economic transformation and development. This book starts with the history and theory behind African regionalism before discussing and comparing regional organisations such as the Economic Community of Central African States ECCAS, the Economic Community of West African States ECOWAS, the Community of Sahel Saharan States CEN SAD, Southern African Development Community SADC, the Common Market for Eastern and Southern Africa COMESA and the East African Community EAC. Finally the book considers how regional integration and cooperation can help to address security and development challenges. This ambitious and broad ranging book will be a valuable resource for researchers working on African regionalism, security, African integration and development and comparative regionalism. Policymakers should also consider it a useful guide to the background and contemporary landscape of African regionalism.

Africa's Progress in Regional and Global Economic Integration - Towards Transformative Regional Integration Achim Gutowski, Tobias Knedlik, Patrick N. Osakwe, Isabelle Ramdoo, Karl Wohlmuth, 2016. Based on Africa's deep rooted structural problems the key aspect of a transformative regional integration is how to promote structural transformation by adapted strategies and policies for the African regional economic communities for the Continental Free Trade Area and for the Tripartite Free Trade Area. Regional integration in Africa is based on a conventional linear model starting with trade preference zones and moving to free trade areas, customs unions and monetary and economic zones with the ultimate goal to reach political unity. Specific problems of a more transformative regional integration agenda are discussed such as food security and agriculture, industry development, enterprise growth and competition and economic partnership agreements with extra regional partners. In the final section the impact of three global value chains of importance for Africa: diamonds, shea butter and sesame are considered on regions, on sub regions and on regional integration. Series: African Development Perspectives Yearbook Vol 18. Subject: African Studies Economics.
