Regional Satellite Oceanography

Robin A. Vaughan, Arthur P. Cracknell

Regional Satellite Oceanography:

Regional Satellite Oceanography Serge Victorov, 2003-09-02 This work addresses the whole range of problems relating to the application of satellite technology to studies of regional seas and sea phenomena the Gulf Stream the Kuroshia Current and coastal zones It argues that to emphasize global applications is to fail to take into account fundamental idiosyncracies specific to the regional perspective In addition it describes implementation techniques data gathering in situ data assurance algorithms for parameter retrieval data storage and data output The book contains satellite imagery and incorporates case studies from areas such as the Baltic and the Black Sea

Physical Processes in the Coastal Zone Arthur P. Cracknell, E.S. Rowan, 1989-01-01 As people come to realize the importance of the environmental impact of human activities the study of the coastal zone has become increasingly important In addition new environmental legislation at regional national and international levels will doubtless highlight the importance of a fuller understanding of the coastal areas Together these factors have led to substantial new requirements for the acquisition and monitoring of relevant environmental information and for a fuller understanding of the processes at work for which the use of remote sensing techniques is essential To meet the requirements of this emerging discipline **Physical Processes in the Coastal Zone** Computer Modelling and Remote Sensing integrates basic physical processes with extensive information from remote sensing systems such as those on aircraft and spacecraft It covers the physical processes that occur in the coastal zone an area in which 60% of the world's population live Written by international experts the text provides a comprehensive graduate level introduction and overview that is suitable both for those entering the field and for those already working within it

Remote Sensing and Global Climate Change Robin A. Vaughan, Arthur P. Cracknell, 2013-06-29 Experts report the state of the art in the study of global climate change using remote sensing techniques Topics covered include the principles of remote sensing the management of data data requirements in climatology the principles of modelling the input of data into models and the application of remote sensing to the atmosphere ice and snow seas and land The book is highly topical given the current great public and scientific awareness of possible man made changes to the climate It is essential reading for anyone new to the field and invaluable as a reference work to those already working in it

ENVIRONMENTAL INDICES : SYSTEMS ANALYSIS APPROACH - Volume I Yuri A. Pykh, D. Eric Hyatt, Roman J. M Lenz, 2000-09-19 Environmental Indices Systems Analysis Approach examines the theoretical development of environmental indices and their practical application Indicators can be powerful tools in guiding data and information collection processes and careful development will lead to more focused and cost effective global monitoring and observing systems at international level The authorship is drawn from a group of internationally distinguished scientists and researchers who are

actively working towards a comprehensive set of tools and protocols such as simulation models fuzzy clustering analysis and GIS methodologies that will lead to the development of meaningful environmental indices This book will be a vital reference work for students teachers and researches together with policy makers planners and all professional involved in development programs

Indian Ocean Region Manoj Gupta,2010-08-09 It is a privilege to introduce the reader to this book as I believe that it will make a significant contribution to given the difficulties in the knowledge of the Indian Ocean developing cooperation in the Indian Ocean region There have been numerous failed efforts at regional cooperation in different fora in the Indian Ocean As a result of the land based orientation of the people in the region the importance for countries to develop the power to govern the sea has largely been ignored The maritime approach taken by Manoj Gupta to the Indian Ocean as a region in international relations offers a timely and critical assessment of the potential for regional cooperation and ocean governance The political leadership in the region can no longer ignore the need for cooperation in maritime affairs in the Indian Ocean This book enriches the literature on Indian Ocean issues as it argues convincingly that the security of nations economic well being of the people and health of the Indian Ocean cannot be divested from one another All are fundamentally dependant on the ability of the countries in the region to individually and collectively exert the power to govern the sea

Digital Remote Sensing Prithvish Nag,M. Kudrat,1998 **Limnology and Remote Sensing** K.Ya. Kondratyev,Nikolai Filatov,1999-05-01 Diminishing water resources are becoming of increasing concern because in many countries the sources of drinking water are close to being exhausted Therefore there is an urgent need to study and assess the various components of global water resources of which freshwater lakes are one of the most important This book discusses contemporary limnological problems on a local regional and global scale with special emphasis on the application of remote sensing techniques to monitor lake dynamics thermodynamics biodynamics and water quality An interactive approach is used to assess various processes from both the numerical modelling and observational standpoints The authors recommend a combined use of in situ and remote sensing data giving a specific comparative analysis of the lakes of north western Russia and the American Great Lakes as an illustration The role of GIS is discussed and emphasised

Environment, Energy and Natural Resource Management in the Baltic Region Jes Fenger,Kirsten Halsnæs,Hans Larsen,Henning Schroll,Victor

Vidal,1991 **Naval Research Reviews** ,1999 **State and Evolution of the Baltic Sea, 1952-2005** Rainer Feistel,Günther Nausch,Norbert Wasmund,2008-03-31 Based on a fifty year study conducted by the Leibniz Institute for Baltic Sea Research this book brings together a comprehensive summary of their observations and findings Written by well known experts this revealing book concentrates on long term changes in the Baltic Sea which can be extrapolated to shed light on the environmental problems of other shelf seas brackish seas and large estuaries thereby contributing to our understanding of water exchange processes eutrophication and climatic impacts at the forefront of international concern

Marine and Coastal Geographical Information Systems Dawn J. Wright,Darius J. Barlett,1999-12-23 Marine and

coastal applications of GIS are finally gaining wide acceptance in scientific as well as GIS communities and cover the fields of deep sea geology chemistry and biology and coastal geology biology engineering and resource management Comprising rigorous contributions from a group of leading scholars in marine and coastal GIS this book will inspire and stimulate continued research in this important new application domain Launched as a project to mark the UN International Year of the Ocean 1998 and supported by the International Geographical Union s Commission on Coastal Systems this book covers progress and research in the marine and coastal realms in the areas of theory applications and empirical results It is the first book of its kind to address basic and applied scientific problems in deep sea and coastal science using GIS and remote sensing technologies It is designed for GIS and remote sensing specialists but also for those with an interest in oceans lakes and shores Coverage ranges from seafloor spreading centres to Exclusive Economic Zones to microscale coastal habitats and techniques include submersibles computer modelling image display 3 D temporal data visualization and development and application of new algorithms and spatial data structures It illustrates the broad usage of GIS image processing and computer modelling in deep sea and coastal environments and also addresses important institutional issues arising out of the use of these technologies

Hyperspectral Remote Sensing and Spectral Signature Applications S. Rajendran, 2009
Contributed papers presented at the National Seminar on Hyperspectral Remote Sensing and Spectral Signature Database Management System held on February 14 15 2008 at Annamalai University *Remote Sensing of the Ocean, Sea Ice, and Large Water Regions*, 2005 *Oceanography from Space*, 1984 *The Baltic Sea Basin* Jan Harff, Svante Björck, Peer Hoth, 2011-04-15 This book reports about the results of a Special Symposium The Baltic Sea Basin held on August 11 2008 within the frame of the 33rd IGC at Oslo Norway in order to foster the understanding of the Baltic Basin as a unit in terms of genesis structure ongoing processes and utilization It is the first time that in a joint publication scientists from different disciplines give a comprehensive overview about the Baltic Sea basin in such a general sense The book will be used not only by students and scientist but also by engineers and decision makers from industry and politics Summarizing the state of the art in the investigation of the Baltic Sea Basin but also in the resource utilisation of the basin the book will enhance the development of new monitoring strategies and technical device design including satellite observation methods the establishment of international research laboratories innovative topics for interdisciplinary research projects etc
