are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs      *Knowledge Cities* Francisco

Carrillo,2006-08-14 Knowledge Cities are cities that possess an economy driven by high value added exports created through research technology and brainpower In other words these are cities in which both the private and the public sectors value knowledge nurture knowledge spend money on supporting knowledge dissemination and discovery ie learning and innovation and harness knowledge to create products and services that add value and create wealth Currently there are 65 urban development programs worldwide formally designated as knowledge cities Knowledge based cities fall under a new area of academic research entitled Knowledge Based Development which brings together research in urban development and urban studies and planning with knowledge management and intellectual capital In this book Francisco Javier Carrillo of the Monterrey Institute of Technology ITESM brings together a group of distinguished scholars to outline the theory development and realities of knowledge cities Based on knowledge based development the book shows how knowledge can be and is placed at the center of city planning and economic development to enable knowledge flows and innovation to provide a sustainable environment for high value added products and services      **The New Economy and Macroeconomic Stability** Dario Togati,2013-03-07 The past decade has seen many leading economies especially the US undergo profound structural transformations Departing from the standard theories employed to explain this phenomenon here author Togati provides the first broad analysis of the New Economy In this book the first to look at the new economy from a post Keynesian post modern perspective he focuses on its macroeconomic implications presenting a more balanced view than that provided by orthodox neoclassical analysis and studying the interaction of key variables such as information technology globalization the increasing significance of intangibles and financial markets This ground breaking book utilizes a neo modern perspective drawing on complexity theory to advance the study of the stability and dynamic behaviour of economic systems Togati utilizes the Calvo labels to identify new empirical evidence and examines the implications for global stability based on New Classical Macroeconomics and Keynesian theory The analysis developed in this book has important practical and policy implications for the New Economy making this book essential reading for students academics and practitioners in this field

*Productivity Perspectives* Philip McCann,Tim Vorley,2020-03-28 Productivity Perspectives offers a timely and stimulating social science view on the productivity debate drawing on the work of the ESRC funded Productivity Insights Network The book examines the drivers and inhibitors of UK productivity growth in the light of international evidence and the resulting dramatic slowdown and flatlining of productivity growth in the UK The reasons for this so called productivity puzzle are not well understood and this book advances explanations and insights on these issues from different disciplinary and methodological perspectives It will be of value to all those interested in and engaging with the challenge of slowing productivity growth      **Knowledge Economies** Philip Cooke,2002-09-10 This book traces the theoretical explanation for

clusters back to the work of classical economists and their more modern disciples who saw economic development as a process involving serious imbalances in the exploitation of resources Initially natural resource endowments explained the formation of nineteenth and early twentieth century industrial districts Today geographical concentrations of scientific and creative knowledge are the key resource But these require a support system ranging from major injections of basic research funding to varieties of financial investment and management to the provision of specialist incubators for economic value to be realised These are also specialised forms of knowledge that contribute to a serious imbalance in the distribution of economic opportunity

**Multinational Enterprises and Innovation** Martin Heidenreich, Christoph Barmeyer, Knut Koschatzky, Jannika Mattes, Katharina Krüth, Elisabeth Baier, 2011-09-27 The crucial actors of a global knowledge based economy are multinational enterprises MNEs MNEs depend on the embeddedness in an institutional framework their competitive advantage depends on the cross border utilisation of regional and national capabilities The innovativeness of a company is therefore based also on regional innovation systems Multinational Enterprises and Innovation contributes to a better understanding of the interconnectedness between organisational and regional learning On the basis of case studies in Germany and France this volume investigates how MNEs cope with technical economic and institutional uncertainties by drawing upon the complementary strengths of organisational and regional networks in national and European contexts The book links two theoretical debates which are currently still largely disconnected the debate on learning processes in MNEs and the debate on the regional bases of innovativeness and competitiveness answering the question of how the internationalisation of R D is reconciled with regional competences

*Global and Regional Dynamics in Knowledge Flows and Innovation* Chris Van Egeraat, Dieter Kogler, Phil Cooke, 2015-10-14 Innovation which in essence is the generation of knowledge and its subsequent application in the marketplace in the form of novel products and processes has become the key concept in inquiries concerning the contemporary knowledge based economy Geography plays a decisive role in the underlying processes that enable and support knowledge formation and diffusion activities Place specific characteristics are considered especially important in this context however more recently investigation into innovative capacity of places has also turned its attention to external knowledge inputs through innovation networks and increasingly recognize the evolutionary character of the processes that lead to knowledge creation and subsequent application in the marketplace The chapters that comprise this book are embedded at the intersection of the dynamic processes of knowledge production and creative destruction The first three contributions all discuss the role of global innovation networks in the context of territorial and or sectoral dynamics while the following two chapters investigate the evolution of regional or metropolitan knowledge economies The final three contributions adopt a knowledge base approach in order to provide insight into the organisation of innovation networks and spatiality of knowledge flows This book was published in a special issue of European Planning Studies

The Dynamics of the Innovation Divide between China and Europe Arkadiusz Michal Kowalski, 2022-03-13 This

book examines the problem of the innovation divide in the world economy and convergence in innovation performance between leaders and followers analysed through the prism of Chinese experiences and explored from an European Union EU perspective The rationale for research conducted in this book is an observation of a significant change in the geography of world innovation reflected in the emergence of innovation hubs in developing countries and in the shift of manufacturing activity including high and medium high technology industries to emerging economies mainly China The book analyses the factors of Chinese innovation success in recent decades such as China s science technology and innovation policy increased R D expenditures human capital development and the development of clusters and highly specialized industries It also focuses on the challenges for developed European economies which are being at risk of losing their knowledge related sources of competitive advantage It also offers recommendations for future policy actions The book s analysis goes beyond a cross country comparison taking into account a regional perspective The reason for this regional dimension is the increasingly recognized importance of proximity in stimulating innovation processes and an observed strong geographical polarization of innovation activity at specific regions seen in the emergence of clusters particularly visible in China The monograph will provide an up to date reference for academics and students across a variety of disciplines It will be of particular interest to researchers in the area of innovation and practitioners doing business in China as well as policymakers at international national and regional levels involved in designing and implementing innovation policy

*Global Information Society* Mark I. Wilson,Aharon Kellerman,Kenneth E. Corey,2013-04-11 We have been living and working in the information society for decades yet still we struggle to understand and keep up in the face of its constant flux and vast scope In this unique interdisciplinary text three scholars at the forefront of this dynamic field provide a clear conceptual framework and interpretation of the global information society They explain the three pillars of the information society technology knowledge and mobility and the global information society as a whole both as an interconnected web and a regionally distinct phenomenon Offering a nuanced understanding of this complex subject this book will enable students to navigate and thrive in the dynamic and evolving world of information and communication technology

Industrial Agglomeration and New Technologies Masatsugu Tsuji,Emanuele Giovannetti,Mitsuhiro Kagami,2007 the book is an interesting collection of anecdotal evidence the book makes for interesting reading both from the point of view of case studies and in terms of empirical methodological applications Silvia Grandi Economic Geography Research Group This is a valuable book The individual chapters contain original case study evidence and analytical insights it is one that should be consulted by any scholar working in the area of industrial agglomerations and new technology Simona Iammarino Economic Geography This book a collaborative effort by researchers from Japan Italy and the USA seeks to explore the reasons for industrial clustering in certain regions of Asia Europe and North America The studies presented illustrate real examples of industrial clusters adding anecdotal evidence to the emerging theory of economic geography by exemplifying the centripetal and centrifugal

forces that regulate the clustering process The authors examine clusters in a diverse set of countries including China Italy Japan Mexico South Korea the USA and Vietnam Significantly the book provides an interesting split between studies of IT and software related industries and more traditional sectors such as steel and vehicle manufacturing Industrial Agglomeration and New Technologies pays attention to a varied array of factors that influence clustering such as knowledge spillovers tacit knowledge communication and transport costs and the effects of various government policies The case studies provide useful examples for government and industry leaders as well as a starting point for researchers seeking an ultimate answer to the question Why do firms form clusters

### **The Empirical and Institutional Dimensions of Smart**

**Specialisation** Philip McCann, Frank van Oort, John Goddard, 2016-11-25 Smart specialisation is the new policy approach to the development of regional innovation systems across Europe and it involves fostering innovative and entrepreneurial initiatives which are well tailored to the local context The different technologies skills profiles business activities institutions and sectors which reflect a region's economic strengths and potential are to be fostered and encouraged to diversify in ways which also exploit the region's linkages with broader global value chains Yet the ideas contained in the smart specialisation agenda have until now been primarily conceptual in nature The Empirical and Institutional Dimensions of Smart Specialisation draws together some of the leading regional economists and scientists in Europe to analyse how smart specialisation is working in practice This book investigates different dimensions of the agenda as it is developing across parts of Europe from both quantitative and qualitative perspectives The quantitative analysis examines the nature of the diversification processes undertaken by regions and the interplay between the chosen local regional development priorities and the wider global value chain impacts of these choices Meanwhile the qualitative analysis examines the institutional opportunities and challenges facing policy makers and the key elements most likely to provide the underpinnings of a workable set of policy settings The book is aimed both at academic researchers interested in the interface between economic geography and regional innovation systems as well as at policy makers making public policy decisions related to regional development at the local city regional or national levels

### **Architects of Growth?** Francis E Hutchinson, 2013-12-05

Once acting as local representatives of the national government and content to let their larger counterparts do the heavy lifting state and provincial governments are increasingly expected to be stewards of their economies and deliver sustained growth rates for their citizens Spurred on by increasing competition not least from neighbouring territories sub national governments are increasingly formulating their own plans for economic development taking out loans investing in specialist facilities and establishing marketing offices abroad Despite this increasingly challenging environment there is little research on what sub national governments can or should do to catalyze the development of their economies Focussing on the electronics sector this book draws together ten cases of promising states or provinces largely but not exclusively from Asia These dynamic regions have managed to outcompete the primary economic and political centres of power in their countries

and are negotiating their own entry into one of the most challenging and demanding sectors In exploring the issues of agency autonomy and state business relations at the sub national level this book aims to shed light on a vital but overlooked topic
