

However, the term is not unanimously defined in the literature. The concept appears in an overlapping way with the notion text, and the two terms are even used synonymously. Yet at other places they convey contrastive shades of meaning (Károly, 2007). Widdowson (1996) applies the term text to the product of the process of discourse, de Beugrande and Dressler (1981) argue that a text is the product itself and the process as well. There is no consensus whether the terms mean written or spoken products either. Some linguists differentiate the two terms as a text being written while discourse being spoken (Coulthard, 1985; Sanders & Sanders, 2006). Nevertheless, others use both terms for written and spoken products (Ford et al, 2001; Trask, 1999). Some even argue that the terms discourse and text are such elemental and underlying ones that their nature cannot be defined categorically with certainty, which in turn might help new theories emerge relying on slightly different connotations of the terms (Kocsány, 2002). The present research follows the de Beugrandian tradition (1981) as far as treating the technical term text as a communicative event that is both a product and a process, as well as using the term discourse synonymously with text (de Beugrande, 1997). Considering the nature of communication, the current investigation is in the wake of Trask (1999) by applying the two compatible terms for written and spoken processes and products alike.

2.3 Genre and register

2.3.1 Genre and register as overlapping concepts

Certain instances of communicative events and a number of discourse samples or texts display several kinds of similarities. Based on these similarities, they might be labelled as belonging to one common class: a genre, traditionally a literary construct (Hyon, 1996), or a register. According to Swales (1981, 1986, 1990), whose research has been seminal in shaping genre theory, the crucial similarity that groups a pool of discourse items in a shared

Cross-Linguistic Variation in System and Text Elke Teich, 2012-02-13 The intuition that translations are somehow different from texts that are not translations has been around for many years but most of the common linguistic frameworks are not comprehensive enough to account for the wealth and complexity of linguistic phenomena that make a translation a special kind of text The present book provides a novel methodology for investigating the specific linguistic properties of translations As this methodology is both corpus based and driven by a functional theory of language it is powerful enough to account for the multi dimensional nature of cross linguistic variation in translations and cross linguistically comparable texts

Accessibility and Acceptability in Technical Manuals Inger Lassen, 2003 Accessibility and Acceptability in Technical Manuals is written for an audience with a general interest in readability studies linguistics and technical writing With the main emphasis on technical manuals the book is primarily targeted at those who have a special interest in the design and use of utility texts and how these texts are received and understood by a multifaceted audience Accessibility is not a new research area and many explanations have been offered over the past years as to why non experts often have difficulties in comprehending texts written by technological experts This book offers a new approach to accessibility studies by exploring not only style but also attitudes to style by asking text consumers which style they prefer for different parts of the manual A key role is played by the Systemic Functional Linguistics notion of grammatical metaphor a stylistic choice that is commonly used in technical literature Grammatical metaphor although apparently obstructing the comprehension process of some readers is a common element in the preferred style that separates the insiders from the outsiders An explanation of this rather surprising result is offered by resorting to Critical Discourse Analysis

Register Variation in Indian English Chandrika Balasubramanian, 2009 Register Variation in Indian English constitutes the first large scale empirical investigation of an international variety of English Using a combination of the corpus compiled for this project and relevant sections of ICE India as its database this work tests existing descriptions and characterizations of English in India and provides the first empirical account of register variation in Indian English or indeed any international variety of English Included in this survey are linguistic features that have been examined before and others that have not From an empirical standpoint it comments on the process of Indianization of the English used in India The book will be of interest to readers beyond specialists of Indian English as it is one of very few studies to undertake a large scale corpus analysis for the purpose of dialect research The book provides a model on which future studies of international Englishes can be based

Pang, 2018-05-24 Written at a time when his ideas and practices were provoking opposition even from fellow Christians the Apostle Paul articulates in his Letter to the Romans his understanding of God s plan for humanity and discusses the implications of this plan for different groups of people Romans is considered by many as the most theologically significant and sophisticated book of the Bible This volume is designed to bridge the gap between studying Romans as an academic enterprise and experiencing how Romans can speak today in the life of the church All of the chapters in this volume especially those devoted to the content of Romans were written with both exegesis and application in mind All of the contributors to this volume believe that Romans has a crucial voice within the church today and that those who preach teach and study the book need to be attentive to its witness and to its timeliness
