*Information Technology Law in Australia* George Cho, 2023-01-20 Derived from the renowned multi volume International Encyclopaedia of Laws this practical guide to information technology law the law affecting information and communication technology ICT in Australia covers every aspect of the subject including the regulation of digital markets intellectual property rights in the digital context relevant competition rules drafting and negotiating ICT related contracts electronic transactions and cybercrime Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure Following a general introduction the monograph assembles its information and guidance in six main areas of practice 1 the regulatory framework of digital markets including legal aspects of standardization international private law applied to the online context telecommunications law regulation of audio visual services and online commercial platforms 2 online public services including e government e health and online voting 3 contract law with regard to software hardware networks and related services with special attention to case law in this area rules with regard to electronic evidence regulation of electronic signatures online financial services and electronic commerce 4 software protection legal protection of databases or chips and other intellectual property matters 5 the legal framework regarding cybersecurity and 6 the application of criminal procedure and substantive criminal law in the area of cybercrime Its succinct yet scholarly nature as well as the practical quality of the information it provides make this monograph a valuable time saving tool for business and legal professionals alike Lawyers representing parties with interests in Japan will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field

### **The Regulation of Digital Technologies in the EU**

Vagelis Papakonstantinou, Paul De Hert, 2024-03-19 EU regulatory initiatives concerning technology related topics have spiked over the past few years On the basis of its Priorities Programme which is focused on making Europe Fit for the Digital Age the European Commission has been busily releasing new texts aimed at regulating a number of technology topics including data uses online platforms cybersecurity and artificial intelligence This book identifies three phenomena which are common to all EU digital technologies relevant regulatory initiatives actification GDPR mimesis and regulatory brutality These three phenomena serve as indicators or early signs of a new European technology law making paradigm that now seems ready to

emerge They divulge new found confidence on the part of the EU digital technologies legislator who has now asserted for itself the right to form policy options and create new rules in the field for all of Europe Bringing together an analysis of the regulatory initiatives for the management of technology topics in the EU for the first time this book will be of interest to academics policymakers and practitioners sparking academic and policymaking interest and discussion Cybersecurity Awareness Jerry Andriessen,Thomas Schaberreiter,Alexandros Papanikolaou,Juha Rönning,2022-06-30 This contributed volume tells the story of the establishment of a cybersecurity awareness framework for organizations and how it was piloted in two public sector municipal contexts It presents a clear picture of cybersecurity issues in municipalities and proposes a socio technical solution for creating cybersecurity awareness how to build the solution and what the impact is on the municipal contexts The 9 chapters for this book also provide information regarding the design the deployment and the evaluation of the technology This book builds on the success of the European Horizon 2020 research and innovation project CS AWARE The research proposes the first cybersecurity situational awareness solution for local public administrations based on an analysis of the context provides automatic incident detection and visualization and enables information exchange with relevant national and EU level authorities involved in legislation and network security Cybersecurity is one of the most challenging security problems for commercial companies NGOs governmental institutions as well as individuals Reaching beyond the technology focused boundaries of classical information technology IT security cybersecurity includes organizational and behavioral aspects of IT systems and that needs to comply to legal and regulatory framework for cybersecurity While large corporations might have the resources to follow those developments and bring their IT infrastructure and services in line with the requirements the burden for smaller organizations like local public administrations will be substantial and the required resources might not be available New and innovative solutions that would help local public administration to ease the burden of being in line with cybersecurity requirements are needed This book targets researchers working in cybersecurity computer scientists social scientists and advanced level students studying computer science and other related disciplines Cybersecurity professionals as well as professionals working in local government contexts including policy makers communication experts and system administrators will also benefit from this book Media and Cultural Policy in the European Union ,2015-06-29 The areas of media and cultural policy offer a unique prism through which to understand wider processes of European integration Questions of European identity citizenship and community or polity building clearly resolve themselves as questions of the non emergence of a European communicative space At the same time as a more specific area of policy study the role which has or may be played by the European institutions themselves in the fostering of such a communicative space raises questions as to both the effectiveness and the legitimacy of their interventions This volume in the European Studies series brings fresh interdisciplinary insight into this relatively understudied area making the case for a renewed look at the trajectory of cultural and media policies in the EU

Distinctively the collection offers a historical and socio political analysis of major media policies in the European Union allowing for the contextualisation of recent developments turns its attention to areas largely neglected by scholarly publishing such as the press the culture of the newsroom and the role of media in an enlarged Europe and addresses media and cultural policies as an interrelated part of EU construction through questions of identity and political representation Media and Cultural Policy in the European Union will be of interest to scholars and students of Cultural and Media Studies European Studies and European Integration as well as appealing to broader Social Science audiences concerned with the politics and policy of cultural diversity
