Regulatory Reform And Labor Markets:

Regulatory Reform and Labor Markets James Peoples,1997-11-30 Regulatory reform represents a major shift in the government's role toward price determination in the transportation and telecommunication industries. The resulting policy emphasizes dependence on market forces to set prices and to encourage efficient production techniques. While extensive research investigates the influence of deregulation on prices, profits, and productivity, the effect on labor markets has not received the same scrutiny. Firms in these industries are of major importance to business operations in other industries because they provide the critical services of transporting goods and transmitting information. This may partly explain such extensive research on the product market aspects of regulatory reform. Examining labor markets in the transportation and telecommunications industries is also highly warranted as historically these industries represented some of the most heavily unionized sectors in the economy. The extent to which regulatory reform has encouraged product market competition may not necessarily result in the same degree of competition across industries. Regulatory Reform and Labor Markets debates the notion that research on regulatory reform and labor markets should develop within the framework of the competitive model. This is achieved by presenting diverging views on wage and employment determination in distinctly different deregulated industries.

Transportation Labor Issues and Regulatory Reform James H Peoples, Wayne K Talley,2004-08-24 Regulatory reform in the late 1970s and early 1980s vastly transformed the labor market for transportation workers. Most research in this area focuses on the effect of deregulation on the earnings of nonmanagement company workers in airline, trucking, and rail. Deregulation of transportation industries though has had a broader effect on workers. For instance, deregulation also influences workers' hours worked per week, working conditions, worker safety, and a

host of other labor issues Deregulation might also influence the earnings of managers and self employed workers in transportation industries Examining these issues is valuable because such analysis provides a more complete assessment of labor market changes following the shift to a more market oriented business environment Transportation Labor Issues and Regulatory Reform adds to the debate on deregulation s influence on transportation labor markets by presenting empirical evidence on an array of labor market outcomes in transportation industries Contributions to this volume are categorized by their analysis on worker safety working conditions and employment opportunities and by their analysis on managerial and self employed earnings

Implementing Regulatory Reform: Building the Case Through Results Proceedings of the Meeting of the Group on Regulatory Policy, OECD, Paris, December 2007 OECD,2008-08-01 This report discusses some of the major challenges for implementing regulatory reform from a political perspective It draws on the experience and evidence from OECD countries when building the case through results and developing strategies for Reforming the Labor Market in a Liberalized Economy Gustavo Márquez,1995 In addition countries must produce a transparent atmosphere that depoliticizes contract disputes and negotiations Finally they must reform and strengthen institutions responsible for labor policies OECD Reviews of Regulatory Reform: Regulatory Reform in Japan 1999 OECD,1999-07-30 OECD s 1999 review of regulatory reform in Japan Monthly Labor Review United States.
