Disability Dialogues Andrew J. Hogan, 2022-11-29 A historical look at how activists influenced the adoption of more positive inclusive and sociopolitical views of disability Disability activism has fundamentally changed American society for the better and along with it the views and practices of many clinical professionals After 1945 disability self advocates and family advocates pushed for the inclusion of more positive inclusive and sociopolitical perspectives on disability in clinical research training and practice In Disability Dialogues Andrew J Hogan highlights the contributions of disabled people along with their family members and other allies in changing clinical understandings and approaches to disability Hogan examines the evolving medical social and political engagement of three postwar professions clinical psychology pediatrics and genetic counseling with disability and disability related advocacy Professionals in these fields historically resisted adopting a more inclusive and accepting perspective on people with disabilities primarily due to concerns about professional role identity and prestige In response to the work of disability activists however these attitudes gradually began to change Disability Dialogues provides an important contribution to historical sociological and bioethical accounts of disability and clinical professionalization Moving beyond advocacy alone Hogan makes the case for why present day clinical professional fields need to better recruit and support disabled practitioners Disabled clinicians are uniquely positioned to combine biomedical expertise with their lived experiences of disability and encourage greater tolerance for disabilities among their colleagues students and institutions

Practical Urology in Spinal Cord Injury Keith F. Parsons, John M. Fitzpatrick, 2013-06-29 In keeping with the aims of other books in this Series the Editors have concentrated on the practical aspects of management in this case of the urinary tract in patients with spinal cord injury It is well accepted that the management of such patients is best done by those with special experience in this field Nevertheless it is essential that urologists should be well informed on matters relating to the neuropathic urinary tract since not all patients will be managed in special centres and whether their problems are acute or chronic the wrong clinical decision can lead them into a lifetime of problems The plan of this book is directed towards examining particular problems and providing definitive answers Even in this enlightened age of medical progress there are many clinical situations where there is often a choice of treatment Readers of this Series will be aware that despite an apparent abundance of information on a topic it is sometimes not possible to reach a firm conclusion on a management problem Keith Parsons and John Fitzpatrick are to be congratulated on ensuring that for this subject there are good clear guidelines The data in the book are up to date and the excellent approach to the subject makes it a valuable addition to Clinical Practice in Urology
