Elementary Social Studies S.G. Grant, Bruce A. VanSledright, 2014-03-14 Organized around four commonplaces of education learners and learning subject matter teachers and teaching and classroom environment Elementary Social Studies provides a rich and ambitious framework to help social studies teachers achieve powerful teaching and learning results By blending the theoretical and the practical the authors deeply probe the basic elements of quality instruction planning implementation and assessment always with the goal of creating and supporting students who are motivated engaged and thoughtful Book features and updates to the third edition include New chapter on classroom assessment that outlines and compares existing assessment strategies contextualizes them within the framework of state standards and articulates a constructivist approach that moves away from traditional high stakes testing towards more meaningful ways of evaluating student learning New chapter that highlights and explains key elements of the Common Core State Standards for English Language Arts and shows how the incorporation of critical ELA instruction into the social studies curriculum can foster more ambitious teaching and learning Real classroom narratives that introduce each chapter and provide in depth access to teaching and learning contexts Practical curriculum and resource suggestions for the social studies classroom End of chapter summaries and annotated teaching resources

Encyclopedia of Primary Prevention and Health Promotion Thomas P. Gullotta, Martin Bloom, 2003-01-31 Foundational topics such as history ethics and principles of primary prevention as well as specific issues such as consultation political issues and financing The second section addresses such topics as abuse depression eating disorders HIV AIDS injuries and religion and spirituality often dividing such topics into separate entries addressing childhood adolescence and adulthood

Encyclopedia of the Sciences of Learning Norbert M. Seel, 2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over

the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its naive theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences
