*Relating Theory and Data* Stephan Lewandowsky, William E. Hockley, 2013-06-17 This festschrift represents the proceedings of a conference held in honor of Bennet B Murdock one of the foremost researchers and theoreticians on human memory and cognition A highly renowned investigator respected for both his empirical and theoretical contributions to the field Murdock summarized and focused a large amount of research activity with his 1974 book *Human Memory Theory and Data* This unique collection of articles addresses many of the issues discussed in his classic text Divided into five principal sections its coverage includes theoretical perspectives on human memory ranging from a biological view to an exposition of the value of formal models recent progress in the study of processes in immediate memory and recognition memory and new developments in componential and distributed approaches to the modeling of human memory Each section concludes with an integrative commentary provided by some of Murdock's eminent colleagues from the University of Toronto Thus this book offers a diversity of perspectives on contemporary topics in the discipline and will be of interest to students and scholars in all branches of cognitive science

**Relating Theory and Data** Bennet Bronson Murdock, 1991 First Published in 1991 Routledge is an imprint of Taylor Francis an informa company On Human Memory Chizuko Izawa, 1999-04 This volume honors the Atkinson Shiffrin model of memory proposed in 1968 with chapters that critique extend and build off this influential development in cognitive psychology For memory researchers cognitive scientists historians of psychology

Principles of Memory Aimée M. Surprenant, Ian Neath, 2013-03-07 This monograph proposes 7 principles of human memory These principles are qualitative statements of empirical regularities that can serve as intermediary explanations and which follow from viewing memory as a function *Memory Systems* 1994 Daniel L. Schacter, Endel Tulving, 1994

Assembled by the prominent psychologists Daniel Schacter and Endel Tulving the contributions in *Memory Systems* 1994 focus on the nature and number of memory systems in humans and animals Together they present ideas from cognitive psychology neuropsychology and neuroscience in a review of intriguing experimental outcomes at the cutting edge of this domain grappling often passionately with the behavioral and neuroanatomical composition of memory systems and subsystems Chapters are revised versions of contributions that appeared in a special issue of the *Journal of Cognitive Neuroscience* This book includes an integrated discussion of and cross commentary on the earlier contributions A Bradford Book Sentence Processing Roger P. G. van Gompel, 2013-09-11 What are the psychological processes involved in comprehending sentences How do we process the structure of sentences and how do we understand their meaning Do children bilinguals and people with language impairments process sentences in the same way as healthy monolingual adults These are just some of the many questions that sentence processing researchers have tried to answer by conducting ever more sophisticated experiments making this one of the most productive and exciting areas in experimental language research in recent years This book is the first to provide a comprehensive state of the art overview of this important field It

contains 10 chapters written by world leading experts which discuss influential theories of sentence processing and important experimental evidence with a focus on recent developments in the area The chapters also analyse research that has investigated how people process the structure and meaning of sentences and how sentences are understood within their context This comprehensive and authoritative work will appeal to students and researchers in the field of sentence processing as well anyone with an interest in psychology and linguistics

**The Oxford Handbook of Comparative Cognition** Thomas R. Zentall, Edward A. Wasserman, 2012-03-20 This comprehensive volume illustrates why an understanding of animal intelligence is essential in disclosing the nature of minds other than our own making it a fascinating volume for anyone curious about the state of modern comparative cognition

**Cognition, Information Processing, and Psychophysics** Hans-Georg Geissler, Stephen W. Link, James T. Townsend, 2013-04-15 The plan for this volume emerged during the international Leipzig conference commemorating the centenary of the death of Gustav Fechner The contributors suggested that while many features of modern psychological theory were anticipated by Fechner many new theoretical approaches owe much more to him than often is realized As such they decided to honor Fechner by evaluating his own contribution to the founding of psychology and psychoanalysis by deepening the foundations of psychological theories of consciousness perception and choice and by using the analysis of time to create a new appreciation of constraints that bind mental processes together Thus this volume spans an extraordinary range of psychological topics from hermeneutics to the time quantum basis for mental processes in a way that would both amaze and delight Fechner Moreover the international reach of his pioneering ideas can be seen from the current locations of the contributors The span from Japan to the United States to Holland to Germany and to Israel provides a global measure of Fechner's scientific legacy

*Cognition and Emotion* Eric Eich Professor of Psychology University of British Columbia, Berkeley John F. Kihlstrom Professor of Psychology University of California, Stanford CA Gordon H. Bower Albert Ray Lang Professor of Psychology Stanford University, Joseph P. Forgas Scientia Professor of Psychology University of New South Wales, Paula M. Niedenthal Scientia Professor of Psychology University of New South Wales, 2000-07-28 Recent years have witnessed a revival of research in the interplay between cognition and emotion The reasons for this renaissance are many and varied In the first place emotion theorists have come to recognize the pivotal role of cognitive factors in virtually all aspects of the emotion process and to rely on basic cognitive factors and insight in creating new models of affective space Also the successful application of cognitive therapies to affective disorders has prompted clinical psychologists to work towards a clearer understanding of the connections between cognitive processes and emotional problems And whereas the cognitive revolutionaries of the 1960s regarded emotions with suspicion viewing them as nagging sources of hot noise in an otherwise cool rational and computer like system of information processing cognitive researchers of the 1990s regard emotions with respect owing to their potent and predictable effects on tasks as diverse as object perception episodic recall and risk assessment These intersecting lines of interest have made cognition and emotion one of the most active and rapidly developing areas within psychological science Written in debate format this book covers developing fields such as social cognition as well as classic areas such as memory learning perception and categorization The links between emotion and memory learning perception categorization social judgements and behavior are addressed Contributors come from the U S Canada Australia and France
