With thousands of years of continuous history China is one of the world's oldest civilizations and is regarded as one of the cradles of civilization. The Zhou dynasty (1046-256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty (206 BC-220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644-1912), which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War (1927-1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China. In some eras, control stretched as far as Xinjiang and Tibet. As at present, traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.

**Picturing Heaven in Early China** Lillian Lan-ying Tseng, 2020-03-17. Tian or Heaven had multiple meanings in early China. It had been used since the Western Zhou to indicate both the sky and the highest god and later came to be regarded as a force driving the movement of the cosmos and as a home to deities and imaginary animals. By the Han dynasty, which saw an outpouring of visual materials depicting Heaven, the concept of Heaven encompassed an immortal realm to which humans could ascend after death. Using excavated materials, Lillian Tseng shows how Han artisans transformed various notions of Heaven as the mandate, the fantasy, and the sky into pictorial entities. The Han Heaven was not indicated by what the artisans looked at but rather was suggested by what they looked into. Artisans attained the visibility of Heaven by appropriating and modifying related knowledge of cosmology, mythology, and astronomy. Thus, the depiction of Heaven in Han China reflected an interface of image and knowledge. By examining Heaven as depicted in ritual buildings, on household utensils, and in the embellishments of funerary settings, Tseng maintains that visibility can hold up a mirror to visibility. Heaven was culturally constructed and should be culturally reconstructed.
