Religion A Psychological Interpretation:

The Individual and His Religion Gordon Willard Allport, 1960 A man's religion is the audacious bid he makes to bind himself to creation and to the Creator It is his ultimate attempt to enlarge and to complete his own personality by finding the supreme context in which he rightly belongs In these pages I have undertaken the task of discovering the place of religion in the life economy of the individual of seeking a psychological understanding of the nature and functioning of the religious sentiment and tracing the full course of religious development in the normally mature and productive personality **The Individual and His Religion** Gordon Willard Allport, 1976 **Religion, a Psychological Interpretation** Orlo Strunk, 1962 *The Individual and His Religion* Gordon W. Allport, 1970 Religion Orlo Strunk (jr.), 1962 **Religion** O. Strunk (jr.), 1962 **The Pragmatics of Defining Religion** Jan G. Platvoet, Arie Leendert Molendijk, 1999 The Pragmatics of Defining Religion is a multidisciplinary volume on the problem of the definition of religion with chapters on the polemics of defining religion in modern contexts the history of the concept of religion the methodology of its definition it includes several definition proposals **Psychology of Religious Experience** Francis Lorette Strickland, 1924 **Psychology of Religious Experience** Francis L. Strickland, 1926 **Religion and Mental Health**, 1980 References to 1836 journal articles dissertations and books published since 1970 Also contains foreign language titles Focuses on literature dealing with the theoretical and practical relationships between religion and mental health Classified arrangement Each entry gives bibliographical information and abstract Author subject indexes **Bibliography on Religion and Mental Health, 1960-1964** National Clearinghouse for Mental Health Information (U.S.), 1967 *Religion and the Christian Faith* Hendrik Kraemer, 2003-06 A rich and profound contribution to the debate on the position of modern Christianity opened up Kraemer's The Christian Message in a Non Christian World In Religion and the Christian Faith he deals with many of the criticisms of his position and offers an apologia at once luminous and massive of the Christian religion as the revelation of God to Man and the faith for all mankind There is a decisive Christian finality about Kraemer's writing and his book is a significant contribution to the sharp discipline of faith and action under which the universal Christian community lives All the way through his formidably marshalled arguments run the undertones of Christian involvement in a real world a world which by his astonishing grasp of philosophy Biblical theology and the claims of religion and religions the Author brings alive to the reader The reading of this formative book with its strenuous demands on the reader's intelligence and Christian understanding is a rewarding experience Its significance for the Christian Church throughout the world is obvious but it is also a monumental witness to the Christian religion for all those who ask not only for a faith once delivered but a faith to believe in their own day and generation Psychology of religious experience Francis Lorette Strickland, 1926 *The Science of Religion, Spirituality, and Existentialism* Kenneth E. Vail III, Clay Routledge, 2020-04-04 The Science of Religion Spirituality and Existentialism presents in depth analysis of the core issues in existential psychology their connections to

religion and spirituality e.g. religious concepts, beliefs, identities and practices and their diverse outcomes e.g. psychological, social, cultural and health. Leading scholars from around the world cover research exploring how fundamental existential issues are both cause and consequence of religion and spirituality, informed by research data spanning multiple levels of analysis such as evolution, cognition and neuroscience, emotion and motivation, personality and individual differences, social and cultural forces, physical and mental health among many others. *The Science of Religion, Spirituality and Existentialism* explores known contours and emerging frontiers, addressing the big question of why religious belief remains such a central feature of the human experience. Discusses both abstract concepts of mortality and concrete near-death experiences. Covers the struggles and triumphs associated with freedom, self-regulation and authenticity. Examines the roles of social exclusion, experiential isolation, attachment and the construction of social identity. Considers the problems of uncertainty, the effort to discern truth and reality and the challenge to find meaning in life. Discusses how the mind developed to handle existential topics, how the brain and mind implement the relevant processes and the many variations and individual differences that alter those processes. Delves into the psychological functions of religion and science, the influence on pro and antisocial behavior, politics and public policy and looks at the role of spiritual concerns in understanding the human body and maintaining physical health.

Psychoanalysis, Phenomenological Anthropology and Religion Antoon Vergote, 2023-10-16. In this volume we have brought together some of the most important contributions of Antoon Vergote to the field of what is now called the clinical psychology of religion. Most of these contributions were not published before in English. They cover the field in two ways. On the one hand, we selected some articles in which Vergote reflects about the foundations of the clinical psychology of religion. This first part of the book is about the psychoanalytic and philosophical/anthropological approach of some major topics in the study of religion, e.g. mythical thinking and symbolisation, moral law and the idea of sin, religious experience. In this part we also included a critical reflection about the classic psychoanalytic criticism of religion and about the epistemology and the limits of the psychology of religion. The second part, on the other hand, contains clinical, empirical and psycho-historical studies about concrete religious phenomena. The first section of this part is amongst other topics about the psychological approach of the person Jesus, about the psychological profile of the priest and about some aspects of folk religiosity. The second section deals with problems in the field of mental health and religion, the differentiation of true and false mysticism, religion and psychopathology and a psychological approach of the experience of visions and apparitions.

Introduction to the Psychology of Religion Franklin Simpson Hickman, 1926. *Classical Approaches to the Study of Religion* Jacques Waardenburg, 2017-01-23. Waardenburg's master's thesis traces the rise and development of the academic study of religion from the mid-nineteenth to the mid-twentieth century, outlining the establishment of the discipline, its connections with other fields, religion as a subject of research and perspectives on a phenomenological study of religion. Furthermore, a second part comprises an anthology of texts from 41 scholars whose work was programmatic in the evolution

of the academic study of religion Each chapter presents a particular approach theory and method relevant to the study of religion The pieces selected for this volume were taken from the discipline of religious studies as well as from related fields such as anthropology sociology and psychology to name a few *The World's Religions* Peter B. Clarke, Peter Beyer, 2009-05-07 This comprehensive volume focuses on the world's religions and the changes they have undergone as they become more global and diverse in form It explores the religions of the world not only in the regions with which they have been historically associated but also looks at the new cultural and religious contexts in which they are developing It considers the role of migration in the spread of religions by examining the issues raised for modern societies by the increasing interaction of different religions The volume also addresses such central questions as the dynamics of religious innovation which is evidenced in the rise and impact of new religious and new spirituality movements in every continent
